ESEA Flexibility

Request

Revised June 8, 2012

U.S. Department of Education
Washington, DC 20202

OMB Number: 1810-0581

Paperwork Burden Statement

INTRODUCTION

The U.S. Department of Education (Department) is offering each State educational agency (SEA) the opportunity to request flexibility on behalf of itself, its local educational agencies (LEAs), and its schools, in order to better focus on improving student learning and increasing the quality of instruction. This voluntary opportunity will provide educators and State and local leaders with flexibility regarding specific requirements of the No Child Left Behind Act of 2001 (NCLB) in exchange for rigorous and comprehensive State-developed plans designed to improve educational outcomes for all students, close achievement gaps, increase equity, and improve the quality of instruction. This flexibility is intended to build on and support the significant State and local reform efforts already underway in critical areas such as transitioning to college- and career-ready standards and assessments; developing systems of differentiated recognition, accountability, and support; and evaluating and supporting teacher and principal effectiveness.

The Department invites interested SEAs to request this flexibility pursuant to the authority in section 9401 of the Elementary and Secondary Education Act of 1965 (ESEA), which allows the Secretary to waive, with certain exceptions, any statutory or regulatory requirement of the ESEA for an SEA that receives funds under a program authorized by the ESEA and requests a waiver. Under this flexibility, the Department would grant waivers through the 2013–2014 school year, after which time an SEA may request an extension of this flexibility.

REVIEW AND EVALUATION OF REQUESTS

The Department will use a review process that will include both external peer reviewers and staff reviewers to evaluate SEA requests for this flexibility. This review process will help ensure that each request for this flexibility approved by the Department is consistent with the principles described in the document titled *ESEA Flexibility*, which are designed to support State efforts to improve student academic achievement and increase the quality of instruction, and is both educationally and technically sound. Reviewers will evaluate whether and how each request for this flexibility will support a comprehensive and coherent set of improvements in the areas of standards and assessments, accountability, and teacher and principal effectiveness that will lead to improved student outcomes. Each SEA will have an opportunity, if necessary, to clarify its plans for peer and staff reviewers and to answer any questions reviewers may have. The peer reviewers will then provide comments to the Department. Taking those comments into consideration, the Secretary will make a decision regarding each SEA's request for this flexibility. If an SEA's request for this flexibility is not granted, reviewers and the Department will provide feedback to the SEA about the components of the SEA's request that need additional development in order for the request to be approved.

GENERAL INSTRUCTIONS

An SEA seeking approval to implement this flexibility must submit a high-quality request that addresses all aspects of the principles and waivers and, in each place where a plan is required, includes a high-quality plan. Consistent with ESEA section 9401(d)(1), the Secretary intends to grant waivers that are included in this flexibility through the end of the 2013–2014 school year. An SEA will be permitted to request an extension of the initial period of this flexibility prior to the start of the 2014–2015 school year unless this flexibility is superseded by reauthorization of the ESEA. The Department is asking SEAs to submit requests that include plans through the 2014–2015 school year in order to provide a complete picture of the SEA's reform efforts. The Department will not accept a request that meets only some of the principles of this flexibility.

This version of the *ESEA Flexibility Request* replaces the document originally issued on September 23, 2011 and revised on September 28, 2011. Through this revised version, the following section has been removed: 3.A, Option B (Option C has been renamed Option B). Additions have also been made to the following sections: Waivers and Assurances. Finally, this revised guidance modifies the following sections: Waivers; Assurances; 2.A.ii; 2.C.i; 2.D.i; 2.E.i; Table 2; 2.G; and 3.A, Options A and B.

High-Quality Request: A high-quality request for this flexibility is one that is comprehensive and coherent in its approach, and that clearly indicates how this flexibility will help an SEA and its LEAs improve student achievement and the quality of instruction for students.

A high-quality request will (1) if an SEA has already met a principle, provide a description of how it has done so, including evidence as required; and (2) if an SEA has not yet met a principle, describe how it will meet the principle on the required timelines, including any progress to date. For example, an SEA that has not adopted minimum guidelines for local teacher and principal evaluation and support systems consistent with Principle 3 by the time it submits its request for the flexibility will need to provide a plan demonstrating that it will do so by the end of the 2011–2012 school year. In each such case, an SEA's plan must include, at a minimum, the following elements for each principle that the SEA has not yet met:

1. Key milestones and activities: Significant milestones to be achieved in order to meet a given principle, and essential activities to be accomplished in order to reach the key milestones. The SEA should also include any essential activities that have already been completed or key milestones that have already been reached so that reviewers can understand the context for and fully evaluate the SEA's plan to meet a given principle.

2. Detailed timeline: A specific schedule setting forth the dates on which key activities will begin and be completed and milestones will be achieved so that the SEA can meet the principle by the required date.

3. Party or parties responsible: Identification of the SEA staff (*e.g.*, position, title, or office) and, as appropriate, others who will be responsible for ensuring that each key activity is accomplished.

4. <u>Evidence</u>: Where required, documentation to support the plan and demonstrate the SEA's progress in implementing the plan. This *ESEA Flexibility Request* indicates the specific evidence that the SEA must either include in its request or provide at a future reporting date.

5. <u>Resources</u>: Resources necessary to complete the key activities, including staff time and additional funding.

6. <u>Significant obstacles</u>: Any major obstacles that may hinder completion of key milestones and activities (*e.g.,* State laws that need to be changed) and a plan to overcome them.

Included on page 19 of this document is an example of a format for a table that an SEA may use to submit a plan that is required for any principle of this flexibility that the SEA has not already met. An SEA that elects to use this format may also supplement the table with text that provides an overview of the plan.

An SEA should keep in mind the required timelines for meeting each principle and develop credible plans that allow for completion of the activities necessary to meet each principle. Although the plan for each principle will reflect that particular principle, as discussed above, an SEA should look across all plans to make sure that it puts forward a comprehensive and coherent request for this flexibility.

<u>Preparing the Request</u>: To prepare a high-quality request, it is extremely important that an SEA refer to <u>all</u> of the provided resources, including the document titled *ESEA Flexibility*, which includes the principles, definitions, and timelines; the document titled *ESEA Flexibility Review Guidance*, which includes the criteria that will be used by the peer reviewers to determine if the request meets the principles of this flexibility; and the document titled *ESEA Flexibility Frequently Asked Questions,* which provides additional guidance for SEAs in preparing their requests.

As used in this request form, the following terms have the definitions set forth in the document titled *ESEA Flexibility*: (1) college- and career-ready standards, (2) focus school, (3) high-quality assessment, (4) priority school, (5) reward school, (6) standards that are common to a significant number of States, (7) State network of institutions of higher education, (8) student growth, and (9) turnaround principles.

Each request must include:
- A table of contents and a list of attachments, using the forms on pages 1 and 2.
- The cover sheet (p. 3), waivers requested (p. 4-6), and assurances (p. 7-8).
- A description of how the SEA has met the consultation requirements (p. 9).
- Evidence and plans to meet the principles (p. 10-18). An SEA will enter narrative text in the text boxes provided, complete the required tables, and provide other required evidence. An SEA may supplement the narrative text in a text box with attachments, which will be included in an appendix. Any supplemental attachments that are included in an appendix must be referenced in the related narrative text.

Requests should not include personally identifiable information.

<u>Process for Submitting the Request</u>: An SEA must submit a request to the Department to receive the flexibility. This request form and other pertinent documents are available on the Department's Web site at: http://www.ed.gov/esea/flexibility.

> *Electronic Submission*: The Department strongly prefers to receive an SEA's request for the flexibility electronically. The SEA should submit it to the following address: ESEAflexibility@ed.gov.

> *Paper Submission*: In the alternative, an SEA may submit the original and two copies of its request for the flexibility to the following address:

> > Patricia McKee, Acting Director
> > Student Achievement and School Accountability Programs
> > U.S. Department of Education
> > 400 Maryland Avenue, SW, Room 3W320
> > Washington, DC 20202-6132

Due to potential delays in processing mail sent through the U.S. Postal Service, SEAs are encouraged to use alternate carriers for paper submissions.

REQUEST SUBMISSION DEADLINE

SEAs have multiple opportunities to submit requests for the flexibility. The submission dates are November 14, 2011, February 28, 2012, and an additional opportunity following the conclusion of the 2011–2012 school year.

TECHNICAL ASSISTANCE MEETING FOR SEAS

The Department has conducted a number of webinars to assist SEAs in preparing their requests and to respond to questions. Please visit the Department's Web site at: http://www.ed.gov/esea/flexibility for copies of previously conducted webinars and information on upcoming webinars.

FOR FURTHER INFORMATION

If you have any questions, please contact the Department by e-mail at ESEAflexibility@ed.gov.

TABLE OF CONTENTS

Insert page numbers prior to submitting the request, and place the table of contents in front of the SEA's flexibility request.

By submitting this flexibility request, the SEA requests flexibility through waivers of the ten ESEA requirements listed below and their associated regulatory, administrative, and reporting requirements by checking each of the boxes below. The provisions below represent the general areas of flexibility requested; a chart appended to the document titled *ESEA Flexibility Frequently Asked Questions* enumerates each specific provision of which the SEA requests a waiver, which the SEA incorporates into its request by reference.

☒ 1. The requirements in ESEA section 1111(b)(2)(E)-(H) that prescribe how an SEA must establish annual measurable objectives (AMOs) for determining adequate yearly progress (AYP) to ensure that all students meet or exceed the State's proficient level of academic achievement on the State's assessments in reading/Language Arts/language arts and mathematics no later than the end of the 2013–2014 school year. The SEA requests this waiver to develop new ambitious but achievable AMOs in reading/Language Arts/language arts and mathematics in order to provide meaningful goals that are used to guide support and improvement efforts for the State, LEAs, schools, and student subgroups.

☒ 2. The requirements in ESEA section 1116(b) for an LEA to identify for improvement, corrective action, or restructuring, as appropriate, a Title I school that fails, for two consecutive years or more, to make AYP, and for a school so identified and its LEA to take certain improvement actions. The SEA requests this waiver so that an LEA and its Title I schools need not comply with these requirements.

☒ 3. The requirements in ESEA section 1116(c) for an SEA to identify for improvement or corrective action, as appropriate, an LEA that, for two consecutive years or more, fails to make AYP, and for an LEA so identified and its SEA to take certain improvement actions. The SEA requests this waiver so that it need not comply with these requirements with respect to its LEAs.

☒ 4. The requirements in ESEA sections 6213(b) and 6224(e) that limit participation in, and use of funds under the Small, Rural School Achievement (SRSA) and Rural and Low-Income School (RLIS) programs based on whether an LEA has made AYP and is complying with the requirements in ESEA section 1116. The SEA requests this waiver so that an LEA that receives SRSA or RLIS funds may use those funds for any authorized purpose regardless of whether the LEA makes AYP.

☒ 5. The requirement in ESEA section 1114(a)(1) that a school have a poverty percentage of 40 percent or more in order to operate a schoolwide program. The SEA requests this waiver so that an LEA may implement interventions consistent with the turnaround principles or interventions that are based on the needs of the students in the school and designed to enhance the entire educational program in a school in any of its priority and focus schools that meet the definitions of "priority schools" and "focus schools," respectively, set forth in the document titled *ESEA Flexibility*, as appropriate, even if those schools do not have a poverty percentage of 40 percent or more.

☒ 6. The requirement in ESEA section 1003(a) for an SEA to distribute funds reserved under that

section only to LEAs with schools identified for improvement, corrective action, or restructuring. The SEA requests this waiver so that it may allocate section 1003(a) funds to its LEAs in order to serve any of the State's priority and focus schools that meet the definitions of "priority schools" and "focus schools," respectively, set forth in the document titled *ESEA Flexibility*.

☒ 7. The provision in ESEA section 1117(c)(2)(A) that authorizes an SEA to reserve Title I, Part A funds to reward a Title I school that (1) significantly closed the achievement gap between subgroups in the school; or (2) has exceeded AYP for two or more consecutive years. The SEA requests this waiver so that it may use funds reserved under ESEA section 1117(c)(2)(A) for any of the State's reward schools that meet the definition of "reward schools" set forth in the document titled *ESEA Flexibility*.

☒ 8. The requirements in ESEA section 2141(a), (b), and (c) for an LEA and SEA to comply with certain requirements for improvement plans regarding highly qualified teachers. The SEA requests this waiver to allow the SEA and its LEAs to focus on developing and implementing more meaningful evaluation and support systems.

☒ 9. The limitations in ESEA section 6123 that limit the amount of funds an SEA or LEA may transfer from certain ESEA programs to other ESEA programs. The SEA requests this waiver so that it and its LEAs may transfer up to 100 percent of the funds it receives under the authorized programs among those programs and into Title I, Part A.

☒ 10. The requirements in ESEA section 1003(g)(4) and the definition of a Tier I school in Section I.A.3 of the School Improvement Grants (SIG) final requirements. The SEA requests this waiver so that it may award SIG funds to an LEA to implement one of the four SIG models in any of the State's priority schools that meet the definition of "priority schools" set forth in the document titled *ESEA Flexibility*.

Optional Flexibilities:

If an SEA chooses to request waivers of any of the following requirements, it should check the corresponding box(es) below:

☐ 11. The requirements in ESEA sections 4201(b)(1)(A) and 4204(b)(2)(A) that restrict the activities provided by a community learning center under the Twenty-First Century Community Learning Centers (21st CCLC) program to activities provided only during non-school hours or periods when school is not in session (*i.e.*, before and after school or during summer recess). The SEA requests this waiver so that 21st CCLC funds may be used to support expanded learning time during the school day in addition to activities during non-school hours or periods when school is not in session.

☒ 12. The requirements in ESEA sections 1116(a)(1)(A)-(B) and 1116(c)(1)(A) that require LEAs and SEAs to make determinations of adequate yearly progress (AYP) for schools and LEAs, respectively. The SEA requests this waiver because continuing to determine whether an LEA and its schools make AYP is inconsistent with the SEA's State-developed differentiated recognition, accountability, and support system included in its ESEA flexibility request. The

SEA and its LEAs must report on their report cards performance against the AMOs for all subgroups identified in ESEA section 1111(b)(2)(C)(v), and use performance against the AMOs to support continuous improvement in Title I schools that are not reward schools, priority schools, or focus schools.

☒ 13. The requirements in ESEA section 1113(a)(3)-(4) and (c)(1) that require an LEA to serve eligible schools under Title I in rank order of poverty and to allocate Title I, Part A funds based on that rank ordering. The SEA requests this waiver in order to permit its LEAs to serve a Title I-eligible high school with a graduation rate below 60 percent that the SEA has identified as a priority school even if that school does not rank sufficiently high to be served.

By submitting this application, the SEA assures that:

☒ 1. It requests waivers of the above-referenced requirements based on its agreement to meet Principles 1 through 4 of the flexibility, as described throughout the remainder of this request.

☒ 2. It will adopt English language proficiency (ELP) standards that correspond to the State's college- and career-ready standards, consistent with the requirement in ESEA section 3113(b)(2), and that reflect the academic language skills necessary to access and meet the new college- and career-ready standards, no later than the 2013–2014 school year. (Principle 1)

☒ 3. It will develop and administer no later than the 2014–2015 school year alternate assessments based on grade-level academic achievement standards or alternate assessments based on alternate academic achievement standards for students with the most significant cognitive disabilities that are consistent with 34 C.F.R. § 200.6(a)(2) and are aligned with the State's college- and career-ready standards. (Principle 1)

☒ 4. It will develop and administer ELP assessments aligned with the State's ELP standards, consistent with the requirements in ESEA sections 1111(b)(7), 3113(b)(2), and 3122(a)(3)(A)(ii). (Principle 1)

☒ 5. It will report annually to the public on college-going and college credit-accumulation rates for all students and subgroups of students in each LEA and each public high school in the State. (Principle 1)

☒ 6. If the SEA includes student achievement on assessments in addition to reading/Language Arts/language arts and mathematics in its differentiated recognition, accountability, and support system and uses achievement on those assessments to identify priority and focus schools, it has technical documentation, which can be made available to the Department upon request, demonstrating that the assessments are administered statewide; include all students, including by providing appropriate accommodations for English Learners and students with disabilities, as well as alternate assessments based on grade-level academic achievement standards or alternate assessments based on alternate academic achievement standards for students with the most significant cognitive disabilities, consistent with 34 C.F.R. § 200.6(a)(2); and are valid and reliable for use in the SEA's differentiated recognition, accountability, and support system. (Principle 2)

☒ 7. It will report to the public its lists of reward schools, priority schools, and focus schools at the time the SEA is approved to implement the flexibility, and annually thereafter, it will publicly recognize its reward schools as well as make public its lists of priority and focus schools if it chooses to update those lists. (Principle 2)

☒ 8. Prior to submitting this request, it provided student growth data on their current students and the students they taught in the previous year to, at a minimum, all teachers of reading/Language Arts/language arts and mathematics in grades in which the State administers assessments in those subjects in a manner that is timely and informs instructional programs, or it will do so no later than the deadline required under the State Fiscal Stabilization Fund. (Principle 3)

☒ 9. It will evaluate and, based on that evaluation, revise its own administrative requirements to reduce duplication and unnecessary burden on LEAs and schools. (Principle 4)

☒ 10. It has consulted with its Committee of Practitioners regarding the information set forth in its request.

☒ 11. Prior to submitting this request, it provided all LEAs with notice and a reasonable opportunity to comment on the request and has attached a copy of that notice (Attachment 1) as well as copies of any comments it received from LEAs (Attachment 2).

☒ 12. Prior to submitting this request, it provided notice and information regarding the request to the public in the manner in which the State customarily provides such notice and information to the public (*e.g.*, by publishing a notice in the newspaper; by posting information on its website) and has attached a copy of, or link to, that notice (Attachment 3).

☒ 13. It will provide to the Department, in a timely manner, all required reports, data, and evidence regarding its progress in implementing the plans contained throughout this request.

☒ 14. It will report annually on its State report card, and will ensure that its LEAs annually report on their local report cards, for the "all students" group and for each subgroup described in ESEA section 1111(b)(2)(C)(v)(II): information on student achievement at each proficiency level; data comparing actual achievement levels to the State's annual measurable objectives; the percentage of students not tested; performance on the other academic indicator for elementary and middle schools; and graduation rates for high schools. It will also annually report, and will ensure that its LEAs annually report, all other information and data required by ESEA section 1111(h)(1)(C) and 1111(h)(2)(B), respectively.

If the SEA selects Option A in section 3.A of its request, indicating that it has not yet developed and adopted all the guidelines for teacher and principal evaluation and support systems, it must also assure that:

☒ 15. It will submit to the Department for peer review and approval a copy of the guidelines that it will adopt by the end of the 2011–2012 school year. (Principle 3)

An SEA must meaningfully engage and solicit input from diverse stakeholders and communities in the development of its request. To demonstrate that an SEA has done so, the SEA must provide an assurance that it has consulted with the State's Committee of Practitioners regarding the information set forth in the request and provide the following:

1. A description of how the SEA meaningfully engaged and solicited input on its request from teachers and their representatives.

In recent years, the District of Columbia has been hailed as a leader in many areas of school reform, including educator recruitment, retention, evaluation, and training; robust charter school options, innovation, and collaboration; and universal preschool. This strong reform agenda is backed by aligned leadership and support at all levels: the District of Columbia has both the experience and the political will to achieve exceptional outcomes. The list of factors that position the District of Columbia for success is extensive and includes a vibrant charter school sector that currently educates 41 percent of publicly educated pupils, a head start on transforming the traditional school system under mayoral control, improved state-level capacity, a supportive network of leading local and national partners, and District-wide interest and urgency around the work that remains to be done.

While the District of Columbia has made much progress, significant challenges remain. Despite the renewed focus on raising achievement, many schools and students still struggle. Statewide, only 45 percent of students are proficient in English/Language Arts and 47 percent are proficient in math, with stubbornly persistent performance gaps between subgroups. For students with special needs, only 16 percent are meeting proficiency in English/Language Arts and 19 percent in math. English language learners (ELLs) perform slightly better, with 25 percent meeting proficiency levels in English/Language Arts and 36 percent in math. With the District of Columbia's 2011 proficiency targets set between 70 and 74 percent, only 25 of 187 schools met adequate yearly progress (AYP) benchmarks in both English/Language Arts and mathematics last year, many because of the "safe harbor" provision that gives credit to schools able to reduce by 10 percent the number of students not meeting proficiency targets. Based on the graduation cohort calculation, which the District of Columbia calculated for the first time this year, the DC OSSE identified a graduation rate of 59 percent of students graduating within four years.

In addressing these challenges, it helps to understand the District of Columbia's unique context. Its 68 square miles of land, divided into eight wards, contain 54 local education agencies (LEAs): one large, traditional district, District of Columbia Public Schools (DCPS), and 53 independently operated charter LEAs. Together, these 54 school districts educate 78,469 students mostly from low-income families of color. In 2011, the District of Columbia led the nation in post-secondary participation, with 71 percent of 17- to 24-year-old young adults either residing in or relocating to the District having a college degree or enrolled in a post-secondary institution. Yet, many are not graduates of the District of Columbia's elementary and

secondary education sector; instead they are transplants to the DC metro area. Furthermore, the District of Columbia has a stratified education gap among residents wherein income and educational attainment differ between the upper Northwest and most of the city east of Rock Creek Park.

For decades, DCPS served as both the state education agency (SEA) and an LEA. In 2007, after Congress amended the District of Columbia Home Rule specifically to permit mayoral takeover of public education, the Public Education Reform Amendment Act (PERAA) was enacted and created the District of Columbia Office of the State Superintendent of Education (DC OSSE) to provide leadership in policy for all schools and act as the SEA for the District of Columbia. The same law established a State Board of Education (SBOE), with advisory, approval, and public-engagement mandates. As the DC OSSE continues to provide statewide leadership and support, it is committed to ensuring that all students in the capital of the world's most powerful nation have a fair shot at the American dream.

Pursuing ESEA flexibility is the right approach for improving education in the District of Columbia. This proposal seeks to reduce by half the number of students who do not meet proficiency within six years. At a minimum, the DC OSSE expects its students to reach proficiency at a rate of 73 percent in English/Language Arts and 74 percent in mathematics by 2017. Likewise, the DC OSSE expects the graduation rate to increase to 78 percent for students graduating within four years and to 90 percent for students graduating within six years by 2017 as an interim step to the state goal of an 85 percent graduation rate.

Flexibility will give the District of Columbia the opportunity to boost proficiency, narrow or close achievement gaps, reward successful schools, and support LEAs and schools to enable sustained and sustainable improvement. Toward that end, the DC OSSE plans to build upon the substantial work already undertaken as part of the Race to the Top (RTTT) grant, the Partnership for Assessment of Readiness for College and Careers (PARCC) consortium leadership, and School Improvement Grant (SIG) turnaround efforts. Beginning in school year 2012–13, the District of Columbia's new accountability framework will include composition. Science will be added in school year 2013–14.

The DC OSSE will expand upon efforts to help LEAs and schools transition to the Common Core State Standards (CCSS); provide differentiated rewards, interventions, and supports by implementing a new accountability index that measures proficiency and growth; and assist LEAs in developing and implementing improved teacher and leader evaluation systems. The flexibility provided if this application is approved will free up resources—both time and funds—so that school communities can craft interventions and programs tailored to meet their students' unique needs as well as help parents make more informed school choices. To ensure effective implementation, the DC OSSE is committed to establishing annual benchmarks and monitoring LEA and school progress toward them.

Meaningful Engagement

Developing a high-quality, comprehensive ESEA flexibility application and ensuring its successful implementation necessitated an aggressive public-engagement campaign to solicit community and stakeholder input. The DC OSSE conducted extensive outreach for several months to meaningfully engage a critical and diverse group of education stakeholders. They ranged from classroom and special education teachers to parents, students, administrators, nonprofit partners, political and business leaders, early childhood educators, and residents. In addition to hosting focus groups, the DC OSSE worked in partnership with the State Board of Education to hold dozens of community meetings throughout the District of Columbia's eight wards.

All told, more than 600 individuals participated in over 55 public events. The DC OSSE also solicited public input via a variety of media and provided opportunities for stakeholders to readily access information about the District's ESEA flexibility proposal. Most crucially, stakeholders had multiple ways to convey comments or concerns, whether electronically, by mail, or in person at community forums and the State Board of Education's public meetings, which are televised and rebroadcast throughout the month. These opportunities generated a significant amount of public comments that strengthened this ESEA flexibility request.

The outreach plan centered on a commitment to keeping the District of Columbia's public-education community informed of and involved in the consideration and development of the ESEA flexibility request to ensure it addressed the needs and concerns of the District's stakeholders. A parallel goal of the DC OSSE's outreach and consultation efforts was to create and fortify partnerships with individuals and groups who will implement, support, develop, or are affected by the educational strategies identified in this application.

The DC OSSE's extensive stakeholder engagement not only helped shape the draft application made available for public comment, it also resulted in several changes to the final application for submission. While early group discussions provided information about commonly held concerns and perceptions, the public comment period centered on specific strategies proposed in the draft that demanded greater detail and clarity. In developing the final application, the DC OSSE staff drew on this input to ensure that the District's education plan identified strategies that address issues or problems brought forward by the community, such as how schools will be held accountable for educating all students and not given a "pass" to lower expectations for or to ignore certain populations. The final application was crafted to improve student achievement, increase graduation rates, close achievement gaps, and develop globally competitive citizens who are prepared for college and career success while creating a more robust accountability system that strengthens parental engagement and preserves autonomy and flexibility for LEAs and schools.

Engagement with Teachers, Principals, and Union Leaders

As noted above, the District of Columbia operates in an education landscape that includes one large, traditional LEA (the DCPS) and its public schools, as well as a charter authorizer (the Public Charter School Board or PCSB) and multiple public charter schools responsible for the oversight of teachers and school administrators. To ensure that District public school teachers and their representatives were partners in the development of the ESEA flexibility request, the DC OSSE facilitated open forums, extended office hours, and provided online opportunities for teachers to participate in the development of the ESEA flexibility request. The DC OSSE met with representatives of the Washington Teachers Union (WTU) and the Council of School Officers, which is the association for DCPS principals, assistant principals, and other school leaders. Additionally, teacher-centered focus groups were held to ensure that the ESEA flexibility request application addressed the needs and concerns of District of Columbia educators. Teachers also participated in several of the focus groups detailed in the community engagement efforts included in this application.

Throughout the development of the ESEA flexibility request and the revised application, the DC OSSE also chaired multiple meetings with the DCPS, the District of Columbia PCSB, and school administrators. Administrators expressed concern about which indicators were to be included in the new accountability system, particularly the inclusion of current science and composition assessments, and the supports and interventions to be provided. While amenable to increased accountability, charter school administrators cited the preservation of flexibility to implement innovative programs and strategies—an authority granted under local charter school laws—as critical. Participants also were concerned about the addition of indicators that would impose added data collection and reporting burdens on LEAs and schools without providing meaningful information to education stakeholders. These concerns are addressed in detail throughout this document.

2. A description of how the SEA meaningfully engaged and solicited input on its request from other diverse communities, such as students, parents, community-based organizations, civil rights organizations, organizations representing students with disabilities and English Learners, business organizations, and Indian tribes.

In addition to inviting public comment via the state agency's website and at community meetings, the DC OSSE ensured that select stakeholders affected by the District of Columbia's education program had opportunities to participate in smaller focus groups to discuss their unique needs and perspectives. The DC OSSE worked to identify and leverage existing opportunities to obtain input, including consulting with existing advisory groups. Participants included experts and/or advocates representing specific wards (geographical regions) and groups, including homeless families, charter schools, delinquent students, youth leadership, faith and community-based organizations, parents, students, teachers, LEA administrators, institutes of higher learning, special education experts, local businesses, community liaisons, private schools, ELLs and elected representatives.

While initial efforts to seek input for the ESEA flexibility application from the larger community focused on town hall meetings, the engagement strategy was subsequently revised to ensure that appropriate forums and media were used for each critical stakeholder group to ensure maximum outreach and stakeholder participation. Some neighborhoods, for example, rely on flyers to receive notice about a public forum; others use e-mail alerts. To eliminate geographical, economic, or temporal barriers to participation, focus groups and forums were held in a variety of settings across the District of Columbia, including during evening Parent Teacher Association (PTA) meetings at schools and in neighborhood association meetings. This community-based approach resulted in transparent public forums in local settings that captured the ideas and concerns of hundreds of stakeholders who otherwise might not have had an opportunity to participate.

Information regarding the ESEA flexibility application was also made available to the public through a number of media outlets, including the DC OSSE website (accessed by more than 700 unique users), press releases, Facebook and other social networking sites (600+ tweets on Twitter), e-mail blasts, blogging, print media, public service announcements on the District of Columbia's public access channel, and extended open house and office hours. The DC OSSE newsletters published to address the ESEA flexibility option were widely distributed to more than 2,200 recipients. Stakeholders could participate by phone, through written or electronic mail, by webinar, by teleconference, and/or during in-person meetings. More than 55 meetings, town halls, and focus groups were held with stakeholders to discuss reforms related to the ESEA flexibility request. An open comment period on the resulting draft application began on January 18, 2012 and lasted until February 14, 2012 and again on May 23, 2012 through May 29, 2012 for the revised application. In addition, the DC OSSE provided further transparency by briefing the State Board of Education at its televised monthly public meeting on both the initial draft proposal and revisions suggested from these public feedback sessions.

The strategy of holding focus groups representing unique stakeholder communities produced critical feedback. Participants received an overview of the ESEA flexibility option and were advised that focus group results would be used to inform the application process. To facilitate and guide discussion, the DC OSSE facilitators asked open-ended questions that became increasingly specific. Participants were encouraged to share opinions, concerns, priorities, and perspectives relevant to the group and to the four principles of ESEA flexibility. Discussions addressed how proposed reforms will change the future of public education in the District of Columbia. Finally, participants were told how they could provide further input via e-mail, phone, or in person.

These outreach efforts resulted in significant, meaningful input from a diverse group of education stakeholders from across the District of Columbia. In the course of developing this application, the DC OSSE worked collaboratively with elected bodies, including the State Board of Education, the Council of the District of Columbia, and Advisory Neighborhood Commissions to solicit and encourage public input. Efforts to engage stakeholders and garner robust

discussion regarding the proposed plan continued until June 7, 2012. A summary of the critical feedback received from District of Columbia education stakeholders is described below.

PRINCIPLE 1: COLLEGE- AND CAREER-READY EXPECTATIONS FOR ALL STUDENTS

Stakeholders supported this outcomes-based principle across groups and emphasized the importance of including these expectations at the elementary level. The need for reporting, resources, and supports to address the dropout problem, attendance, and college preparation from preschool through graduation was expressed by several stakeholders, who also mentioned a desire for data that provide information regarding the extent to which students will be nationally and internationally competitive. Parents encouraged the DC OSSE to empower parents by providing teaching and training from pre-kindergarten through graduation. Several stakeholders stressed the importance of a well-rounded education that includes universal music education, before- and after-school services in high-need schools, equitable opportunities (e.g., gifted and talented programs) in all eight wards, and greater emphasis on physical education. There was also concern about the lack of support and resources for high-quality science education.

PRINCIPLE 2: STATE-DEVELOPED DIFFERENTIATED RECOGNITION, ACCOUNTABILITY, AND SUPPORT

Focus groups generally agreed that current AYP targets had become unreachable and were no longer meaningful. Informal polls of multiple groups revealed a strong preference for setting annual targets to reduce achievement gaps by half within six years, with special provisions for students with special needs or who are ELLs. Participants advocated the development and implementation of accountability measures that reflect inequities related to unique challenges, school-level funding, school supports, and other resources at each public school. Stakeholders strongly encouraged leveraging existing reporting systems to create comparable information for parents and community stakeholders without placing undue reporting burdens on LEAs. Several parents and community advocates asked that the accountability plan address the need to provide stakeholders with transparent, meaningful, and *comparable* data for all LEAs. Although some stakeholders preferred an accountability system that does not extend beyond federally mandated elements, an equal number felt that items that reflect the capacity of District of Columbia students to be nationally and internationally competitive (e.g., writing, technology, etc.) should be included in the accountability plan. Parent and community representatives urged the inclusion of information regarding the distribution and availability of supports and resources for schools that would not be identified as priority or focus schools. Community advocates strongly expressed concern about how the District of Columbia could ensure that resources reached the neediest schools once federal funds were disbursed to LEAs.

PRINCIPLE 3: SUPPORTING EFFECTIVE INSTRUCTION AND LEADERSHIP

Several groups felt that tremendous focus had been placed on hiring teachers with subject area

expertise, while little attention had been given to the unique needs of a high poverty urban district and the skills that teachers need to succeed in these environments. Partnering with universities and LEAs to develop bachelors of education programs that prepare new teachers to succeed in a high poverty urban environment was suggested as one way the District of Columbia could support effective instruction. This effort is currently being undertaken by the University of the District of Columbia, which recently launched an urban teachers' residency program. There are also three teacher residency programs that the DC OSSE is supporting with Race to the Top funding. These programs are led by the following high performing charter LEAs working with four other charter LEAs in a consortium: KIPP and E.L. Haynes Public Charter School, Capital City Public Charter School, and Cesar Chavez Public Charter Schools. There was a call for better data on factors known to affect school effectiveness, such as truancy and teacher retention. As noted above, the groups also emphasized the importance of developing strong leaders.

PRINCIPLE 4: REDUCING DUPLICATION AND UNNECESSARY BURDEN

In considering differentiated measures of accountability, stakeholders asked for diligence in ensuring that duplicative and burdensome reporting requirements that have little or no impact on student outcomes be avoided. Although most supported the inclusion of a growth measure, some stakeholders did not want to see new measures added to the system because of the implied burden on LEAs. Most groups felt strongly that the ESEA flexibility request should leverage the two existing systems of performance (DCPS's School Scorecard and the PCSB's Performance Management Framework) while working to address parent calls for comparable data across the public school system. Additionally, as noted previously, there were concerns about developing non-academic measures and the potential burden on LEAs to develop new data collection and reporting strategies. Stakeholders asked that the DC OSSE data system be used to reduce the administrative burden on LEAs in capturing information for students who did not complete the formal transfer process but have transferred to other District of Columbia, Maryland, or Virginia schools.

Summary

Efforts to develop a high-quality and comprehensive ESEA flexibility request and ensure successful implementation once approved by the U.S. Department of Education (ED) necessitated an aggressive community and stakeholder engagement strategy. Outreach efforts led to energetic and creative discussions regarding all four principles. In developing the final application, the DC OSSE staff drew on this feedback to ensure that that the District of Columbia's education plan as articulated in this application included strategies that address the challenges identified by a wide array of stakeholders.

In general, parents and other community-based stakeholders expressed support for many of the proposed elements of the ESEA flexibility request while stressing the importance of continuing and regular communication between the DC OSSE and District of Columbia

stakeholders. Several stakeholders requested clear statements about objectives, outcomes, timelines, responsible agencies, and staff. Continuing communication and collaboration were seen as a precursor to establishing trust and partnership with stakeholders, who spoke of the struggle to maintain ties with a system that has been restructured more than once in a short period. There was a call for greater clarity regarding the DC OSSE's role in monitoring and enforcing the implementation of federal requirements at local schools.

Outreach efforts also reaffirmed or resulted in partnerships that will be nurtured beyond the submission of the ESEA flexibility request. This is in keeping with the DC OSSE's vision of an educational system that recognizes the vital role of parents and community members as partners in achieving excellent outcomes for all students. The ESEA flexibility request plan represents a fresh opportunity for parents, students, teachers, schools, the DC OSSE, LEAs, community and business groups, and other District stakeholders to work collaboratively to reassess, redefine, and redress existing barriers. That information now will be used to ensure that all components of the District of Columbia's education system, including standards, assessments, and accountability, are aligned so that the District of Columbia's public schools serve as pipelines for preparing internationally competitive college- and career-ready adults.

EVALUATION

The Department encourages an SEA that receives approval to implement the flexibility to collaborate with the Department to evaluate at least one program, practice, or strategy the SEA or its LEAs implement under principle 1, 2, or 3. Upon receipt of approval of the flexibility, an interested SEA will need to nominate for evaluation a program, practice, or strategy the SEA or its LEAs will implement under principles 1, 2, or 3. The Department will work with the SEA to determine the feasibility and design of the evaluation and, if it is determined to be feasible and appropriate, will fund and conduct the evaluation in partnership with the SEA, ensuring that the implementation of the chosen program, practice, or strategy is consistent with the evaluation design.

X Check here if you are interested in collaborating with the Department in this evaluation, if your request for the flexibility is approved.

OVERVIEW OF SEA'S REQUEST FOR THE ESEA FLEXIBILITY

Provide an overview (about 500 words) of the SEA's request for the flexibility that:

1. explains the SEA's comprehensive approach to implement the waivers and principles and describes the SEA's strategy to ensure this approach is coherent within and across the principles; and

2. describes how the implementation of the waivers and principles will enhance the SEA's and its LEAs' ability to increase the quality of instruction for students and improve student

achievement.

In 2001, the passage of No Child Left Behind (NCLB) was a watershed moment for education in the United States. For the first time, SEAs were required to develop standards and assessments to measure student proficiency, enforce a system of accountability for schools, measure performance based on subgroups of students, identify underperforming schools, and implement prescribed interventions in those underperforming schools.

While the core tenets of NCLB are still relevant and important, the "one size fits all" approach did not effectively meet the needs of students in such a diverse and complex educational landscape as is found in the District. To meet the law's key requirement of having all students proficient in English/Language Arts and mathematics by 2014, the DC OSSE set proficiency targets between 70 percent and 74 percent in 2011. Only 25 of 187 schools met AYP benchmarks in both English/Language Arts and math. Of those 25 schools, over half made AYP due to the safe harbor provision that gave credit to schools able to reduce by 10 percent the number of students not meeting proficiency targets. Current NCLB accountability requirements do not account for schools making great strides in student growth "below the bar" or for demonstrating progress in other indicators that measure college- and career-readiness—and that admissions officers and employers value. Moreover, the prescribed interventions have not resulted in significant improvement in student outcomes.

The DC OSSE respects and supports the original intent of the federal law and wants to build upon it so that the DC OSSE can more effectively measure school success. As with NCLB, the DC OSSE expects 100 percent of its students will reach proficiency in the CCSS. In the proposed new accountability system, the DC OSSE now also expects that 100 percent of the District of Columbia's students will show growth each year.

The DC OSSE Approach

The DC OSSE believes that students come first, and what matters most is what happens in the classroom. The DC OSSE also believes that the teachers and school leaders are best qualified to affect student learning. By removing barriers to education and providing the necessary support to maximize student learning, school leaders and teachers, who are best qualified to provide solutions, can improve student outcomes. That is the fundamental premise behind this proposed action plan.

Flexibility from certain provisions of the ESEA will revitalize this current accountability system and set higher standards and expectations for teaching and learning. The improved accountability system will be based on a system of classification that will allow the DC OSSE, LEAs, and other education partners to target rewards and support based on academic achievement and needs. This improved accountability system will focus on creating incentives for continuous and sustainable improvement and supporting LEAs and schools that need assistance. LEAs and schools will have the flexibility to use federal funds to tailor programs and interventions, thus ensuring greater success in teacher and leader effectiveness and

Updated June 8, 2012

student outcomes.

Recent Accomplishments

Over the last four years, the DC OSSE has demonstrated improvements in education and compliance with federal requirements. In several education areas, the DC OSSE has become a national leader in education in comparison to other states and urban centers. Last year, the District of Columbia led the nation in pre-kindergarten enrollment and ranked third nationally for child care center requirements and oversight. The District of Columbia also led the nation in providing school breakfast to children from low-income areas during the 2010–11 school year, increasing school breakfast participation for District public and charter school students by 35 percent and allowing Washington DC's national ranking to jump from 20th to 1st in one year.

The DC OSSE is the second SEA in the nation to align its English language arts (ELA) state assessments to college- and career-ready standards in its efforts to transition and implement the CCSS, with mathematics to be aligned in 2013. LEAs and schools will be able to tailor instruction and supports using student assessment results aligned to the CCSS.

Based on current improvements, the DC OSSE is seeking to exit federal High Risk status. Over the past year, the DC OSSE has worked diligently to resolve outstanding federal compliance issues. To date, the DC OSSE has addressed all 349 findings and has submitted the past three quarterly reports to the ED with zero open items.

Finally, the DC OSSE has made significant improvements in compliance with the Individuals with Disabilities Education Act (IDEA). While the District has historically been characterized by noncompliance with IDEA, since the creation of the DC OSSE, the District has demonstrated accelerated improvement in key areas of IDEA performance. In 2011, the DC OSSE was released from the Blackman portion of the long-standing Blackman Jones Consent Decree as a result of establishing a high-functioning State Hearing Office and meeting the numerical benchmark of 90 percent timely issuance of hearing officer determinations over 12 months.

In addition, the DC OSSE has made significant gains on key IDEA compliance indicators. Specifically, the DC OSSE is pleased to report the following current data trends:

- 94 percent timeliness rate for initial evaluations and placements;
- 89 percent timeliness rate for reevaluations; and
- 95 percent timeliness rate for transition from Part C to Part B.

These results are the product of the DC OSSE's efforts to implement a robust special education monitoring framework, create key IDEA policies and guidance, develop accurate special education data systems, and provide ongoing training and technical assistance to improve practice and outcomes for students with disabilities. To date, the DC OSSE has also met 100 percent of the 34 court-ordered metrics for transportation of students with disabilities.

The District of Columbia's Future Work

Politically, the District of Columbia is unique. Its size, education governance, and reform structures enable aggressive change at the state level that is able to reach individual schools, classrooms, and students with great speed and impact. Roughly 78,469 students attend just over 220 schools, with 90 percent of enrollment represented by 30 of the 54 LEAs that have committed to RTTT.

The implementation and sustainability of the principles required in the ESEA flexibility request are underway as part of RTTT. In June 2010, the District of Columbia adopted the CCSS. This year, the state assessment—the District of Columbia Comprehensive Assessment System (DC CAS)—will be aligned to the CCSS in ELA, with the mathematics assessment being aligned for the 2013 test administration. The DC OSSE is also providing RTTT funding to the DCPS in its school turnaround work, applying one of four turnaround models to the persistently lowest-achieving five percent of schools as well as the broader lowest-achieving 20 percent of schools. As part of the RTTT grant, the DC OSSE plans to increase SEA capacity and provide additional support to the lowest-achieving 20 percent of schools through a newly formed Innovation and Improvement team within the RTTT department.

This year, teacher and leader evaluation systems will also be implemented in RTTT-participating schools. To achieve this outcome, the DC OSSE worked in partnership with various task forces consisting of school representatives and 1) established statewide guidelines and requirements for teacher and leader evaluation systems for schools participating in RTTT, 2) adopted a teacher value-added model to identify levels of teacher effectiveness, and 3) developed an innovative statewide growth model currently being used by both charter and traditional public schools to compare schools' ability to improve student performance.

To increase the quality of instruction and improve student achievement under this ESEA flexibility request, the DC OSSE will concurrently establish a new set of statewide guidelines for LEA and school evaluation and a support system. The DC OSSE will build on the requirements already developed as part of RTTT to make sure all new evaluation systems meet federal standards. RTTT-participating schools with evaluation systems already underway will have an opportunity to strengthen them to meet the new statewide guidelines while non-RTTT schools can start anew.

At the same time, additional effort will be put into providing support, training, and technical assistance around job-embedded professional development and exemplars of best practice as well as aligning state assessments and teacher/leader evaluation systems with the CCSS. This work, described throughout this document will be carried out by the Division of Specialized Education Training and Technical Assistance unit within the Division of Specialized Education in coordination with the Department of Standards, Assessment and Accountability, which is part of the Division of Elementary and Secondary Education.

Pursuing ESEA flexibility is the right approach for education in the District of Columbia. Flexibility will provide the opportunity to increase proficiency, close achievement gaps, reward schools, and support LEAs and schools to assure continuous, sustainable improvement and improved student outcomes. The request for flexibility in certain ESEA provisions will free up both time and money so that school communities can focus on their unique needs and provide information to help parents make better school choices.

PRINCIPLE 1: COLLEGE- AND CAREER-READY EXPECTATIONS FOR ALL STUDENTS

1.A ADOPT COLLEGE- AND CAREER-READY STANDARDS

Select the option that pertains to the SEA and provide evidence corresponding to the option selected.

Option A	Option B
☒ The State has adopted college- and career-ready standards in at least reading /language arts and mathematics that are common to a significant number of States, consistent with part (1) of the definition of college- and career-ready standards. i. Attach evidence that the State has adopted the standards, consistent with the State's standards adoption process. (Attachment 4)	☐ The State has adopted college- and career-ready standards in at least reading/language arts and mathematics that have been approved and certified by a State network of institutions of higher education (IHEs), consistent with part (2) of the definition of college- and career-ready standards. i. Attach evidence that the State has adopted the standards, consistent with the State's standards adoption process. (Attachment 4) ii. Attach a copy of the memorandum of understanding or letter from a State network of IHEs certifying that students who meet these standards will not need remedial coursework at the post-secondary level. (Attachment 5)

1.B TRANSITION TO COLLEGE- AND CAREER-READY STANDARDS

Provide the SEA's plan to transition to and implement no later than the 2013–2014 school year college- and career-ready standards statewide in at least reading/language arts and mathematics for all students and schools and include an explanation of how this transition plan is likely to lead to all students, including English Learners, students with disabilities, and low-achieving students, gaining access to and learning content aligned with such standards. The Department encourages an SEA to include in its plan activities related to each of the italicized questions in the corresponding section of

the document titled *ESEA Flexibility Review Guidance*, or to explain why one or more of those activities is not necessary to its plan.

In 2010, the DC OSSE adopted CCSS and has subsequently expanded its efforts to align statewide assessments and create high quality professional development to assist in the transition of college- and career-ready standards in classroom instruction. This puts the DC OSSE is in a unique position to use the CCSS to launch the next level of reform for all students in the District of Columbia, both in traditional public schools and those served by public charter schools. This governance structure and the charter LEAs' autonomy create an opportunity for the District of Columbia to serve as a model of school choice while maintaining the quality and rigor of instruction that the CCSS demand.

The DC OSSE's ultimate goal for the adoption of the CCSS is a District-wide understanding on a deep, internalized, and instructional level that benefits all learners by preparing them to succeed in college and careers. This aligns with the DC OSSE's belief that students come first and what matters most is what is happening in the classroom. The DC OSSE has the great opportunity to have a positive, direct impact on all teachers through state-level support and professional development. Also, the District of Columbia's size allows it to comprehensively implement the standards sooner than most states and begin the alignment of the statewide assessment to the CCSS.

Already, students have reaped benefits from the District of Columbia's commitment to the CCSS implementation. By removing barriers and providing the necessary supports to teachers, including holding information and professional development sessions for instructional coaches and principals, students began receiving instruction aligned to the CCSS at the beginning of the 2011–12 school year, which will improve student outcomes now and in the future. At this point, the DC OSSE has adopted David Conley's definition of college- and career-readiness as "the level of preparation a student needs in order to enroll and succeed – without remediation – in a credit bearing course at a postsecondary institution that offers a baccalaureate degree or transfer to a baccalaureate program, or in a high-quality certificate program that enables students to enter a career pathway with potential future advancement."

Public engagement has been a crucial part of the entire CCSS adoption process. Stakeholders, including educators and national experts, were invited from the very beginning to review the standards and provide the DC OSSE with guidance on adoption. The DC State Board of Education held numerous public meetings, and several members attended Gates Foundation-sponsored CCSS study sessions with their National Association of State Boards of Education peers. LEA and school leaders were consulted on the implementation plan and transition to the assessment. At each decision point throughout the process, the DC OSSE turned to the District of Columbia's education community for input and guidance.

The DC OSSE's vision is to ensure all students graduate college- and career-ready. The CCSS focuses the District's efforts to realize that vision by better preparing all students to participate fully in today's global, Information Age economy.

The DC OSSE began the analysis of alignment starting in 2009, adopted college and career ready CCSS in 2010, and is now focused on ensuring effective transition of CCSS into classroom instruction.

Adoption Process

Directly after the National Governors Association's Center for Best Practices and Council of Chief State School Officers released the draft of college- and career-readiness standards on September 21, 2009, the District of Columbia proactively began the process of adopting the CCSS. Communication with stakeholders began immediately.

On October 1, 2009, the DC OSSE released a memo inviting public comment on both the ELA and mathematics standards. Two public surveys were designed and made available to stakeholders via the Internet, with a request for feedback by October 15, 2009. A joint public hearing of the DC State Board of Education and the DC OSSE was held on October 7, 2009 to elicit public comment from the community.

Soon after the initial period for public comment, a joint letter was issued from former State Superintendent Kerri Briggs and former State Board of Education President Lisa Raymond to Gene Wilhoit, Executive Director of Council of Chief State School Officers (CCSSO) on October 21, 2009, indicating the continued support of both the DC OSSE and the State Board of Education for the common standards.

Once the newly drafted standards for kindergarten through grade 12 were made available to SEAs in March 2010, the DC OSSE staff created a comprehensive crosswalk of the District of Columbia's existing content standards with the proposed draft standards. The crosswalk compared the alignment of the CCSS with the District of Columbia's current standards to identify content gaps. The DC OSSE staff brought in over 50 stakeholders to review the crosswalk and collect feedback. The stakeholders included school leaders, instructional coaches, educators (including science and social studies teachers), parents, members of the business community, higher education faculty, and elected officials. Several public meetings were held to discuss the new standards, the changes those standards would bring, and to gather feedback on whether the new standards should be adopted.

The combined feedback was used to propose the adoption of the CCSS to the State Board of Education, which it approved on July 21, 2010. Then the more difficult job of implementation began.

Implementation Plan

Since June 2011, support has been provided to educators and administrators through statewide professional development with a goal to assist them in moving to the CCSS. At the

same time, the DC OSSE has been conducting outreach to various stakeholders to solicit input on the process as well as the goals. Between the summer and the fall of last year, a number of activities have taken place, including the release of a blueprint that reinforces where District of Columbia's standards are strong and where new standards will strengthen the system and the administration of a survey identifying students' and educators' needs in terms of support and professional development.

Beginning with the 2012 state assessment system in English/Language Arts and composition, the DC CAS has been aligned to the CCSS. Mathematics instruction will transition to the CCSS in 2012–13. Currently, mathematics instruction focuses on priority standards—those current District of Columbia mathematics standards that will most prepare students to be successful in CCSS. These standards were identified in consultation with Student Achievement Partners and are indicated on the 2012 DC CAS mathematics blueprint published in June 2011. In conjunction with the priority standards, teachers are encouraged to incorporate the Standards for Mathematical Practice into instruction. These practices are also included on the 2012 DC CAS blueprint.

Following is a summary of the District of Columbia's plan for the adoption of the CCSS, as illustrated by a list of key milestones and the corresponding goals the DC OSSE aims to achieve. Please see the appendix for the detailed plan document:

- **Starting in June 2011—Statewide CCSS Professional Development**: Supports educators with instructional shifts required by the CCSS.
- **Starting in June 2011—Community Outreach**: Involves all stakeholders to have a voice and mutually benefit from the District of Columbia's goal and vision.
- **June 2011—DC CAS Aligned to Common Core—Blueprint Released:** Clarifies strength of the District of Columbia's standards and supports transition to new standards.
- **July 2011—Crosswalk English/Language Arts Standards to Special Education (SPED) Entry Points**: Assists SPED educators with transition and alignment of the District of Columbia's standards to the CCSS.
- **August 2011—Conduct Professional Development Needs Survey**: Identifies and documents student and educator needs.
- **August 2011—Distribute Printed CCSS in Mathematics and ELA**: Increases awareness of the CCSS to all stakeholders.
- **Starting in November 2011—Develop New Composition Prompts Aligned to the CCSS and Offer Professional Development on the Transition**: Aligns writing assessment to the CCSS and supports educators in transition to expectations of the CCSS.
- **Starting in February 2012—Review Graduation Requirements for Math**: Ensures the District of Columbia's students are prepared to be college- and career-ready.
- **Starting in February 2012—Publish Historical Writing Data**: Documents growth per AMOs.
- **Starting in February 2012—Conduct Gap Analysis**: Provides instructional and curricular feedback.
- **May 2012—Created State Team to Review Draft of Next Generation Science Standards**

(NGSS): Assessed current status of science to be able to provide educators with the best support to improve student learning.

- **June 2012—Create Transition Units in Math:** Supports educators in CCSS transition.
- **June 2012—Distribute PARCC/SBAC Technology Survey**: Assesses technology resources in preparation for PARCC assessment.
- **July 2012—Transition Special Education Data System (SEDS) to Align to the CCSS**: Supports SPED educators and ensures individualized education plan (IEP) goals are aligned with the CCSS.
- **July 2012—Analyze Composition Data and Provide Additional Professional Development**: Educators will be better prepared to teach writing; students will be prepared to meet college- and career-ready writing demands.
- **July 2012—Analyze Science Data**: Informs blueprint decisions and message to stakeholders.
- **July 2012—Engage Stakeholders on Science Blueprint Decisions:** Educators will understand the alignment of the assessment to science standards.
- **Starting in July 2012—Professional Development for Science**: Educators will receive tools to improve integrated science instruction.
- **Starting in July–August 2012—CCSS Interactive Website launched**: Creates a forum for District of Columbia-based Community of Learning around "real world" CCSS implementation.
- **Starting in July–August 2012—CCSS Assessment Item Development**: Integrates core knowledge of the CCSS into assessments.
- **July–August 2012—Common Core Parent Institute**: Increases awareness of the CCSS and alignment with home and school expectations.
- **July–August 2012—Summer Workshop for 21st Century Parents and After-School Providers**: Increases awareness of the CCSS and alignment with home, after-school, and school expectations.
- **June 2013—Include DC CAS composition in Accountability Plan**: By including composition, the District of Columbia will signal CCSS driven instructional shifts in writing, thereby encouraging high-caliber writing instruction.
- **July 2014—DC CAS Science included in Accountability Plan**: By including science, the DC OSSE will broaden the curriculum and promote scientific and critical thinking.

Timeline for Implementation

After the adoption of college- and career-ready standards, the DC OSSE collaborated with all LEAs to move toward implementation. In a joint decision by the DCPS and other charter LEAs, it was decided that the District of Columbia would target an aggressive implementation timeline, starting with the 2011–12 school year. Beginning in 2011–12, instruction has focused on the CCSS for all students, particularly for ELLs and students with disabilities in ELA and mathematics in grades K through 2. For grades 3 through 12, ELA instruction would focus on the CCSS with a transition to informational text and writing to a text.

This aggressive timeline for implementation is critical to student success in the District of

Columbia because it will begin to prepare them for the skills and knowledge required by the CCSS and lay the foundation for success on the PARCC assessment in 2014–15.

The timeline for DC CAS **alignment to the CCSS** appears in Table 1.B.i.

Table 1.B.i. Timeline for DC CAS Alignment to the CCSS

School Years	Instruction	Assessment
2011–12	K–12 Mathematics(aligned to the CCSS) K–12 ELA (aligned to the CCSS) K–12 Mathematics(DC Priority Standards)	English/Language Arts: 3–8, 10 Math: 3–8, 10—Priority Standards Composition: 4, 7, 10 *Optional Grades 2 and 9: English/Language Arts and Math*
2012–13	K–12 ELA (aligned to the CCSS) K–12 Mathematics (aligned to the CCSS)	English/Language Arts: 3–8, 10 Math: 3–8, 10 Composition: 4, 7, 10 *Optional Grades 2 and 9: English/Language Arts and Math*
2013–14	K–12 ELA (aligned to the CCSS) K–12 Mathematics (aligned to the CCSS)	English/Language Arts: 3–8, 10 Math: 3–8, 10 Composition: 4, 7, 10 *Optional Grades 2 and 9: English/Language Arts and Math*
2014–15	K–12 ELA (aligned to the CCSS) K–12 Mathematics (aligned to the CCSS)	PARCC Assessment

ESEA Flexibility Guidance Question - *Does the SEA propose to develop and disseminate high-quality instructional materials aligned with the new standards? If so, are the instructional materials designed (or will they be designed) to support the teaching and learning of all students, including English Learners, students with disabilities, and low-achieving students?*

The DC OSSE has begun developing and disseminating high quality instructional materials aligned to CCSS, primarily as part of its RTTT initiatives.

Each LEA develops its own curriculum with support and evaluation by the DC OSSE on a request basis only. This is primarily because the District's charter law (SRA) grants charter

schools exclusive control over their instructional methods. However, since September 2011, the DC OSSE has provided professional development and exemplar lessons as resources to inform curriculum development at the LEA level.

Additional information on effective teaching and learning along with high quality instructional materials is available as part of the Professional Learning Communities of Effectiveness (PLaCEs) grant through RTTT, which provides funds to LEAs on a competitive basis to develop exemplar lessons aligned to the CCSS. The Transforming Instruction through Lesson Study (TITLeS) project provides teachers with the opportunity to work with their peers across the District to develop expertise in delivering exceptional lessons based on the CCSS. This professional learning community has created an online library of 50 CCSS video lessons per grade in both mathematics and English/Language Arts for grades 3 through 9 to support every teacher in the adoption of the CCSS, regardless of participation in RTTT. To date, 350 videos have been created with another 40 videos to be completed by the end of the school year. Additionally, the DC OSSE will look to curate exemplar lessons already developed and used by other states.

ESEA Flexibility Guidance Question - *Does the SEA intend to conduct outreach on and dissemination of the college- and career-ready standards? If so, does the SEA's plan reach the appropriate stakeholders, including educators, administrators, families, and IHEs? Is it likely that the plan will result in all stakeholders increasing their awareness of the State's college- and career-ready standards?*

The DC OSSE has and continues to conduct outreach and dissemination of CCSS to reach various stakeholders and increase awareness of the college and career ready CCSS.

Outreach and Dissemination

Outreach to stakeholders was the first action step in the implementation process. Because the District of Columbia has varying governing structures, the DC OSSE knew that for implementation to be successful its outreach had to be wide and deep and that much guidance and direction would be needed. To do so, the DC OSSE is leveraging all partnerships to be sure stakeholders, especially parents and teachers, have a full understanding of the shifts to the CCSS so that students will receive the necessary skills.

As a governing state of PARCC, the District of Columbia is prepared to provide the necessary guidance and direction to assist LEAs in preparing students for success in college and in the workforce. Additionally, the DC OSSE's continuing partnerships with the University of the District of Columbia, Achieve, the American Diploma Project (ADP), the CCSSO, and the National Center and State Collaborative (NCSC) provide guidance and information to support this transition to the CCSS and assessments.

In addition to these partnerships, the DC OSSE has accomplished the following:

- The original crosswalk of the District of Columbia's standards to the CCSS was posted on the DC OSSE website for teachers to use in their instructional planning. The DC OSSE then invited teachers to complete this work using the Achieve online

tool and sent the analysis to a third party for the next iteration. The final version was reviewed and approved by selected teachers in the District of Columbia. This crosswalk was used to drive the blueprint for the 2012 DC CAS assessment.

- In June 2011, the 2012 DC CAS blueprint with the CCSS alignment was distributed to all LEAs and posted on the DC OSSE website.

- In August 2011, each teacher for mathematics and/or ELA in the District of Columbia received a printed copy of the standards. These standards were sent to each school site where each building leader distributed them to educators.

- The DC OSSE distributed printed PTA guides in English and Spanish to schools for each student to have a brochure introducing the CCSS to take home to parents. These were created for ELA and mathematics by grade and demonstrate to parents the importance of this shift and what they can expect in the classroom with the new standards.

- The DC OSSE held meetings for LEA leaders and educators to explain the shift to the CCSS and how this will translate in the classroom. These meetings discussed the changes to the assessment, changes in instruction, and what these changes look like in the classroom. Several experts spoke at these meetings, including David Coleman, one of the writers of the CCSS.

- Through RTTT, the DC OSSE created a Common Core Task Force with members representing over 20 of 30 participating LEAs. This task force helped to drive decision making around the implementation plan and became the CCSS experts for their LEAs to deliver updates and information. This Task Force was also asked to create a statewide message around the CCSS and to identify the shifts in instruction.

- The DC OSSE will be working with a contractor to create an interactive website with professional development units, sample test items aligned to the CCSS, information about the PARCC assessment, curriculum guidance, sample lesson plans, exemplar teaching units, student work, and teacher-created videos. A Request for Application (RFA) was submitted to the Office of Contracts and Procurement (OCP) for processing with the award tentatively scheduled to be determined by summer 2012. The DC OSSE will maintain control of this site to ensure high-quality materials aligned to the standards are posted.

- The DC OSSE sends out monthly newsletters and regular Twitter updates and has plans for future public meetings.

- The District of Columbia is currently planning an instructional and curriculum summit for summer 2012 that will further support teachers in understanding the

essential shifts in practice, curriculum, and assessment needed for full CCSS implementation. This summit will also bring together educators from all public schools to collaborate and share best practices for evaluating and developing curriculum and creating exemplar materials.

- The DC OSSE is collaborating with the University of the District of Columbia to examine the impact of the CCSS on K–12 instruction in preparation for PARCC. The goal is that students who graduate from an LEA in the District of Columbia are college- and career-ready and will not be required to enroll in developmental or remedial courses.

ESEA Flexibility Guidance Question - *Does the SEA intend to analyze the learning and accommodation factors necessary to ensure that students with disabilities will have the opportunity to achieve to the college- and career-ready standards? If so, will the results be used to support students with disabilities in accessing the college- and career-ready standards on the same schedule as all students?*

The DC OSSE has analyzed the learning and accommodation factors necessary to ensure students with disabilities have the opportunity to achieve CCSS including using results to facilitate accessibility at the same schedule as all students.

The DC OSSE realizes the challenges implementation of the CCSS will present to special populations of students. The CCSS are for all students and implementation requires making the standards accessible to all students.

To support students with disabilities, the DC OSSE is committed to high quality professional development of special education teachers. As part of the DC OSSE's CORE professional development series offered by the Training and Technical Assistance Division, the DC OSSE has engaged in a comprehensive professional development model to support access to the CCSS for students with disabilities and to ensure that instruction and assessment for this population is rigorous and relevant. Professional development work includes collaboration with nationally recognized experts on differentiation and curriculum mapping. In addition, the DC OSSE is using RTTT funds to conduct a special education quality review project, which will result in a self-assessment tool for schools and LEAs to use to assess their practices against key indicators of quality for special education practices and identify effective interventions to accelerate progress. Concurrently, the DC OSSE is updating its Special Education Data System (SEDS) to ensure that Individualized Education Plan (IEP) goals are aligned with the CCSS and are standards driven.

At the operational level, the DC OSSE will continue to implement a number of key strategies to help LEAs ensure that students with disabilities are well positioned for a successful post-secondary transition to career and college. The DC OSSE continues to conduct quarterly monitoring of secondary transition requirements as required by the ED's Office of Special Education Programs. The DC OSSE's review of a sample of 100 IEPs for required secondary transition content is followed by LEA notification of the findings of each review via written reports. These reports provide written notification to LEAs to correct identified

noncompliance as soon as possible and no later than one year from identification.

In collaboration with the Division of Elementary and Secondary Education, the Division of Specialized Education has created a comprehensive strategic core professional development plan to support teachers with the implementation of the CCSS. District of Columbia LEAs received professional development trainings on effective IEP goal writing using the CCSS, authentic performance tasks, differentiated instruction, common formative assessments, and response to intervention tiered instruction to transition students from the District of Columbia's standards-based curriculum and instruction to the new CCSS to ensure that all students' academic needs are addressed.

To support teachers and leaders, the DC OSSE provides comprehensive training programs and continuous support through leadership of a State Secondary Transition Community of Practice (SSTCoP). Specifically, the DC OSSE has implemented a cohort training model with a local institute of higher education, George Washington University, to provide turnkey training at a local high school through a series of sessions and workshops throughout the year. This work will be expanded upon in the coming year. Under the leadership of the Division of Specialized Education's Director of Training and Technical Assistance, the SSTCoP meets monthly to implement a state plan that ensures cross-system support for students with disabilities transitioning from high school into adulthood. In collaboration with the SSTCoP, the DC OSSE has built a dedicated state secondary transition webpage (http://www.DC OSSEsecondarytransition.org/) for the District of Columbia where it publishes key information and tools for all education stakeholders, including parents and students.

The DC OSSE continues to strengthen partnerships with the Department on Disability Services and in particular the Rehabilitative Services Administration as it implements its agreement on shared obligations related to supporting the successful transition of secondary students with disabilities.

Finally, the DC OSSE's successful enhancement of the statewide special education data system, SEDS, in October 2011 included key updates to its secondary transition section. These updates encourage best practices, improve compliance, and support better student outcomes.

ESEA Flexibility Guidance Question - *Does the SEA intend to analyze the factors that need to be addressed in preparing teachers of students with disabilities participating in a State's alternate assessment based on modified academic achievement standards (AA-MAAS) in order to ensure these students can participate in the assessments that will be aligned with college and career-ready standards?*

The DC OSSE has and will continue to analyze the factors needing to be addressed to prepare teachers of students with disabilities participating in the alternate assessment with the goal of successfully preparing these students for participation in assessments aligned to CCSS.

For special education students in the 1 percent group (students taking the DC CAS Alternate test), it is most important that current entry points are aligned to the CCSS so that teachers can differentiate instruction according to an individual student's starting point and allow

students to set challenging but achievable academic goals. These entry points are used to guide the evidence-based portfolio assessment the DC OSSE uses for these students. The DC OSSE has currently aligned the DC CAS Alt Entry Points to the CCSS for ELA in preparation for this year's administration.

The DC OSSE has joined the assessment consortium with the NCSC and is a member of the Workgroup One Community of Practice. Through this partnership, the DC OSSE will continue to develop performance-level descriptors, claims, focal knowledge, skills, and abilities for mathematics to provide information and guidance about the CCSS. The goal of NCSC is to ensure that students with significant cognitive disabilities achieve higher academic outcomes to prepare them for post-secondary options. The DC OSSE believes in this goal and is excited to be involved with this work.

Once New Century Learning Consortiums (NCLC) releases the Learning Progressions, the DC OSSE will work to adopt these progressions; it also plans to facilitate teacher and educator professional development that will show IEP teams how to link curriculum and intervention resources to ensure standards progression throughout the school year for all students. Additionally, through this consortium, the DC OSSE is examining how the definition of college- and career-readiness applies to special-needs populations.

The District of Columbia currently has a Learning Progressions Community of Practice (LPCoP) consisting of approximately 20 individuals. They include general and special education teachers as well as technical assistance providers to ensure that curricular, instructional, and professional development modules developed by NCSC are practical and feasible. The LPCoP receives training on the CCSS, the relationship between content and achievement standards, curriculum, assessment, and universal access to the general curriculum. The LPCoP will implement model curricula and help to refine and clarify materials and resources.

Finally, SEDS will be upgraded to align with the CCSS and Learning Progressions. SEDS will contain a drop-down menu listing the CCSS to inform IEP writers. This functionality will allow educators to use the database to track IDEA compliance, develop IEP goals aligned with the CCSS, and monitor student progress toward those goals. The DC OSSE will provide training and support to all LEAs throughout this process, with this system ready for the 2012–13 school year.

ESEA Flexibility Guidance Question - *Does the SEA intend to analyze the linguistic demands of the State's college- and career-ready standards to inform the development of ELP standards corresponding to the college- and career-ready standards and to ensure that English Learners will have the opportunity to achieve to the college- and career-ready standards? If so, will the results be used to inform revision of the ELP standards and support English Learners in accessing the college- and career-ready standards on the same schedule as all students?*

The DC OSSE has and will continue to analyze the linguistic demands of CCSS to inform the development of English Language Proficiency standards, including the use of results to inform revisions and instruction so that English Learners can access CCSS on the same schedule as all students.

For ELLs, the DC OSSE has signed a Memorandum of Understanding with World-Class Instructional Design and Assessment (WIDA) to align the current language acquisition standards and assessment with the CCSS. The DC OSSE convened a group of school leaders to discuss ESEA flexibility and provide input on the proposed application, AMOs, and interventions as well as how to best support dual-language programs.

The District of Columbia also participates in the Assessment Services Supporting ELLs through Technology System (ASSETS) consortium, a four-year project launched earlier this year to build a comprehensive and balanced technology-based assessment system for ELLs. The assessment system will be anchored in WIDA's English Language Proficiency (ELP) standards, which are aligned with the CCSS, informed by current and ongoing research, and supported by comprehensive professional development.

The system will include a computer-based language proficiency test, screener, benchmark assessment, and formative resources to support teachers in implementing data-driven instruction for ELLs. The consortium will build on the foundation of standards, assessment, professional development, and research already developed by the managing partner, WIDA, to ensure that tools help ELLs succeed in becoming college- and career-ready. The consortium also assists in the development of online summative, benchmark, and screener assessments in addition to formative assessment resources for use in the classroom.

For ELL teachers to transition successfully into teaching the CCSS, they must understand the correlation between academic standards and English language development (ELD) standards. The District of Columbia teachers are currently using the 2012 Edition of the WIDA ELD standards, which is heavily influenced by the CCSS. Being a part of the WIDA Consortium gives teachers access to these new ELD standards, resource guides, online training, and support in synchronizing developing students' English language skills with their academic achievement.

Student performance data has shown that ELLs have demonstrated the most growth across the District of Columbia. The DC OSSE will look to those successes to continue the growth in ELL performance and will bring together leaders in the ELL community to evaluate how to meet the needs of the District of Columbia's ELL population while meeting the expectations of the CCSS. The District of Columbia will continue to provide professional development on ELD standards, language differentiation during content instruction and assessment, and ways to effectively use assessment results to increase student achievement.

Several professional development sessions are planned for summer 2012 for ELL educators. The Specially Designed Academic Instruction in English (SDAIE), for example, is a hands-on, practical course that focuses on strategies for making content area instruction comprehensible and meaningful for ELLs in grades 2 through 12. Strategies that participants will learn include cooperative learning, adapting text for ELLs, building on prior knowledge, offering multiple ways to engage, providing comprehensible input, and making a home/school connection. This training will also be provided with a focus on early childhood for grades pre-kindergarten through first.

The DC OSSE continues to provide ongoing professional development for teachers, allowing them to obtain continuing education graduate credits, meet English as a Second Language (ESL) licensure and certification requirements, take advantage of the District of Columbia's free Special Education Praxis preparation materials, and build their capacities to meet the needs of diverse learners.

ESEA Flexibility Guidance Question - *Does the SEA plan to evaluate its current assessments and increase the rigor of those assessments and their alignment with the State's college- and career-ready standards, in order to better prepare students and teachers for the new assessments. If so, is this activity likely to result in an increase in the rigor of the State's current assessments and their alignment with college- and career-ready standards?*

The DC OSSE has and continues to evaluate its current assessments. In an effort to prepare students for the new PARCC assessments, the DC OSSE began the alignment of assessments to CCSS with English/Language Arts and Composition for the 2012 statewide assessment. The mathematics statewide assessment will be aligned to CCSS in 2013.

Preparing for the Next Generation of Assessments

District of Columbia educators decided to transition the statewide assessment to align to the CCSS as the best way to signal to the field the shifts in instruction. Starting in the summer of 2010, the DC OSSE worked with its test contractor to modify the current DC CAS. All field test items on the 2011 DC CAS were aligned to the CCSS, and in 2012, all items on the DC CAS English/Language Arts were aligned to the CCSS with a shift in the blueprint to include more informational text. District of Columbia educators also felt this would be the best training for its schools, educators, and students in preparation for the shift to the PARCC assessment to begin instruction in the CCSS as quickly as possible and give students a head start on success.

This will alert the field to the text complexity and genre selections found in the CCSS. The swift incorporation was possible because of the close alignment the DC OSSE found in the initial mapping of the District of Columbia's standards to the CCSS and the CCSS to the District of Columbia-owned English/Language Arts items. The 2012 DC CAS mathematics focused on priority standards to better prepare students for the transition to the mathematics CCSS in 2012–13. These mathematics standards were identified as the critical skills and knowledge students need to know to succeed on the CCSS and represent one or two essential skill sets in each grade for teachers to focus their instruction.

In addition, the DC OSSE will field test/operationalize new composition prompts that are aligned to the CCSS and focus on the essential skill of writing in response to a text. This is an answer to the indications in the PARCC Invitation to Negotiate (ITN) that demonstrates writing to a text will be crucial for students to be successful on the assessment and to address the shift from the old writing standards to the new standards.

Both the English/Language Arts and the composition DC CAS results will report on the CCSS by student, school, LEA, and state levels to give schools, educators, students, and parents an indication of how students are performing on the CCSS. The DC OSSE worked with its Technical Advisory Council, consisting of local and national experts in the field of

assessments, and test vendor to ensure that this transition maintains the achievement standards and does not disrupt trend lines in achievement. A cut score review will be conducted in the fall to ensure alignment.

The District's transition to a fully aligned DC CAS mathematics assessment to the CCSS will begin in 2012–13. Within the Department of Standards, Assessment and Accountability, the DC OSSE has formed an Assessment Task Force consisting of teachers, assessment coordinators, and other stakeholders to guide the development of the mathematics assessments and to address any instructional gaps. This allows the District of Columbia the best opportunity to have all students exposed to and instructed in the CCSS in preparation for the PARCC assessment in 2014–15.

The District of Columbia is one of the original governing states of PARCC and has been involved with the work from the beginning. Today, the DC OSSE is leading the work with 17 other states to develop and design the next generation of assessments aligned to the CCSS. The DC OSSE is a member of the Governing Board, Leadership Team, and Higher Education Leadership Team, and it serves as the chair for the Common Core Implementation and Educator Engagement working group. It also has representation on the PARCC Advisory Committee on College Readiness. The District of Columbia has attended design meetings, Common Core Implementation Institutes, and all other multistate meetings.

Currently, the District of Columbia is using the Model Content Frameworks to guide LEAs through their creation of curriculum plans aligned to the new standards and will take a team to participate in the Educator Leader Cadres preparatory meetings to develop experts in the field. The DC OSSE is actively involved in all decision making and reviews. Being a governing state allows the District of Columbia to lead the nation in this reform and to inform stakeholders on the coming shifts through extensive work with the CCSS and the goals of the new assessment. This gives the District a clear advantage in preparing schools, educators, and students for the next generation of assessments that will measure college- and career-readiness.

Increased Rigor

As the CCSS are more rigorous than the District of Columbia's previous standards, the DC OSSE recognizes the need to find ways to immediately increase the rigor of instruction in the classroom for successful implementation of the CCSS. The District is currently working in collaboration with the State Board of Education to review and revise graduation requirements to include more focus on college- and career-readiness. Also, a bill was recently passed and funded by the City Council that will require all students to take either the SAT or ACT and apply to college as part of the graduation requirements.

Through this application, the DC OSSE is reviewing its reporting requirements and plans to include Advanced Placement and International Baccalaureate participation and proficiency, grade point average, dual enrollment, ACT and SAT participation and performance, and other indicators of college- and career-readiness. Through the State Longitudinal Data System, the

DC OSSE also is beginning to collect data on post-secondary acceptance, attendance, and graduation. All these data points work together to signal to students, teachers, and parents the shift to more rigor in the classroom.

This public reporting will show the continuum of readiness across years and will indicate to schools, parents, and students the progress toward college- and career-readiness while allowing adjustments to be made along the way to ensure success for all students. The DC OSSE's continued partnership with DCPS, charter LEAs, the PCSB, and several advocacy groups will continue to push the level of rigor in all classrooms for all students. Through these partnerships, the DC OSSE can align its expectations for college- and career-readiness, work to promote higher-level courses, and share data to gauge student performance.

Other Assessments: Composition and Science

The composition assessment in 2013 will be included in the accountability plan detailed in Principle 2. This is a crucial step to signal to educators and families the importance of students being able to write to a text. This is a major instructional shift found in the standards and one where data suggest school leaders, teachers, and students will need additional support. The DC OSSE first shared this information in June 2011 as part of the initial outreach to introduce school leaders to the CCSS and the shifts in instruction and assessments.

Over the summer, a panel of teachers reviewed and approved the prompts through content and bias review. In October 2011, the DC OSSE held an initial training for LEAs to explain the shift, describe the new rubric, and release a sample prompt. Additional training and outreach took place at the start of 2012. Once the DC OSSE receives the results of the 2012 assessments, results will be analyzed and used to guide more professional development for the 2012–13 school year.

The District of Columbia's science standards were recently awarded an "A" by the Fordham Institute. Despite the high ranking on statewide science standards, an overwhelming number of students are not proficient. Based on 2011 National Assessment of Educational Progress (NAEP) science assessment, only 8% of students were proficient. For this reason, and in response to requests from parents, teachers, and other education stakeholders to increase the number of subjects included in the accountability plan, the DC OSSE will include a DC CAS science assessment beginning in 2014 as detailed in Principle 2.

The staggered timeline to include composition and science in our new accountability framework will allow more educators to be involved with blueprint development, item review, and data analysis. This also will create a positive transition plan for including new subjects while supporting schools and educators through the transition.

Table 1.B.ii is a timeline for **inclusion of assessments** to accountability framework.

Table 1.B.ii: Timeline for Inclusion of Assessments

School Years	Instruction	Assessment
2011–12	K–12 Mathematics (aligned to the CCSS) K–12 ELA (aligned to the CCSS) K–12 Mathematics (DC Priority Standards) K–12 DC Science Standards	English/Language Arts: 3–8, 10 Math: 3–8, 10—Priority standards Composition: 4, 7, 10—Field test Science: 5, 8, and biology—Not included in accountability *Optional Grades 2 and 9: English/Language Arts and Math*
2012–13	K–12 ELA (aligned to the CCSS) K–12 Mathematics (aligned to the CCSS) K–12 DC Science Standards	English/Language Arts: 3–8, 10 Math: 3–8, 10 Composition: 4, 7, 10—Included in accountability Science: 5, 8, and biology—Not included in accountability *Optional Grades 2 and 9: English/Language Arts and Math*
2013–14	K–12 ELA (aligned to the CCSS) K–12 Mathematics (aligned to the CCSS) K–12 DC Science Standards	English/Language Arts: 3–8, 10 Math: 3–8, 10 Composition: 4, 7, 10 Science: 5, 8, and biology—Included in accountability *Optional Grades 2 and 9: English/Language Arts and Math*
2014–15	K–12 ELA (aligned to the CCSS) K–12 Mathematics (aligned to the CCSS) K–12 NGSS	PARCC Assessment

As with all other assessment development, educators will approve field test items through content and bias review; the DC OSSE will provide a strand-level blueprint to support schools and teachers in preparing students for the assessment. This will also signal to the field the

Updated June 8, 2012

importance of science and give the DC OSSE an opportunity to begin the discussions on the NGSS expected to be completed this summer.

For the first time in 2012, the DC OSSE administered the DC CAS assessments in English/Language Arts and mathematics for grade 2 and English/Language Arts for grade 9 aligned to the CCSS. Originally, these second and ninth grade assessments were only for the DCPS, the District of Columbia's largest LEA. However, after several charter LEAs also requested the assessments, the DC OSSE assumed the DCPS's test contract and made the assessment available for no charge to charter LEAs as an option.

At this time, the DC OSSE does not plan to require these second and ninth grade assessments or to use the data at the statewide accountability level. However, that decision may change depending on input from stakeholders and the need for inclusion in the accountability framework. The benefit to offering these assessments is that it gives LEAs another data point to determine whether students are on track to succeed. The second and ninth grade assessments give LEAs an early indicator of students' achievement and instructional competencies aligned to the CCSS.

Through RTTT, participating LEAs have agreed to adopt interim assessments aligned with the CCSS in all schools. All other LEAs are encouraged to follow the same practice. The DC OSSE assists LEAs in choosing quality vendors by providing an "Interim Assessment Provider List." LEAs adopting paced-interim assessments have developed a supportive professional development plan designed to build teacher capacity around using student data to drive instruction.

To ensure consistent improvement, each LEA works with its vendor to collect data in a timely manner so the information can be analyzed during professional development to enhance teacher practice and inform future instruction. As the DC OSSE moves closer to the PARCC assessment, its goal is to have a robust DC CAS item pool aligned to the CCSS for LEAs to use as part of the interim assessment system.

ESEA Flexibility Guidance Question - *Does the SEA intend to provide professional development and other supports to prepare teachers to teach all students, including English Learners, students with disabilities, and low-achieving students, to the new standards? If so, will the planned professional development and supports prepare teachers to teach to the new standards, use instructional materials aligned with those standards, and use data on multiple measures of student performance (e.g., data from formative, benchmark, and summative assessments) to inform instruction?*

ESEA Flexibility Guidance Question - *Does the SEA intend to provide professional development and supports to prepare principals to provide strong, supportive instructional leadership based on the new standards? If so, will this plan prepare principals to do so?*

Supporting Educators

To promote the overall goal of statewide understanding of the CCSS and to ensure successful implementation, the DC OSSE is providing ongoing state-level training to LEA staff in the areas of ELA, math, pedagogy, and assessment. The professional development will be

provided for both educators and school leaders and will disseminate the state-level message as well as assist those LEAs with greater needs around curriculum planning. Lead authors of the CCSS have identified six instructional shifts in both ELA and math. The ELA shifts include balancing nonfiction and fiction text, building knowledge in the disciplines, and increasing text complexity with grade advancement, text-based answers, writing from sources, and academic vocabulary. Mathematics instructional shifts include focus, coherence, fluency, deep understanding, applications, and dual intensity of practicing and understanding.

The DC OSSE will provide schools with a specified level of professional development based on how they are classified, as detailed in Principles 2 and 3. For example, to ensure the District of Columbia meets the needs of teachers in the lowest-performing schools or teachers who are not rated effective or highly effective, preference will be given to them to attend live professional development sessions that fill up quickly. The DC OSSE will also be available to provide more on-site trainings at focus and priority schools. For educators and school leaders in other school categories, the DC OSSE will make available more webinars and online tools and will focus in-person trainings on specialized topics.

Rather than offer professional development that simply makes educators and school leaders familiar with a set of standards, the trainings the DC OSSE offers are delivered through the lens of the instructional shifts, thus promoting and supporting a deep and internalized understanding of the new standards' teaching and learning principles. This approach allows teachers and school leaders to become familiar with the CCSS, compare former District of Columbia standards to the CCSS, and develop an understanding of how teaching, learning, and instructional materials will need to evolve to meet the demand of the new standards' increased rigor.

Two specific examples of trainings the DC OSSE offers through the Department of Standards, Assessment and Accountability to teachers and administrators addressing these instructional shifts include *Instructional Routines for Effective Small Group Instruction and Intervention* and *Authentic Performance Tasks*.

The *Instructional Routines for Effective Small Group Instruction and Intervention* training is designed to support teachers across the District of Columbia, where approximately 55 percent of students (elementary and secondary) are scoring below proficient in English/Language Arts. Based on the "gradual release of responsibility" model (Pearson & Gallagher, 1983) and targeted to address specific English/Language Arts needs (comprehension, fluency, phonics, vocabulary), the training aims to teach participants six explicit and systematic instructional routines. These routines provide precise teaching moves to accelerate students' learning and boost their ability to understand complex text.

The *Authentic Performance Tasks* training answers the call for building knowledge in the disciplines so that students develop deep understanding of text through intense practice and providing text-based answers. Having a collection of motivating, authentic performance assessments with corresponding tasks and rubrics aligned to the CCSS across grade levels and content areas is a key strategy to differentiate instruction. Using these tools effectively also

will motivate students, increase achievement, and save teachers' time. The seminar provides step-by-step procedures that will help educators make differentiated instruction happen in the classroom.

Specifically, to address and promote school leadership for implementation of the CCSS, the DC OSSE is offering a weeklong Summer Leadership Institute open to all schools willing to commit to a year-long, classroom based lesson study of CCSS implementation. The DC OSSE is collaborating with Achieve, the project management partner for PARCC, for additional support for principals, and principals, assistant principals, and others will participate in the Educator Leader Cadres.

To effectively implement the CCSS for mathematics, the DC OSSE will concentrate on addressing the instructional shifts between the District of Columbia's standards and the CCSS while incorporating the Standards for Mathematical Practice. In 2011, the DC OSSE conducted a crosswalk comparing the District of Columbia's standards and the CCSS. This analysis revealed major areas of difference, and those shifts are now driving the effort to tailor instruction aligned to the CCSS that ultimately will move student achievement upward.

The DC OSSE will provide opportunities for all LEAs to build their instructional capacity through various mediums, such as trainings, accessing videos that model exemplar lessons on the DC OSSE's Common Core website, reviewing exemplar tasks and lessons specifically aligned to the CCSS-M, and examining sample assessment items that provide students with consistent exposure to higher-level questions expected in instruction and parallels what will be seen on PARCC.

As part of the DC OSSE's commitment to continuous and sustainable improvement, participant feedback is solicited and analyzed after each professional development session. The feedback is, and will continue to be, used to inform both stakeholder understanding and future professional development sessions.

For the District of Columbia to be successful in improving student achievement, LEAs must be integrally involved in supporting teachers and school leaders as they bring the CCSS to the classroom. Through RTTT, each LEA created an implementation plan to include professional development, curriculum alignment, program evaluation, and analysis of quality material that was reviewed and approved by the Common Core Task Force. Each year, LEAs must revisit and revise their implementation plan and include in their statement of work how they will support the transition to the CCSS.

The 2011 PLaCEs grant supported a consortium of RTTT-participating charter LEAs and DCPS schools in developing a professional learning community that has created an online library of 50 CCSS video lessons per grade in both mathematics and English/Language Arts for grades 3 through 9 to support every teacher in the adoption of the CCSS, regardless of participation in RTTT. To date, 350 videos have been created with another 40 videos to be completed by the end of the school year. The consortium uses the internationally recognized technique of lesson study: a collaborative approach in which teachers develop pedagogical content

knowledge to research, evaluate, and refine the teaching of the CCSS. The consortium's lesson study teams are creating and refining exemplar lessons to add to the video lesson library. In an embedded "each one, teach one" approach, the consortium's first cohort of 12 schools will mentor a set of schools in year one that will become the consortium's second cohort in year two.

As a governing state of PARCC, the District of Columbia will make available all resources provided by the consortium, including, but not limited to, the principle of Universal Design for Learning. Currently, the District of Columbia serves as the chair for the Common Core Implementation and Educator Engagement working group. This group was integral in releasing the PARCC Model Content Frameworks and creation of Educator Leader Cadres. The District has disseminated the Model Content Frameworks and invited educators to take part in informational webinars.

The DC OSSE will also participate in the Educator Leader Cadres with members from both the DCPS and the charter schools to build expertise in the field by assembling a cohort of dedicated District of Columbia Educators to join the DC PARCC Educator Leader Cadre. These select individuals are experts in ELA and/or mathematics and will serve all of DC in leading the implementation of the Common Core State Standards. Cadre members will engage in professional development with other educators, from participating PARCC states. Through face-to-face meetings and virtual convening, the educator leaders will share best practices regarding implementation and use of PARCC materials, engage in reviewing PARCC and PARCC state developed instructional materials, and become active leaders in state and local implementation efforts. This work will be aligned with the District of Columbia's implementation plans and is expected to continue and grow through 2014-2015 and beyond.

A gap analysis conducted by an independent assessment contractor will also determine areas of improvement and/or need as determined by DC CAS scores and the grade correlation between the District of Columbia's current standards and the CCSS. This analysis will be completed by August 2012. Transition units will also be developed to help LEAs improve their instruction to the CCSS.

ESEA Flexibility Guidance Question – *Does the SEA intend to work with the State's IHEs and other teacher and principal preparation programs to better prepare: 1) incoming teachers to teach all students, including English Learners, students with disabilities, and low-achieving students, to the new college- and career-ready standards; and 2) incoming principals to provide strong, supportive instructional leadership on teaching to the new standards? If so, will the implementation of the plan likely improve the preparation of incoming teachers and principals?*

Through partnerships with the University of the District of Columbia (UDC), the DC OSSE is actively addressing teacher preparation courses focusing on the CCSS. Specifically, mathematics and ELA courses will be designed to give aspiring teachers greater exposure and interaction with the CCSS with considerations for all student populations, including English language learners and students with disabilities. The DC OSSE collectively recognizes that to have successful students who are ready for college and careers, it must have teachers who are more than capable to prepare them. The DC OSSE and UDC are looking at ways that the

Updated June 8, 2012

CCSS can be infused into teacher preparation courses so that aspiring educators are competent and confident about implementing them in their daily instruction.

The DC OSSE will explore how teacher licensure criteria will change based on the CCSS, especially in the area of literacy. Because of the literacy standards for science, social studies, and other technical subjects in grades 6 through 12, the DC OSSE must determine whether all teachers in those subjects would be required to have some type of formal literacy training, since teachers in those subjects would also be teachers of English/Language Arts and writing skills. In addition, the DC OSSE will tailor professional development based on school designation described in Principle 2 and the tiered teacher effectiveness plan in Principle 3 to meet the needs of all teachers. The DC OSSE will provide guidance on how teacher effectiveness plans can be aligned to the CCSS.

Through partnerships with research institutions of higher education, the DC OSSE will address continuous teacher and principal improvement and development across all aspects of instruction related to the CCSS and educational leadership. Leader Preparation Report Cards will be developed and implemented through The DC OSSE's RTTT project to identify principal and school leadership professional development needs and develop aligned, relevant and timely professional development aligned to the CCSS. Combined with the DC OSSE's licensure process with state-approved programs , these efforts will serve as venues for leadership collaboration and capacity building to increase academic rigor for all students through the CCSS.

ESEA Flexibility Guidance Question - *Does the SEA plan to expand access to college-level courses or their prerequisites, dual enrollment courses, or accelerated learning opportunities? If so, will this plan lead to more students having access to courses that prepare them for college and a career?*

Currently, the DC OSSE is reviewing the graduation requirements in partnership with the State Board of Education to explore dual enrollment and competency-based opportunities for students.

In addition, the DC OSSE's Postsecondary Division in collaboration with the Division of Elementary and Secondary Education is developing regulations to guide dual enrollment course offerings throughout the District. A dual enrollment program enables high school students to enroll in approved college courses, taken on a college campus, and to simultaneously earn high school and college credit. Dual enrollment allows students to experience the college environment, the academic rigor of college courses, and allows them to better understand what is required of them to succeed in college. Dual enrollment course opportunities also increase students' engagement by giving them access to more academic courses and incentivize their pursuit of postsecondary enrollment by reducing the time to complete a postsecondary degree. Finally, dual enrollment provides an opportunity for high schools and postsecondary institutions to collaboratively strengthen their institutional and curricular partnerships.

The DC OSSE is on track to submit Proposed Regulations by September 2012, and submit the

Final Regulations, Guidance, and FAQs by October 1, 2012. The DC OSSE has been collaborating closely with both DCPS and the PCSB on the regulations. All LEAs interested in offering dual enrollment opportunities to their students will begin collaborating with the District's postsecondary institutions shortly thereafter to create Dual Enrollment Partnership Agreements. If funds are available, the DC OSSE will support a financial aid and college preparation boot camp program for dual enrollment students with the first boot camp program by January 2013.

The DC OSSE provides access to rigorous career preparation for DC high school students through the Office of Career and Technical Education. This office provides guidance and funding to DCPS and other local education agencies, including charter schools, in support of high quality career and technical education. Using both local and federal funding streams, the Office supports programs in 16 career clusters representing high skill/ high wage employment opportunities, particularly in STEM fields.

Located in 20 of the 32 District high schools, these programs reach over 5000 students annually. With guidance from the DC OSSE, these high schools offer a sequence of career and technical education courses that combine rigorous academics and advanced technical knowledge. The course sequences are organized around industry-based standards, assessments, and curricula. In addition the courses provide high school students with the opportunity to participate in internships, gain early college credit though dual enrollment, and earn certificates or industry-recognized credentials. Examples of successful programs include whole-school reform initiatives such as the six high schools involved in Project Lead the Way and the two high schools involved in High Schools that Work.

Other notable programs include STEM-based programs such as the pre-engineering programs at Cardozo and Dunbar Senior High Schools, and the science and technology programs at Wilson and McKinley. The DC OSSE also supports the Microsoft Academy at Woodson High School, an intensive information technology program, and Prime Movers Media, a rigorous multi-media journalism program operating in seven schools across the District. Through these programs, the DC OSSE's Office of Career and Technical Education is exposing District of Columbia high school students to diverse career pathways and increasing their opportunities for educational and career success.

Summary

The District of Columbia's size and proximity makes it nimble, which provides a great advantage in the implementation of the CCSS and transition to aligned assessments. From the very start of the process, there has been stakeholder buy-in, support, and a desire for an aggressive time frame for implementation. This timeline will allow the District of Columbia to get a head start in providing schools and educators the necessary resources and support so that the standards can be implemented with fidelity by 2014–15. This will give students the best opportunity to show success through the PARCC assessment and to demonstrate

college- and career-readiness.

PRINCIPLE 2: STATE-DEVELOPED DIFFERENTIATED RECOGNITION, ACCOUNTABILITY, AND SUPPORT

2.A DEVELOP AND IMPLEMENT A STATE-BASED SYSTEM OF DIFFERENTIATED RECOGNITION, ACCOUNTABILITY, AND SUPPORT

2.A.i   Provide a description of the SEA's differentiated recognition, accountability, and support system that includes all the components listed in Principle 2, the SEA's plan for implementation of the differentiated recognition, accountability, and support system no later than the 2012–2013 school year, and an explanation of how the SEA's differentiated recognition, accountability, and support system is designed to improve student achievement and school performance, close achievement gaps, and increase the quality of instruction for students.

ESEA Flexibility Guidance Question - *Does the SEA's accountability system provide differentiated recognition, accountability, and support for all LEAs in the State and for all Title I schools in those LEAs based on (1) student achievement in reading/language arts and mathematics, and other subjects at the State's discretion, for all students and all subgroups of students identified in ESEA section 1111(b)(2)(C)(v)(II); (2) graduation rates for all students and all subgroups; and (3) school performance and progress over time, including the performance and progress of all subgroups?*

The District of Columbia application for flexibility is a system of school recognition, accountability and support based interventions focusing on student growth and enhanced achievement. As such our proposal establishes clear expectations leveraging a wide array of District resources. This proposal capitalizes on the distinct functions within our system differentiating the DC OSSE's role as State Education Agency, the Public Charter School functions and school functions, with one geographical traditional LEA and 53 charter schools. This model also relies upon in-depth and accurate data collection to support decisions targeted at student achievement and growth including identified subgroups, and accountability and support to schools and education professionals.

In the past few years, LEAs have spent considerable time designing and publishing frameworks for school evaluations. The PCSB has created the Performance Management Framework (PMF), and the DCPS has adopted the School Scorecard system. Both unveiled recently, the systems provide valuable insight with an array of comparable data points for the evaluation of school effectiveness on student learning.

Educators and professionals in schools are in the best position to identify and respond to student needs, and thus the DC OSSE is committed to the autonomous school bargain, which provides LEAs with autonomy in exchange for accountability for student achievement results for all students and subgroups. Our ESEA waiver request extends this philosophy aimed at improved student achievement.

Through the implementation of the new accountability framework, the DC OSSE expects to see a number of educational improvements. During the 2010–11 school year, 45 percent of District

of Columbia students were proficient in English/Language Arts and 47 percent tested proficient in math. Under the ESEA flexibility request, proficiency rates are expected to improve statewide to 73 percent in English/Language Arts and 74 percent in mathematics by 2017. Additionally, the DC OSSE expects to see graduation rates improve substantially. For the 2010–11 school year, the cohort graduation rate is 59 percent. The goal is to have a graduation rate of 85 percent. The District seeks to achieve this goal by reducing the number of non-graduates by 10 percent each year.

Commitment to Educational Excellence

The District of Columbia has made tremendous efforts to drive academic achievement in schools through policy changes and support. These efforts include a commitment to charter schools, mayoral control, a focus on providing universal high-quality early childhood education, rigorous programs enacted under RTTT, and a strong tradition of school choice.

In 2007 the District revamped its educational system with the passage of the Public Education Reform Amendment Act (PERAA). The 2007 law brought about major shifts in management, accountability, and oversight. PERAA turned over control of the DCPS to the Mayor, which set the stage for reinvigorated efforts in the DCPS, including closing low-performing or under-enrolled schools, the creation of the IMPACT teacher and staff evaluation system, bonuses for highly effective teachers, and new momentum around improvement within the DCPS. Additionally, PERAA eliminated the DCPS Board of Education as a charter school authorizer, placed former Board of Education charter schools under the oversight authority of the PCSB, and created the SEA (the DC OSSE) and State Board of Education (SBOE) to provide leadership in policy for all publicly-funded DC schools.

In 2012, the Center for Education Reform ranked the District of Columbia first in the nation in its charter school law. Over the past 15 years, the Districts' robust charter schools have grown to serve 41 percent of District public school students, making the District of Columbia the state with the largest share of publicly-educated pupils enrolled in charter schools. New charters open each year, and existing charter schools consistently add grades each year.

Mayor Vincent Gray continues to focus support on universal high-quality pre-K for District of Columbia three- or four-year-olds. This initiative has been exceptionally successful. According to the *Education Week* for *Quality Counts* report released in January 2011, the District of Columbia has the highest participation rates for early childhood education in the nation, with more than 65 percent of three- and four-year-olds enrolled in academic programs and 87 percent of kindergarten students enrolled in academic programs.

Another important element supporting successful implementation of this waiver proposal is the District's RTTT grant. This grant provides a unique opportunity for expanded collaboration, including sharing best practices across DCPS and public charter schools to provide both recognition and professional development.

The District of Columbia's participation in RTTT buttresses the support system for the bottom 20 percent of Title I schools, the development of LEA and state-level data systems to support

instructional improvement for all schools, and the expansion of new teacher evaluation systems using student performance to 30 LEAs serving over 90 percent of pre-K–12 students.

One example of the District's ability to quickly enact reforms is our common core state standard (CCSS) adoption and transition efforts. The DC OSSE was the second SEA in the nation to align its ELA state assessments to college- and career-ready standards and will align mathematics by 2013. This allows LEAs and schools to tailor instruction and supports using student assessment results aligned to the CCSS.

NCLB laudably focused on student performance and increased accountability for high-need students. However, it has resulted in unintended consequences, narrowing the scope of school curriculum. The focus on test scores to the exclusion of student growth and gains has had unintended consequences lowering rather than raising school standards. Interventions under this system continue to be a "one size fits all" approach, limiting LEAs and schools from tailoring services to more individualized student and school needs.

Under the status quo, the DC OSSE capacity and support for LEAs and schools is limited given the number of LEAs and schools under the current system that must be identified as "failing" schools. With this application, the DC OSSE broadens the scope of rewards and recognition to include schools that show significant student progress. Additionally the system tailors its SEA supports based on need.

The District of Columbia's application for ESEA flexibility is a commitment to be smarter and more innovative by applying research based strategies to support dramatic improvements at low-performing schools as well as sustained improvement for all schools.

Annual Measurable Objectives (AMOs)

With the application the District will rely upon the use of Annual Measurable Objectives. The DC OSSE proposes two AMOs for the District: proficiency in English/Language Arts and proficiency in mathematics by subgroup. AMOs are set at the school level based on school year 2010-11 performance and have a trajectory set to decrease by half the percentage of non-proficient students by 2017 through interim school-based targets.

The proficiency AMO seeks to reduce by half at the school level the number of students who are not proficient within six years. This trajectory will result in an average 4.5% annual growth in each school, which is projected to include approximately 1,450 additional students identified as proficient each year, or an average increase at each school of eight additional students achieving proficiency each year. The following charts show how these targets are projected under the waiver.

English/Language Arts State Target Trajectory

Percent of Students Proficient or Higher
Figure 2.A.i.2: Mathematics State Targets

Mathematics State Target Trajectory

Percent of Students Proficient or Higher
A more in-depth discussion of AMOs, their significance, and how they are calculated can be found in Section 2B.

Graduation Rate

The District's plan to maintain its statewide adjusted cohort graduation rate goal of 85 percent is consistent with the current graduation rate goal as listed in the accountability workbook. To

reach this goal, the District will reduce the number of non-graduating students by 10% annually as an interim measure of progress. This progression with the interim targets is shown below in Tables 2.A.i.1 and Figure 2.A.i.3.

Table 2.A.i.1: Interim Graduation Targets

Year	Adjusted Cohort Graduation Rate Interim Target	Non-Graduates	Change in number of non-graduates
2010-11 Actual	58.6%	2095	
2011-12 Interim Target	62.7%	1886	209 (10%)
2012-13 Interim Target	66.5%	1697	189 (10%)
2013-14 Interim Target	69.8%	1527	170 (10%)
2014-15 Interim Target	72.8%	1374	153 (10%)
2015-16 Interim Target	75.5%	1237	137 (10%)
2016-17 Interim Target	78.0%	1113	124 (10%)
DC Goal	**85.0%**	**758**

SEA Accountability System: Identification and Classification

The accountability system proposed in this application includes an index that uses proficiency and growth including subgroups. The index will be used to identify high-performing, high-progress, and struggling schools based on the overall programmatic performance.

School-level index scores will be created for schools that are derived from individual scores based on student performance of proficiency, advanced proficiency, or growth. There are two types of scores that will be created for each school – the first is an "all students" score representing all students the school is accountable for, and the second is based upon scores for each subgroup for which that school is accountable. These school-level index scores will also take into account the adjusted cohort graduation rate, participation in School Improvement Grants, and assessment participation rates. Index scores will be used to classify schools into five categories: reward, rising, developing, focus, and priority.

Placement into these classifications based on index score will determine levels of support, oversight, funding flexibility and recognition that a school will receive. Priority schools will receive intensive interventions, focus schools will receive targeted interventions, and developing and rising schools will receive guided interventions. Reward schools are making progress and will receive maximum flexibility to allocate Title I and other federal funds. A more detailed and comprehensive explanation of the index score, including how it is calculated, can be found in Section 2B. Further discussion of implications of classifications can be found in

Sections 2.C, 2.D, 2.E, and 2.F.

Annual reporting will describe whether schools have met each individual school-level AMO target by subgroup. The measurement against targets does not determine the school classification. The same underlying data, DC CAS test proficiency, are combined with annual DC CAS growth to produce an overall classification.

Robust Data Collection and Reporting

The prospective changes to the accountability system will provide an opportunity to engage the broad spectrum of stakeholders in the development, collection, and reporting of educational data (LEAs, charter school authorizers, parents, elected officials, community members, and interested individuals). The objective is to report critical factors that parents need to make informed decisions about selecting a school well-suited for their children. The DC OSSE will compile a wide array of stakeholders to ensure parents get the information they need to make informed decisions about school choice. Additional, detailed information about robust school reports can be found in Section 2F.

The DC OSSE will collaborate with the PCSB, the DCPS, school leaders, parents, elected officials, community organizations, and interested individuals to empower parents with the information needed to make informed educational decisions for their children.

The DC OSSE will collaborate with community partners to develop a program to assist parents in the use of this information enabling greater transparency and sound educational decisions. The DC OSSE will continue to report information required by federal law, including student progress on measurable objectives, test participation rate, graduation rate for adjusted cohort, and other academic indicators.

In addition, ongoing federal grant awards (State Longitudinal Data System and RTTT) support the DC OSSE's implementation of an online data portal that will provide a detailed view into the range of school performance data including enrollment, college readiness, assessments, and the accountability information proposed in this ESEA flexibility request. This portal will be available to the public in August 2012.

Over the past two years, the DC OSSE and other stakeholders have worked to expand the amount of school performance information available to the public. The waiver will provide an opportunity to address the kinds of data gaps outlined in the Brookings institution[1].

Although school choice presumes that families have adequate information to make informed decisions, a recent report on school choice by Russ Whitehurst of the Brookings Institute found that even states and school districts that encourage school choice do not provide in-depth, transparent information on school performance, which inhibits comparisons of schools and

---

[1] Whitehurst, Russ. "The Education Choice and Competition Index: Background and Results 2011." The Brookings Institute, Washington, DC, Nov. 30, 2011.

undermines meaningful school selection. The Districts agrees and supports parents' ability to make informed decisions by providing school information including student and teacher data, absentee rates, parental satisfaction, course offerings, and the ratio of applications to the number of available slots as suggested by Mr. Whitehurst.

ESEA Flexibility Guidance Question - *Does the SEA's differentiated recognition, accountability, and support system create incentives and provide support that is likely to be effective in closing achievement gaps for all subgroups of students?*

Schools that fail to achieve ambitious but achievable goals will receive additional recommendations for improvement and may be required to allocate funds in a way that best supports academic achievements. Schools will be required to identify needs for improvement and implement interventions and supports to increase academic achievement. The DCPS and the PCSB will oversee and monitor plan implementation. However, every LEA in the District of Columbia will have the full ability to design its own system aligned to its individual needs to complete school improvement tasks within a framework supported by the Office of Elementary and Secondary Education's RTTT Innovation and Improvement team.

Statewide Network of Tiered Recognition, Accountability, and Support

As the SEA, the DC OSSE is responsible for the statewide accountability system. This accountability system identifies and classifies schools into one of five categories based on performance indicators. This tiered recognition system will be structured to provide schools with appropriate resources. The Division of Elementary and Secondary Education (ELSEC) within the DC OSSE has recently established the Innovation and Improvement team within the RTTT. The team will monitor services provided by the DCPS and PCSB, and oversee how these entities implement supports and rewards to LEAs and schools. The Innovation and Improvement team will coordinate with other divisions within the DC OSSE.

Through its Cross-Functional Team (CFT), the DC OSSE will review and provide recommendations to school plans submitted by the DCPS and the PCSB as the charter school authorizer. Under this system, the DCPS and the PCSB are held accountable for the implementation and success of interventions and supports to schools. The Cross-Functional Team will partner with DCPS and PCSB to assist schools with their needs assessment, coordination, and development of programs and use of federal funds.

The DC OSSE will also work collaboratively and coordinate as appropriate with the external partners, including education advocacy groups, community-based organizations, and parent groups, to develop a strong statewide network of tiered recognition, accountability, and support. These entities will work together as appropriate to identify needs, assist in developing an effective improvement plan, support implementation including the realignment of federal resources, monitor progress, and report to the public. A more detailed discussion of rewards and recognitions that are already developed and established with stakeholder input can be found in Section 2.C and 2. F. More information about tiered accountability and support can be found in Section 2.B, 2.D, 2.E, 2.F and 2.G. The chart below (Figure 2.A.i.4) provides an organizational representation of how the statewide level of tiered recognition, accountability,

and support will be managed.

Figure 2.A.i.4: Statewide Network of Tiered Support

| Early Childhood Education | Specialized Education | Elementary and Secondary Education | Post Secondary Education | Wellness and Nutrition |
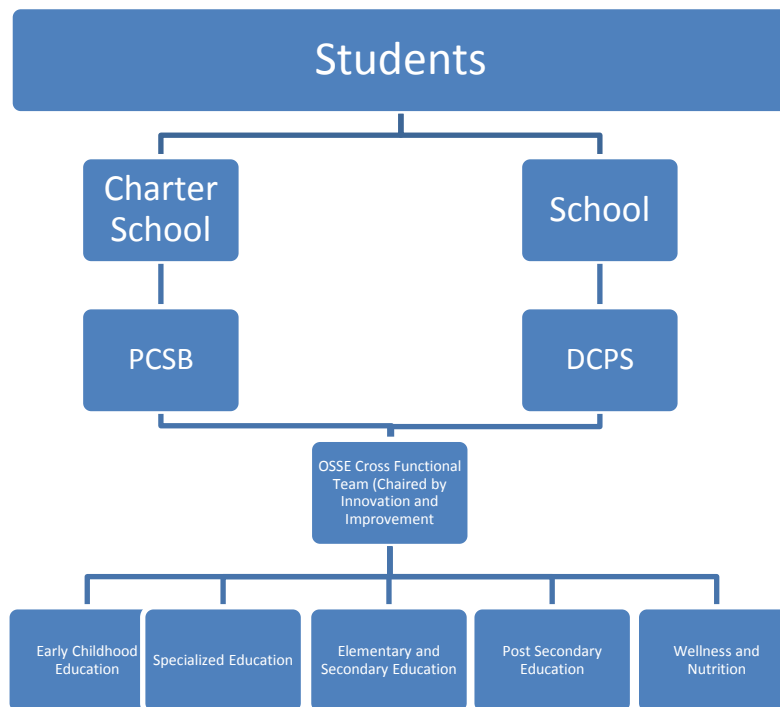

Clarity with regard to process, support, and accountability within and outside of the DC OSSE will ensure a statewide system of tiered recognition, accountability, and support is efficient and effective. This system is essential for the District to provide well-coordinated services to LEAs and schools to maximize all available resources; minimize the burden on the DC OSSE departments, LEAs, and schools; improve academic achievement and graduation rates; and close achievement gaps among the District of Columbia's lowest-performing subgroups and students in special populations.

As part of its SEA-level responsibilities, the DC OSSE will help build capacity at the LEA and school level through providing guidance, technical assistance/support, and opportunities to participate in state-level trainings on: CCSS implementation; developing and implementing teacher and leader evaluation systems; providing training on the state-level differentiated recognition, accountability, and support system; and maximizing coordination of federal resources to serve special populations (Title I, SIG, Title II, Title III, and others). Combined with the activities embedded in the statewide network of tiered support as described throughout

Sections 2.C, 2.D, 2.E, 2.F and 2.G, timely and effective monitoring will take place. LEAs and schools will be held to a high standard of accountability, and schools will receive technical assistance with strategies to increase academic achievement, improve graduation rates, and close achievement gaps among subgroups.

The DC OSSE believes it will best support student achievement by providing schools and LEAs with information on academic outcomes and college success, setting high standards for achievement, and providing supports in identified areas of potential improvement. In turn, schools and LEAs will have the ability to effectively target their resources to areas of need, such as implementing effective curriculum based on strong college- and career-ready standards, preparing all students for college and careers, and creating an effectiveness-driven human capital system for teachers and leaders to benefit students throughout the District of Columbia.

ESEA Flexibility Guidance Question - *Did the SEA provide a plan that ensures that the system will be implemented in LEAs and schools no later than the 2012-2013 school year?*

The newly-developed DC OSSE differentiated recognition, accountability, and support system will become operational over the summer as described in the timeline below. The successful enhancements of multiple data systems make it possible for real time student and school level information to be analyzed to determine classification of schools and student needs. In addition, the work already underway as part of RTTT has provided a jump start on the interventions and supports necessary for improved school and student academic achievement.

The timeline for this plan is below:

- **June 2012** – Data analysis of 2012 DC CAS performance as well as roster confirmation and appeals for 2012 accountability data
- **June 2012** – Communication of updated accountability system and changes in the reporting, intervention, accountability, and recognition system
- **June 2012** - Reporting school level targets for the 2012-13 school year
- **July 2012** – Reporting of 2012 DC CAS results for AMOs, proficiency, and growth
- **July 2012** – Develop guidelines with PCSB and DCPS to support for improvement in priority and focus schools
- **July 2012** – Revision of Title I grant guidelines and application required for schools that do not meet school level targets
- **July 2012** – Guidelines on revision of Title I plans required for schools that do not meet school level targets
- **August 2012** – Identification and distribution of school classifications to the public
- **August 2012** – Inventory and distribution of list of effective external partners and vendors currently serving
- **August 2012 and beyond –** On-going technical assistance and monitoring as appropriate

- **October 2012** – Improvement plans for focus schools due to OSSE for review and recommendations
- **October 2012** – Revision of school level Title I plans and use of Title I funds to be

completed
- **January 2013** - Improvement plans for priority schools due to OSSE for review and recommendations
- **January 2013** – Mid-year progress reports due from DCPS and PCSB for focus and priority schools
- **June 2013** – Year-end progress reports due from DCPS and PCSB for focus and priority schools

Summary

A statewide system of recognition, accountability, and support will address the broad spectrum of needs in the District of Columbia. The tiered accountability system envisioned in this application capitalizes on the roles and responsibilities of the SEA and the LEA for school accountability. Additionally, this system provides flexibility to LEAs and schools with respect to curriculum and programs to enable implementation of creative supports including the educational approaches that have proven effective in growth and mastery of the CCSS competencies and other District of Columbia academic standards. Finally, this process will focus on subgroups, particularly ELLs and students with disabilities, ensuring that the results are reported for all subgroups. As such the performance of a student subgroup will factor significantly in the determination of subject-level and overall index scores. All of these efforts combined are specifically focused on the enhancing performance to improve academic achievement, increase graduation rates, and achieve mastery in the CCSS without creating unnecessary and counterproductive burdens on schools.

2.A.ii   Select the option that pertains to the SEA and provide the corresponding information, if any.

Option A	Option B
☐ The SEA includes student achievement only on reading/language arts and mathematics assessments in its differentiated recognition, accountability, and support system and to identify reward, priority, and focus schools.	X If the SEA includes student achievement on assessments in addition to reading/language arts and mathematics in its differentiated recognition, accountability, and support system or to identify reward, priority, and focus schools, it must: a. provide the percentage of students in the "all students" group that performed at the proficient level on the State's most recent administration of each assessment for all grades assessed; and b. include an explanation of how the included assessments will be weighted in a manner that will result in holding schools accountable for ensuring all students achieve college- and career-ready standards.

During the DC OSSE's conversations with educators, the State Board of Education members, parents, and community leaders, a number of stakeholders expressed concern about focusing solely on English/Language Arts and math. The ESEA flexibility request process creates an opportunity to expand what "counts" for students in the District of Columbia with the inclusion of composition and science assessments in the new accountability system.

ESEA Flexibility Guidance Question - *Did the SEA provide the percentage of students in the "all students" group that performed at the proficient level on the State's most recent administration of each additional assessment for all grades assessed?*

Student performance on the DC CAS composition exam over the past four years has indicated that fewer than half of all students tested in grades 4, 7, and 10 perform at a proficient level. To address this finding, the DC OSSE will be including composition in the accountability system, to ensure a renewed focus on critical thinking and writing skills, so that students are prepared to compete successfully in colleges and careers. The following chart addresses the percentage of students in the "all students" group.

Table 2.A.ii.1: District of Columbia Composition Proficiency Levels

	2008	2009	2010	2011
Grade 4	40.00%	38.29%	32.20%	34.01%
Grade 7	37.20%	42.07%	45.38%	33.32%
Grade 10	38.60%	24.59%	28.80%	31.01%

In 2012, the DC CAS composition assessment will be aligned to the CCSS for ELA and will focus on responses to text. Students will be asked to analyze and compare contrasting texts, and to respond to questions by applying critical thinking skills, building upon skills taught in ELA and other subjects.

The DC OSSE first announced that the DC CAS composition would be aligned to the common core standards in June 2011 as part of its outreach to school leaders during the introduction of the CCSS highlighting the shifts in instruction and assessments. Throughout summer 2011, a panel of teachers reviewed and approved the prompts through content and bias review. In October 2011, the DC OSSE conducted initial training for LEAs to explain the shift in the composition assessment, the new rubric, and the release of a sample prompt. The DC OSSE provided additional training and outreach in the early months of 2012. The DC OSSE will analyze the results of the 2012 assessments and use this information to guide professional development in summer and fall 2012. As a result of LEA and other professional feedback, the test administration cycle will begin for the first time in 2012. The newly aligned composition assessment will become a part of the statewide proficiency index starting with the 2013 test administration, allowing time for LEAs to become familiar with the assessment and to continue curriculum alterations in response to the adoption of the CCSS for statewide assessment.

In addition, including science in the accountability system is also important to promote a comprehensive, well-rounded curriculum not limited to just English/Language Arts and math. By including science in the accountability system, students will receive richer instruction across all content areas and become better lifelong learners through integration of mathematics and science skills. Supporting high-quality science instruction bolsters efforts underway at some LEAs and schools to engage students through hands-on science, technology, engineering, and mathematics (STEM) programs. The inclusion of science ensures attention to the subject's importance—underscored by President Obama's recent call to graduate 100,000 more scientists and engineers—and allows the DC OSSE to accelerate the efforts to align to the NGSS, which will be completed this summer.

The need to address science and enhance performance recognizes the current science proficiency results are not strong, with fewer than 40 percent of the District's students in grades 5, 8, and high school proficient in science. Since science performance is closely tied to performance in English/Language Arts and math, the DC OSSE expects to see increases in student proficiency across all three subjects by integrating science into the accountability plan.

Table 2.A.ii.2: District of Columbia Science Proficiency Levels

	2008	**2009**	**2010**	**2011**
Grade 5	32.35%	34.78%	38.93%	37.84%
Grade 8	21.93%	29.89%	35.28%	36.90%
Biology	38.60%	24.59%	28.80%	31.01%

Recently, the District of Columbia's science standards earned an "A" in a Thomas Fordham Institute study of state science standards. However, student performance on the DC CAS science assessment shows that the District's highly ranked science standards are not commensurate with student proficiency levels. The District of Columbia percent of students proficient in the 2011 National Assessment of Educational Progress (NAEP) science assessment was in the single digits. NAEP measures students' knowledge and abilities in physical science, life science, and earth and space sciences.[2]

For these reasons, and in response to requests to increase the number of subjects included in the accountability plan, the DC OSSE will introduce a new DC CAS science assessment in 2014. The delayed inclusion is in response to LEA requests to allow time for more District educators to be involved in the blueprint development, item review, data analysis, and professional development related to teaching to the standards. The DC OSSE has agreed to this timeline to further enhance a positive transition plan for including new subjects while supporting schools and educators through the transition.

ESEA Flexibility Guidance Question - *Does the SEA's weighting of the included assessments result in holding schools accountable for ensuring all students achieve the State's college- and career-ready standards?*

The District of Columbia's new accountability system will include science and composition in the accountability index weighted based on student participation; English/Language Arts and mathematics are assessed in seven grades, while science and composition are assessed only in three grades. This means that science and composition will typically make up half the weight of other assessments. As with all other assessment development, educators will approve the field test items through content and bias review, and the DC OSSE will provide a strand-level blueprint to support schools and teachers in preparing students for the assessment. The timeline for this process is below.

Outreach and Dissemination

To facilitate the introduction of the composition and science assessments as part of the new accountability system, the DC OSSE will collaborate with the DCPS, the PCSB, and others to ensure schools, teachers, and students are better prepared. Outreach to stakeholders will be

---

[2] Education Week. "2011 NAEP Science Scores, Achievement Levels, and Achievement Gaps." May 10, 2012. http://www.edweek.org/ew/section/infographics/naepscience_charts.html

the first action step in the implementation process. The DC OSSE is prepared to provide the necessary guidance and direction to its LEAs and schools to prepare students for success in composition and science. The DC OSSE will also leverage all partnerships to be sure stakeholders, especially parents and teachers, have a full understanding of the shift to the CCSS.

In addition to these partnerships, the DC OSSE is committed to the following:

- Establish a stakeholder working group to help develop an implementation plan that will identify deliverables focused on supports necessary to teachers, schools, and LEAs to ensure a successful transition;
- Review alignment between composition and science assessments to current standards and make adjustments as necessary;
- Provide training and support to LEAs and schools on implementation of composition and science standards in classroom instruction; and
- Provide timely access to composition and science data and supports in understanding results to inform teacher professional development, instruction, and student performance.

Summary of Project Plan

Composition Transition to Common Core Standards
- **April 2011** – The DC OSSE shared with the vendor the vision for new composition prompts to assess the CCSS that would allow student to read and write to a text. The DC OSSE selected the CCSS in English/Language Arts and writing for the development of the prompts and created a new rubric for English/Language Arts so that both a English/Language Arts and writing score could be reported.
- **May 2011** – The DC OSSE approved the English/Language Arts passages selected by the vendor.
- **June 2011** – The DC OSSE reviewed and approved the composition prompts developed by the vendor in collaboration with the DC OSSE.
- **August 2011** – The composition prompts were reviewed and approved by District of Columbia educators through content and bias review for field testing, and one prompt was selected from each grade level to be used and released as a sample.
- **October 2011** – The DC OSSE provided professional development to introduce the new prompts, discuss the changes from the previous prompts, and provide best practices for preparing students for the shift.
- **November 2011** – The DC OSSE posted sample prompts for each grade on the website.
- **April 2012** – The DC OSSE field tested the prompts during the DC CAS window.
- **July 2012** – The DC OSSE, with the vendors and District of Columbia educators, will participate in standard setting for the new prompts, write new performance-level descriptors, and select anchor papers for future scoring.
- **August 2012** – The DC OSSE will review the performance data and anchor papers of the

prompts to develop professional development to be offered throughout the school year.

- **August 2012** – The vendor will do data analysis of the DC CAS composition performance with the DC CAS English/Language Arts performance to ensure comparability from year to year.
- **April 2013** – The DC CAS composition will be administered.
- **June 2013** – The results of the DC CAS composition will be used for accountability purposes.

Transition to NGSS

- **May 2012** – The DC OSSE state team meets to review standards and provide commentary for a report on the first round of public feedback and review of the NGSS draft.
- **June 2012** – The DC OSSE will provide feedback from the state team to Achieve, and NGSS writing team reacts to the review.
- **August 2012** – The DC OSSE state team will meet and review standards for the second and final round of public feedback and commentary.
- **September 2012** – The NGSS writing team reacts to the review and Achieve edits the final document.
- **October 2012** – Achieve will release the final version of the NGSS for adoption.
- **December 2012** – The DC OSSE state team reviews final release of the NGSS, examines the crosswalk between the District of Columbia's science standards and the final NGSS, and prepares a presentation to deliver to the State Board of Education recommending adoption.
- **April 2013** – Begin field testing items that are aligned to the NGSS.
- **Summer 2013** – Provide professional development and summer institutes to support educators and school leaders in implementation.
- **Summer 2013** – To support schools in implementation, the DC OSSE state team will develop a suggested scope and sequence for instruction and write items to create interim assessments aligned to the NGSS. The DC OSSE will propose a plan to administer statewide interim assessments for all schools.
- **Summer 2013 –** The NGSS will be implemented in schools with support from the DC OSSE.
- **September 2013 –** Release the blueprint for the shift to begin alignment to the NGSS.
- **April 2014 –** Deliver DC CAS science with a shift to the NGSS and further field testing.
- **June 2014 –** Include modified assessment in the accountability purposes.
- **April 2015 –** DC CAS science fully aligned to the NGSS.

Summary

Feedback from focus groups clearly supports the decision to include additional assessments in the accountability plan. The DC OSSE will add composition to the accountability plan in 2013 and science in 2014. The goal is to promote student mastery in critical thinking and writing skills. Developing quality curriculum and instructional strategies that teach core skills necessary in a twenty-first century learning environment and creating aligned assessments can be a

lengthy process. Thus, the District of Columbia will phase in new assessments with enough lead time for schools to adjust their curricula. The phase-in approach also provides teachers time to receive the technical assistance, resources and support they need. With improved data on student achievement outcomes, schools will have a greater opportunity to identify those who are on track for college and career readiness and those who may need additional help.

2.B SET AMBITIOUS BUT ACHIEVABLE ANNUAL MEASURABLE OBJECTIVES

Select the method the SEA will use to set new ambitious but achievable annual measurable objectives (AMOs) in at least reading/language arts and mathematics for the State and all LEAs, schools, and subgroups that provide meaningful goals and are used to guide support and improvement efforts. If the SEA sets AMOs that differ by LEA, school, or subgroup, the AMOs for LEAs, schools, or subgroups that are further behind must require greater rates of annual progress.

Option A	Option B	Option C
☒ Set AMOs in annual equal increments toward a goal of reducing by half the percentage of students in the "all students" group and in each subgroup who are not proficient within six years. The SEA must use current proficiency rates based on assessments administered in the 2010–2011 school year as the starting point for setting its AMOs. i. Provide the new AMOs and an explanation of the method used to set these AMOs.	☐ Set AMOs that increase in annual equal increments and result in 100 percent of students achieving proficiency no later than the end of the 2019–2020 school year. The SEA must use the average statewide proficiency based on assessments administered in the 2010–2011 school year as the starting point for setting its AMOs. i. Provide the new AMOs and an explanation of the method used to set these AMOs.	☐ Use another method that is educationally sound and results in ambitious but achievable AMOs for all LEAs, schools, and subgroups. i. Provide the new AMOs and an explanation of the method used to set these AMOs. ii. Provide an educationally sound rationale for the pattern of academic progress reflected in the new AMOs in the text box below. iii. Provide a link to the State's report card or attach a copy of the average statewide proficiency based on assessments administered in the 2010☐2011 school year in English/Language Arts/language arts and mathematics for the "all students" group and all subgroups. (Attachment 8)

ESEA Flexibility Guidance Question - *Did the SEA provide the new AMOs and the method used to set these AMOs?*

Did the SEA use current proficiency rates from the 2010–2011 school year as the base year? If the SEA set AMOs that differ by LEA, school, or subgroup, do the AMOs require LEAs, schools, and subgroups that are further behind to make greater rates of annual progress?

The DC OSSE recognizes the value in the original intent of the NCLB and will build upon it to enhance performance and effectively measure school and student success. As with NCLB, the DC OSSE still expects that 100 percent of students will meet proficiency in the CCSS. In the proposed new accountability system, the DC OSSE also expects that 100 percent of students will show educational growth each year.

Annual Measurable Objectives (AMOs)

The DC OSSE will set two school-level AMOs:

- A proficiency-based AMO for English/Language Arts achievement by subgroup; and
- A proficiency-based AMO for mathematics achievement by subgroup

The DC OSSE will establish AMOs at the LEA, school, and ESEA subgroup levels based on reducing the number of non-proficient students by half over a six year timeframe, using the 2010-11 school year as a baseline. Annual reporting will require schools to describe achievement outcomes.

Proficiency AMO

The proficiency AMO is established at the school level with the goal of reducing by half the number of students who are not proficient within six years. The DC OSSE will set corresponding targets for each LEA, school, and ESEA subgroup. Table 2.B.i. below is an example of what the ESEA subgroup targets could look like. The DC OSSE will calculate school level targets in the same way based on reducing by half the percentage of students who are non-proficient over six years. Based on this logic and methodology, schools with greater numbers of students who are not proficient must make greater gains annually to meet the interim targets. Information about schools that fail to meet the AMO targets is found in section 2.F.

Table 2.B.i. State-Level Targets for Proficiency in Reading and Math

Subgroup	2011 – Baseline	Reading					
		2012 Target	2013 Target	2014 Target	2015 Target	2016 Target	2017 Target
Asian/Pacific Islanders	71.51%	73.88%	76.26%	78.63%	81.01%	83.38%	85.76%

SEA Accountability System: Identification and Classification

The DC OSSE's proposed accountability system is based on an index that rewards growth and proficiency. Stakeholders emphasized that simplicity should be a key principle of the new accountability system. For this reason, and with stakeholder input in mind, the statewide accountability identification will be based on student proficiency and growth on statewide assessments, participation rates, SIG school status, and adjusted cohort graduation rates.

School Index Score Calculation Business Rules

The school index score will be used by DC OSSE to identify high-performing, high-progress, and struggling schools, and to provide corresponding recognition, support, and monitoring. This three-step methodology will create individual scores based on either student proficiency or growth; a subgroup subject index score, and a weighted averaged school index score (Table 2.B.ii).

Table 2.B.ii. Calculating School Index Scores: Methodology

Step	Score	Description	Sample Calculation
Step 1	Individual Score	School receives a score for each individual student in each subject based on last year's test scores and this year's test scores, awarding points for either proficiency or growth	See Figure 2.B.i.
Step 2	Schoolwide "All Students" score	To identify Priority, Reward, Developing, and Rising schools, the schoolwide all student index is calculated based all on the average of all individual performance scores that have been assigned to a school.	(sum of all index scores for all students that are Full Academic Year/ number of FAY scores)
Step 3	All students and subgroup scores by subject	To identify Focus schools all students subgroup within a subject are averaged together to produce subgroup subject score. This score is used in comparison to the "all students" index score and the statewide subgroup scores to identify achievement gaps.	(sum of subject scores for all students that are Full Academic Year (FAY)) and belong to subgroup / number of FAY individual scores that belong to subgroup = subject index score)

Step 1: Individual Scores

A student's test results will be compared to Figure 2.B.i to determine how many points to award depending on the achieved level of growth and proficiency.

Figure 2.B.i. Step 1: Individual Scores Lookup Table

Minimum N = 25		Current Score						
Prior Score		Below Basic		Basic			Proficient	Advanced
Level	Group	Low	High	Low	Middle	High	All	All
Below Basic	Low	0	20	40	60	80	100	110
	High	0	0	20	40	60	100	110
Basic	Low	0	0	0	20	40	100	110
	Middle	0	0	0	0	20	100	110
	High	0	0	0	0	0	100	110

Proficient	All	0	0	0	0	0	100	110
Advanced	All	0	0	0	0	0	100	110
No Prior Score		0	0	0	0	0	100	110
Alternate Assessment		0			0		100	110

The goal is for every student to achieve proficiency, but since it is critically important to recognize growth in special-needs students, the District of Columbia will also investigate the process of creating a growth measure to use with alternate assessments. The District of Columbia expects all students to achieve academic growth every year.

Step 2: Subject Scores

The individual point values the school has received based on the scores of students will be combined as a way to measure school progress. Based on their placement on the values table, the school will receive an independent score for each student. All scores will be averaged to produce the "all students" score. Subject scores will also be calculated by subgroup for use in classification of schools as focus schools. Table 2.B.iii below provides an example calculation for a school that has an "all students" English/Language Arts score of 75 and an "all students" mathematics score of 71. The school also has subgroup scores for ELL English/Language Arts of 89 and ELL mathematics of 82.

Table 2.B.iii. Step 2, Subject Scores (Example)

	Student English/Language Arts Index	Student Mathematics Index	ELL	Student English/Language Arts Index for ELL Students	Student Mathematics Index for ELL Students
Student A	100	100	X	100	100
Student B	110	100			
Student C	110	110	X	110	110
Student D	25	50			
Student E	25	50	X	25	50

Student F	100	100			
Student G	25	25			
Student H	25	0			
Student I	100	50	X	100	50
Student J	110	100	X	110	100
Student K	100	100			
Total Index Score	830	785		445	410
Number of Students	11	11		5	5
Average Subgroup or All Students Index	830 / 11 = **75**	785 / 11 = **71**		445 / 5 = **89**	410 / 5 = **82**

Step 3: All Students index Score

The "all students" index score will be used to calculate the overall performance of the school and used to classify the school as reward, rising, developing, and priority. This score is calculated by combining all scores that a school has earned regardless of subject and dividing by the total number of scores.

Subgroups

The DC OSSE will use subgroups' index scores (as shown in Table 2.B.iii) for the ESEA subgroups required to be used for accountability to classify schools as focus schools based on the achievement gaps. Subsequent sections on priority and focus schools discuss how all students and subgroup scores are used for school classifications.

Minimum *N* Size

Consistent with current practice, the DC OSSE will set the minimum subgroup *N* size for the accountability index and AMO reporting for accountability purposes at 25 but will produce non-accountability reports based on a minimum subgroup *N* size of 10.

Test Participation

The District of Columbia's accountability system will include test participation to ensure that schools are considering the performance of all students. Based on federal accountability

requirements, schools with a DC CAS test participation rate of less than 95 percent for two consecutive years for the "all students" group will be classified as priority schools. Schools that have a DC CAS test participation rate of less than 95 percent for subgroups will be classified as focus schools. The participation rate is calculated based on the number of test takers plus the number of medical exemptions divided by the number of students enrolled on the first day of testing.

Graduation Rates

To calculate the classification based on graduation rates of less than 60% for more than one year the DC OSSE will use the leaver rate from 2010 and the adjusted cohort rate from 2011. This mixed methodology is being used since the DC OSSE only has one year available for the adjusted graduation rate calculation. Starting with determinations for the SY13-14 school year, the adjusted cohort graduation rate will be used for both years to determine whether a school must be classified as priority based on graduation rate. Among other factors described in more detail in 2.D., a cohort graduation rate of below 60% for multiple years will classify a school as a priority school.

The DC OSSE proposes a range of cut scores to determine the appropriate category for each school under its differentiated recognition, accountability, and support system. The proposed cut scores are established at levels that ensure that the categories for reward, priority, and focus schools meet the required definitions for performance and progress under ESEA flexibility. There are a total number of 189 schools to be reported. The following chart summarizes school classification and cut scores.

Table 2.B.vi. The DC OSSE School Classification and Cut Scores

Category	From	To	# of Schools	# of Title I Schools	% of All Schools	% of Title I Schools
Reward	80	100+	19	7	10%	4%
Rising	45	79	69	60	37%	36%
Developing	26	44	53	53	28%	32%
Priority	0	25	31	29	16%	17%
Focus (schools with substantial achievement gaps)	0	100+	17	17	9%	10%
Total			**189**	**166**	**100%**	**100%**

A summary of all classification and the order in which it occurs is below:

Priority schools are identified from among all schools

1. Any school that is participating in a school improvement grant (SIG);
2. Any school with a graduation rate of 60% or below for two or more consecutive years;
3. Any school with an overall index score of 25 points or below based on insufficient proficiency and growth; **or**
4. Any school with a participation rate of less than 95% for two or more years based on a failure to affirmatively demonstrate that it has an index score of above 25 based on assessment of all students.

Focus schools are identified from the pool of schools not identified as priority

1. Any school with a subgroup that is performing 20 or more points lower than the statewide performance of that subgroup based on an achievement gap in comparison to the state average;
2. Any school with a gap between the highest and lowest performing subgroup that is 1.5 times the overall (all students) performance of the school based on within-school achievement gaps; **or**
3. Any school with a subgroup with a participation rate below 95% for two or more consecutive years for a failure to affirmatively demonstrate that it lacks an achievement gaps by comprehensively assessing its subgroups.

Reward schools are identified from those not classified as priority or focus. This ensures that reward schools do not have low graduation rates, significant achievement gaps, or low participation rates.

1. Any Title I school with an all students index of 80 or above; **or**
2. Any Title I school in the top 5% in annual growth in the "all students" subgroup.

The remaining schools are identified as developing or rising

1. Schools with an "all students" index score between 26-44 are identified as developing schools;
2. Schools with an "all students" index score at or above 45 are identified as rising schools.

Schools that are designated as priority or focus using this index-based, state-level accountability system will be required to implement differentiated interventions for subgroups, undergo increased monitoring and document their use of Title I funds. Priority and focus schools will also receive intensive and/or targeted support from the DC OSSE, the DCPS and the PCSB. Further discussion of treatment for priority schools is found in Section 2.D, and further discussion of treatment for focus schools is found in Section 2.E.

LEA and School-Level Accountability

Most LEAs have their own accountability system in addition to the state accountability system. These systems typically complement the state accountability system but include provisions

specific to the LEA's respective needs or policies. In the District of Columbia, the DCPS recently developed its own accountability system that provides school-level information based on student performance and other factors. The DCPS has particular policy concerns and structural aspects that make it beneficial for its internal management to run a school accountability system. Similarly, the PCSB makes use of an accountability system it has developed to address charter school improvement, closure, and other key issues (e.g., discipline and services to students in special populations.)

As a result, the DC OSSE has partnered with the DCPS and the PCSB in addressing the accountability structure to create a comprehensive statewide network of tiered recognition, accountability, and support both at the state level and within the sectors. Additional information about the local-level accountability systems is included as an attachment to this proposal.

2.C REWARD SCHOOLS

2.C.i   Describe the SEA's methodology for identifying highest-performing and high-progress schools as reward schools. If the SEA's methodology is not based on the definition of reward schools in *ESEA Flexibility* (but instead, e.g. based on school grades or ratings that take into account a number of factors), the SEA should also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance.

ESEA Flexibility Guidance Question - *Did the SEA's request identify both highest-performing and high-progress schools as part of its first set of identified reward schools? (Table 2)*

The accountability system incorporates both performance and progress in one overall school index. The highest performing schools will be classified as reward schools. Their accomplishments will be recognized and rewarded as follows:

- **Highest-performing schools**: Schools will be ranked based on their overall school index.
- **High-progress schools**: Schools will be ranked based on improvement in overall school index from year to year (programmatic growth), beginning in June 2012 when DC CAS results are available. These will be based on individual school target index scores that recognize growth in English/Language Arts and Mathematics.

ESEA Flexibility Guidance Question - *Did the SEA describe its methodology for identifying highest-performing and high-progress schools as reward schools? If the SEA's methodology is not based on the definition of reward schools in ESEA Flexibility (but is instead, e.g., based on school grades or ratings that take into account a number of factors), did the SEA also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance?*

A Title I school will be identified as a high performing reward school if it demonstrates an "all students" group proficiency/growth index score above 80 and is not currently classified as a

priority or focus school. This approach will eliminate the possibility of classifying a school as a reward school if it has significant achievement gaps or has had a low student graduation rate for multiple years.

A Title I school will be classified as a high progress reward school if it demonstrates it is in the top 5% of annual improvement in the "all students" index score. This enables recognition of growth in English/Language Arts and Mathematics for the number of students who have demonstrated growth from year to year.

Table 2.C.i.1 demonstrates that the list of schools in Table 2 is consistent with the definition for reward schools under the ED's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance document.

Table 2.C.i.1. Compliance with ESEA Flexibility Definitions

Category	Number
Total number of Title I schools	166
Minimum number of reward schools required to be identified	N/A
Number of reward schools identified by the DC OSSE	19
Total number of schools on list generated based on high performance	19
Total number of schools on list generated based on high progress	TBD

The total number of high progress schools will be identified upon finalization of the 2012 statewide assessment results.

2.C.ii Provide the SEA's list of reward schools in Table 2.

2.C.iii Describe how the SEA will publicly recognize and, if possible, reward highest-performing and high-progress schools.

ESEA Flexibility Guidance Question - *Are the recognition and, if applicable, rewards proposed by the SEA for its highest-performing and high-progress schools likely to be considered meaningful by the schools? Has the SEA consulted with LEAs and schools in designing its recognition and, where applicable, rewards?*

SEA-Level Recognition and Rewards

OSSE has consulted with LEAs and schools in designing a recognition and reward process for reward schools. The DC OSSE will recognize and reward highest-performing and high-progress schools in multiple ways. The DC OSSE developed its current Academic Achievement Awards policy, aligned with the current ESEA requirements, during the 2010–11 school year in consultation with its Title I Committee of Practitioners. The DC OSSE also reserves Title I funds, when available, to make financial rewards to Title I schools.

With 89% of publicly-funded District of Columbia schools receiving Title I funding, the Title I funding provides incentives for the majority of DC schools. The plan outlined below builds on the current award policy and leverages reserved funds that remain available. The most significant change is that the DC OSSE will be able to provide financial rewards from reserved Title I funds to highest-performing **and** high-progress Title I schools based upon the identification methodology described in 2.C.i, expanding the criteria to include growth.

Red Ribbon School of Excellence Award

The DC OSSE will identify schools eligible to receive a Red Ribbon School of Excellence in two categories: proficiency and progress. A reward school may receive both awards in a single year if it meets the criteria for both awards. The types of recognition may include:

- Letter(s) of recognition from the State Superintendent, President of the State Board of Education, Deputy Mayor for Education, and/or the Mayor;
- School visit by the State Superintendent, President of the State Board of Education, Deputy Mayor for Education, and/or the Mayor;
- Certificate identifying the school as a recipient of the Red Ribbon School of Excellence Award for Proficiency and/or for Progress, presented to each school at a State Board of Education meeting;
- Press release announcing Red Ribbon Award recipients;
- Eligibility for the DC OSSE's nomination as National Title I Distinguished School and/or Blue Ribbon School (as a prerequisite; not all award recipients will be nominated);
- Special invitation to nominate one staff person to compete for one of two new "Red Ribbon Award Recipient" positions (one for proficiency and one for progress) on the DC State Title I Committee of Practitioners;
- Invitation to participate in a Red Ribbon Award colloquium to present or discuss practices that drive proficiency and progress within Title I schools;
- Technical assistance from the DC OSSE to prepare a presentation for the next National Title I Conference;
- Invitation to nominate staff to mentor lower-performing and low-progress schools as Superintendent's Ambassadors;
- Eligibility for Title I schools to apply for financial awards, when funding is available and as described in more detail below.

Financial Award

Although all reward schools that meet the criteria to receive a Red Ribbon School of Excellence Award for either proficiency or progress will receive the same non-monetary recognition, the DC OSSE may also identify certain award recipients as eligible to apply for a financial award in any year that funding is available from a reservation of Title I funds under Section 1117(c) of the ESEA (either from that fiscal year or carried over from a previous fiscal year) or from some other source. To clarify, Title I funds will not be used in any non-Title I schools identified as reward schools.

All award recipients that meet the following additional criteria during the school year for which they met the Red Ribbon School of Excellence criteria will be eligible to apply for a financial reward if they meet the following criteria:

- Received a Title I allocation and operated a Title I program; and
- Enrolled students without a selective admission process.

To be eligible for this award the school must also identify the practices that led to their high levels of proficiency and/or progress. The school must specify the proposed use of funds that either (1) ensures the continuation or expansion of those practices and/or (2) addresses other practices that they seek to improve to build on previous success. The Title I Committee of Practitioners will serve as the review panel and advise the DC OSSE on the selection of schools to receive financial awards.

The DC OSSE will develop and distribute information on a methodology for determining reward amounts for schools selected to receive financial awards. Based on previous consultation with the Title I Committee of Practitioners, awards will take into consideration the size of a school's population, the number of consecutive years the school has met the criteria to receive a Red Ribbon School of Excellence Award , exact rates of Proficiency for schools eligible based on Proficiency, and exact rates of progress for schools eligible based on progress.

Summary

Reward schools will be recognized and rewarded for demonstrated performance and progress. An accountability system that rewards success plays a critical role in supporting all schools to continue to progress.

2.D PRIORITY Schools

2.D.i   Describe the SEA's methodology for identifying a number of lowest-performing schools equal to at least five percent of the State's Title I schools as priority schools. If the SEA's methodology is not based on the definition of priority schools in *ESEA Flexibility* (but instead, e.g. based on school grades or ratings that take into account a number of factors), the SEA should also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance.

ESEA Flexibility Guidance Question - *Did the SEA describe its methodology for identifying a number of lowest-performing schools equal to at least five percent of the State's Title I schools as priority schools? If the SEA's methodology is not based on the definition of priority schools in ESEA Flexibility (but is instead, e.g., based on school grades or ratings that take into account a number of factors), did the SEA also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance?*

The DC OSSE has proposed a range of cut scores to identify priority schools based on the required definitions for performance and progress under ESEA flexibility described in Section

2.B. To summarize, priority school identification criteria includes the following order of operations:

1. Receives SIG funds as a Tier I or Tier II school; **or**
2. Has a graduation rate of 60 percent or less for two consecutive years or more; **or**
3. The "all students" Index Score is 25 or less; **or**
4. Participation rate is lower than 95 percent in the "all students" group for two consecutive years.

ESEA Flexibility Guidance Question -*Did the SEA identify a number of priority schools equal to at least five percent of its Title I schools? Did the SEA's methodology result in the identification of priority schools that are —*

(i) *among the lowest five percent of Title I schools in the State based on the achievement of the "all students" group in terms of proficiency on the statewide assessments that are part of the SEA's differentiated recognition, accountability, and support system, combined, and have demonstrated a lack of progress on those assessments over a number of years in the "all students" group;*

(ii) *Title I-participating or Title I-eligible high schools with a graduation rate less than 60 percent over a number of years; or*

(iii) *Tier I or Tier II schools under the School Improvement Grants (SIG) program that are using SIG funds to fully implement a school intervention model?*

Table 2.D.i.1 demonstrates that the list of schools in Table 2 is consistent with the definition for priority schools under the ED's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance document.

Table 2.D.i.1. Compliance with ESEA Flexibility Definitions

Category	Number
Total number of Title I schools	166
Minimum number of priority schools required to be identified	8
Number of priority schools identified by the DC OSSE	31
Total number of schools on list generated based on overall rating that are currently Tier I or Tier II SIG schools	14
Total number of schools on list generated based on overall rating that are high schools with a graduation rate of less than 60 percent over a number of years	1
Total number of schools on list generated based on overall rating among the lowest-achieving Title I schools	16

It should be noted that there may be overlap of identification criteria between schools identified based on SIG funding, graduation rate and achievement in Title I schools.

Because the leaver graduation rate used in 2011 is so much higher than the new adjusted cohort rate used in 2012, few schools are identified as priority based on graduation rate in

2011. One additional school meets the criteria but is also a Tier I or Tier II SIG school and so is first identified as a priority school based on that criteria (see order of operations above).

The DC OSSE's list of priority schools meets ESEA requirements for the minimum number of schools based on required criteria. In developing the final list of priority schools, however, based in part on input from stakeholder groups, the DC OSSE identified more than the minimum number of schools for support to ensure broader impact and sustained progress.

2.D.ii Provide the SEA's list of priority schools in Table 2.

2.D.iii Describe the meaningful interventions aligned with the turnaround principles that an LEA with priority schools will implement.

ESEA Flexibility Guidance Question - *Are the identified interventions to be implemented in priority schools likely to*
  (i)   increase the quality of instruction in priority schools;
  (ii) improve the effectiveness of the leadership and the teaching in these schools; and
  (iii) improve student achievement and, where applicable, graduation rates for all students, including English Learners, students with disabilities, and the lowest-achieving students?
  (iv) Has the SEA indicated that it will ensure that each of its priority schools implements the selected intervention for at least three years?

The DC OSSE is committed to closing all achievement gaps and ensuring that all students in the District of Columbia graduate from high school and are college and career ready at graduation. To reach this goal, priority schools must make dramatic and rapid improvements that accelerate student achievement. The DC OSSE will provide tools for LEA and school-based improvement teams to assess their needs, develop a plan for improvement, and implement action steps to ensure student learning improves in each priority school. Through collaboration with the DCPS, the PCSB, the Human Capital Task Force, the Student Growth Task Force, and the Deputy Mayor of Education's Office, State Board of Education, and other partners, the DC OSSE will enhance the effectiveness and coherence of district systems and the effective integration of external partners to support school improvement.

In addition, the DC OSSE will evaluate, support, and monitor schools through its oversight of DCPS and PCSB, as the charter authorizer for accountability purposes around instructional leadership, curriculum, professional development, instruction, assessments, staff evaluation, human capital, and financial/asset management. By doing so, the DC OSSE believes that the District of Columbia's students will show annual academic growth, raise graduation rates, and close achievement gaps, particularly with regard to students with special needs and ELLs in priority schools.

SEA-Level Support

The DC OSSE will use the CFT staffed by various DC OSSE personnel from multiple divisions and external partners where appropriate to ensure simultaneous and effective implementation of

meaningful interventions aligned with all the turnaround principles in each priority school for a minimum of three years. The interventions include strong principal leadership; effective staffing practices and instruction; curriculum, assessments, and interventions; effective use of time; effective use of data; school climate and culture; and effective family and community engagement. The DC OSSE will provide training to enable the CFT to recognize an LEA's successes—both in terms of results in student learning and universal application of effective practice—and its deficiencies, enhancing the motivation for change.

Resources developed by the DC OSSE and used in priority school interventions will include CCSS curriculum and assessments, professional development supporting improved instruction, data systems for improving teaching and learning, guidelines for identifying quality enhanced and extended learning opportunities, and innovative strategies to support special education students, ELLs, and low-achieving students.

The CFT will be fully supported by the DC OSSE and will be staffed with experts from each department within the DC OSSE, including Specialized Services, Elementary & Secondary Education, Health & Wellness, Early Childhood Education, and Post-Secondary Education. The fully staffed CFT will be prepared to start work at the start of the 2012–13 school year and will work with DCPS and PCSB turnaround experts to determine training needs and provide tailored services to all priority schools. The CFT will develop specific intervention strategies and will conduct training on strategies aligned with the seven turnaround principles.

The DC OSSE senior staff will prioritize the resource needs of the CFT and continually improve the DC OSSE resources based on CFT feedback concerning school-level implementation. This process will efficiently leverage the DC OSSE staff to develop, adopt, or identify resources that can be used across all LEAs while requiring CFT to help support interventions and provide feedback on implementation issues to the DC OSSE. This system is supported by strong communication and accountability for all parties to improve student achievement in these lowest-performing schools. The CFT will also have the freedom and flexibility to look outside of the DC OSSE to adopt resources, materials, or programs it believes will best meet the specific needs of students in the priority schools under its direction.

Since most of the District of Columbia's schools are in a Title I status, LEAs will have to incorporate the priority schools' individualized improvement plan in a Web-based tool such as Indistar (a system that enables the CFT's continuous planning, implementation, monitoring, and course adjustment that empowers the DC OSSE senior staff to make recommendations about changes in practice to achieve desired results in student learning). As a condition of SIG funds, all SIG participating priority schools are required to use Indistar as their web-based tool for improvement plans and monitoring of continuous improvement.

ESEA Flexibility Guidance Question - *Are the interventions that the SEA described aligned with the turnaround principles and are they likely to result in dramatic, systemic change in priority schools? Do the SEA's interventions include all of the following?*
   (i)   providing strong leadership by: (1) reviewing the performance of the current principal; (2) either replacing the principal if such a change is necessary to ensure strong and effective leadership, or demonstrating to the SEA that the current principal has a track record in improving achievement and has the ability to lead

the turnaround effort; and (3) providing the principal with operational flexibility in the areas of scheduling, staff, curriculum, and budget;

(ii) ensuring that teachers are effective and able to improve instruction by: (1) reviewing the quality of all staff and retaining only those who are determined to be effective and have the ability to be successful in the turnaround effort; (2) preventing ineffective teachers from transferring to these schools; and (3) providing job-embedded, ongoing professional development informed by the teacher evaluation and support systems and tied to teacher and student needs;

(iii) redesigning the school day, week, or year to include additional time for student learning and teacher collaboration;

(iv) strengthening the school's instructional program based on student needs and ensuring that the instructional program is research-based, rigorous, and aligned with State academic content standards;

(v) using data to inform instruction and for continuous improvement, including by providing time for collaboration on the use of data;

(vi) establishing a school environment that improves school safety and discipline and addressing other non-academic factors that impact student achievement, such as students' social, emotional, and health needs; and

(vii) providing ongoing mechanisms for family and community engagement?

To ensure effective implementation of strategies addressing all seven turnaround principles, the CFT will assign a team member to support the DCPS and PCSB in creating a first-year plan that includes interventions and supports. All three parties (the DCPS, the PCSB, and the CFT) will work to develop a communication plan that helps school staff and parents understand how the interventions are related and required to increase and sustain improved student achievement. This approach will enable staff and parents to better understand the plan and motivate them to put more support behind it.

The identified needs, specific interventions, and progress-monitoring goals will be included in individualized school improvement plans developed for each priority school (regardless of Title I status) and approved by the DCPS or the PCSB, as the charter authorizer for accountability purposes. The CFT will review plans to determine the intervention strategies schools will use from a list of possibilities (listed below), and make recommendations as needed; at the same time, the CFT will monitor the effectiveness of the DCPS's and PCSB's work using a common set of expectations.

Although all interventions will be implemented concurrently in priority schools, the interventions themselves are listed separately along with a set of strategies and expected outcomes so that the approach is clearly outlined and the effectiveness goals can be measured accordingly.

School Leadership

To ensure that school leaders are able to lead the turnaround effort, the CFT will monitor the DCPS's and the PCSB's effective implementation of intervention strategies, which must include a combination of those listed below. All interventions will be implemented consistent with federal and state statutes and regulations, as well as any DCPS collective bargaining agreement. The intervention strategies must include a combination of the following:

- Reviewing the performance of the current principal;
- Removing and reassigning the school principal, where appropriate;
- Requiring professional development for school leaders focused on instructional leadership including the collection of data and feedback mechanisms for continually improving instruction; and
- Providing flexibility in the areas of scheduling, budget, staffing, and curriculum.

The effectiveness of these interventions will be measured by improved instructional leadership behaviors of the principal, school, and classroom-level achievement as well as the quality of the improvement plan and implementation. Effectiveness will ultimately be measured by improved student achievement on state-level assessments.

Effective Staffing Practices and Instruction

The CFT will monitor the effective implementation of strategies by the DCPS and the PCSB to increase the recruitment, retention, and development of effective teachers, which must include a combination of the following:

- Reviewing and retaining effective staff that have the ability to be effective in a turnaround effort;
- Preventing ineffective teachers from transferring into these schools;
- Requiring professional development to certify that all administrators in the school can effectively evaluate instruction and give quality feedback to teachers;
- Requiring professional development for the principal and leadership team on effective recruiting and retention practices; and
- Requiring outside master educators to conduct observations as part of a comprehensive evaluation process that supports reliable observations.

The effectiveness of these interventions will be measured by improved instruction (walkthrough data, formal/informal observations), the teacher evaluation system, and improved student achievement as measured by state-level assessments.

The CFT will monitor the effective implementation of interventions by the DCPS and the PCSB to continually improve the quality of instruction, which must include a combination of the following:

- Requiring mutual consent for up to 100 percent of staff;
- Requiring professional development for all teachers focused on effective instruction; and
- Requiring professional development for the principal focused on the skills necessary for improving instruction.

The effectiveness of these interventions will be measured by improved instructional data (walkthroughs, formal/informal evaluations), a score of "highly effective" on the teacher evaluation system, and improved student achievement as measured by state-level assessments.

Effective Use of Time

The DCPS or the PCSB must implement the following strategies for any priority school that fails to effectively use time for improving instruction and achievement for all students, including students with disabilities and ELLs:

- Requiring a schedule change to increase instructional time for students who need more time to meet the rigorous goals of the CCSS;
- Requiring additional time for professional development focused on all teachers' learning strategies for effectively working with students with disabilities or ELLs;
- Requiring additional time for professional development focused on understanding the rigorous requirements of the CCSS for all teachers, including special education teachers and teachers supporting ELLs;
- Requiring additional time for professional development focused on teachers developing and using common assessment data to inform and differentiate instruction;
- Requiring professional development for all teachers on effective use of instructional time, including effective transitions; and
- Requiring professional development for school leaders on effective scheduling to support learning for students and teachers.

While the form of these interventions may include extended learning time during the school day, it may also include extended learning opportunities in the form of either before-school or after-school programs consistent with the CCSS. The DC OSSE may partner with organizations (either for-profit or not-for-profit) and school-based entities to identify best practices and strategies for effective extended learning opportunities. Where the CFT, in consultation with the leaders, teachers, and parents of the priority school, determines that implementation of extended learning opportunities is necessary to help improve student achievement, it will work with the school to identify appropriate programs. To the extent the CFT identifies before-school or after-school tutoring or related supports as appropriate, the school may provide these services itself or contract with an appropriate provider organization (either for-profit or not-for-profit) or school-based entity.

The CFT will review these plans and make recommendations as appropriate. The effectiveness of these interventions will be measured by improved instruction for all students (walkthrough data, formal/informal observations), classroom-level assessment data for all students, and student achievement as measured by state-level assessments.

Curriculum, Assessment, and Intervention System

The CFT will monitor the effective implementation of intervention strategies by the DCPS and the PCSB to prepare all students, including students with disabilities, ELLs, and low-performing students, for college- and career-readiness, which must include a combination of the following:

- Implementing the CCSS and aligned model curriculum and unit assessments; and
- Implementing research-based interventions for all students two or more grade levels

behind in English/Language Arts or mathematics.

The effectiveness of these interventions will be measured by improved instructional data (walkthroughs, formal/informal observations), curriculum implementation data (walkthroughs, formal/informal observations), classroom-level assessment data, intervention implementation and achievement data, and improved student achievement measured by state-level assessments.

Effective Use of Data

The CFT will monitor the effective implementation of strategies by the DCPS and the PCSB to increase the effective use of data to improve instruction, which must include a combination of the following:

- Using data to inform instruction including, where appropriate, the placement of a full-time data specialist in the school focused on implementing a system for teachers to develop and use common assessment data funded by school-level Title I funds;
- Providing time for collaboration on the use of data to inform instruction;
- Requiring professional development for all teachers in formative assessment design and data analysis to improve and differentiate instruction; and
- Requiring professional development to build the principal's capacity to collect and analyze data for improving instruction and the skills necessary to develop a schedule and system for increasing teacher ownership of data analysis for improving instruction.

The effectiveness of this intervention will be measured by an increase in the numbers of teachers using data to inform and differentiate instruction as well as improved student achievement as measured by state-level assessments.

School Climate and Culture

The CFT will monitor the effective implementation of intervention strategies by the DCPS and the PCSB to support the development of a safe and healthy learning environment capable of meeting students' social, emotional, and health needs, which must include a combination of the following:

- Placing, where appropriate, a climate and culture specialist in the school funded with school-level Title I funds to work with the leadership, staff, and families to develop or adopt a plan for creating a climate conducive to learning and a culture of high expectations;
- Addressing other non-academic factors that impact student achievement, such as students' social, emotional, and health needs by way of additional counseling, access to additional ancillary services, or other supports;
- Requiring professional development for all staff and leadership to implement a comprehensive plan for creating a climate conducive to learning and a culture of high expectations; and

- Requiring professional development to build the capacity of the leadership team to collect and analyze appropriate data and take appropriate actions for continually improving the climate and culture of the school.

The effectiveness of these interventions will be monitored in part using attendance and discipline disaggregated data as well as climate survey responses from students, parents, and staff. Effectiveness will ultimately be measured by improved student achievement on school and state-level assessments.

Effective Family and Community Engagement

The CFT will monitor the effective implementation of strategies by the DCPS and the PCSB to increase the engagement of families and the community, which must include a combination of the following:

- Revising the job description, where appropriate, of the family and community engagement staff to focus engagement on academics;
- Requiring professional development for family and community engagement staff designed to increase their skill level in developing academically focused engagement opportunities for families and the community;
- Requiring professional development for all staff on the effective support of students with disabilities and ELLs and their families; and
- Requiring professional development for all staff on the development and implementation of effective, academically-focused family and community engagement.

The effectiveness of these interventions will be measured by an increase in the number of family and community engagement opportunities, including academically focused activities, as well as improvement on key indicators on the school climate survey. In addition, effectiveness will be measured by student achievement in state-level assessments.

Differentiated Interventions for Subgroups

School leaders, the DCPS, and the PCSB will determine specific interventions to address the needs of students with disabilities and ELLs in priority schools. The CFT will review and make recommendations, where appropriate.

Priority schools that are identified as not meeting the needs of students with disabilities will be required to implement a plan that addresses, at a minimum, the following:

- Curriculum aligned to the CCSS;
- Collaborative teaching model;
- Improved use of data for differentiating instruction;
- Professional development for special education teachers to better understand the rigor of the CCSS; and
- Professional development for all teachers to better meet the needs of students with

disabilities.

Priority schools identified as not meeting the needs of ELLs will be required to implement targeted strategies, that address, at a minimum, the following:

- Research-based strategies for teaching academic English;
- Strategies to improve the use of native language support;
- Strategies to scaffold learning to meet the rigorous requirements of the CCSS;
- Professional development for all teachers to learn strategies for meeting the content learning needs of ELLs; and
- Professional development for teachers supporting ELLs to better understand the rigorous requirements of the CCSS.

Effectiveness measures for both subgroups will be determined based on the interventions and will be required to include student achievement measures.

SEA-Level Monitoring

For all schools, the impact of the interventions will also be regularly monitored by the Innovation and Improvement team to ensure that all schools are implementing interventions effectively and making progress toward increasing student achievement. The DC OSSE Innovation and Improvement team will focus primarily on the DCPS and the PCSB and their schools identified as priority and focus and will be committed solely to driving capacity for the DC OSSE to deliver support to LEAs where needed to improve student outcomes. This team will monitor and support the DCPS and the PCSB as they conduct reviews of underperforming schools, help to diagnose the causes of schools' challenges, and provide the support and interventions required for meaningful and lasting improvement.

The CFT will be in constant communication with the DC OSSE leadership and the DC OSSE Innovation and Improvement Team to ensure that the agency is continually designing and providing the resources and guidance most effective to drive school improvement.

In addition to measuring the degree to which a school meets the quantitative definition of the priority classification, the CFT will also monitor the extent to which the DCPS and the PCSB are accomplishing the implementation of the interventions aligned to the turnaround principles.

The DCPS and the PSCB may also select one of the four SIG turnaround models (see http://www2.ed.gov/programs/sif/2010-27313.pdf) after no fewer than six months and no more than a one-year planning period in each priority school. The four SIG models are as follows:

1. Turnaround: Replace the principal, rehire no more than 50 percent of the staff, and grant the new principal sufficient operational flexibility (including in staffing, calendars/time, and budgeting) to implement fully a comprehensive approach to substantially improve student outcomes.
2. Restart: Convert the school or close and reopen it under a charter school operator, a

charter management organization, or an education management organization selected through a rigorous review process.

3. <u>Closure</u>: Close the school and enroll the students who attended that school in other schools in the district that are higher achieving.

4. <u>Transformation</u>: Replace the principal and take steps to increase teacher and school leader effectiveness, institute comprehensive instructional reforms, increase learning time, create community-oriented schools, and provide operational flexibility and sustained support.

Schools identified by the DC OSSE as priority schools will have no less than half a year and no more than one year to plan for implementation of selected model and interventions. This time frame will allow for sufficient collaboration between LEAs, schools, parents, and the school community.

Per ESEA flexibility request requirements for priority schools, the DC OSSE will require the development of a three-year improvement plan from the DCPS and the PCSB for each school identified as a priority school. To assist the school and LEA in development of the plan, a school-level needs assessment or quality school review will be conducted in each priority school by a visiting review team led by the DCPS Office of School Turnaround (for DCPS schools) or the PCSB (for public charter schools) that includes staff from the DC OSSE. Improvement plans for priority schools must incorporate an improvement plan that includes strategies and interventions addressing all seven turnaround principles.

Upon submission of the LEA improvement plan and performance targets for each school, the DC OSSE will review and make recommendations as needed. It will also approve the use of the LEA's and/or school's Title I funds to fund the LEA's improvement plan.

To ensure that the DC OSSE can provide effective guidance and support to LEAs and schools, each improvement plan will include annual performance targets set by the DCPS and the PCSB, in consultation with schools and parents, focusing on the aspects of each school's individual improvement plan. These ambitious and achievable performance metrics will be tailored to each school based on its data and needs assessment. The DCPS and schools will be allowed to use Title I reservation to support data management and reporting for the purposes of school improvement reporting. The DCPS and the PCSB (on behalf of charter schools) will submit to the DC OSSE mid-year and end-of-year reports for each priority charter school so that the DC OSSE can provide guidance and recommendations to ensure improvement. This reporting will support the DC OSSE's oversight of the statewide differentiated recognition, accountability and support system.

During the school's first year of implementation and each year thereafter until the school exits status, the DC OSSE will monitor the DCPS and the PCSB in their implementation of each school's improvement plan and each school's progress. The DC OSSE will then make recommendations to the DCPS and the PCSB to adjust implementation of the improvement plan. Throughout the school year, the DC OSSE will also be available to LEAs and schools to provide support to LEAs and in each priority school as needed. At the end of the school year,

the DC OSSE will analyze data and monitoring reviews to assess the school's progress in implementing the required interventions. The DC OSSE will then develop an annual progress report for all priority schools that will be publicly available.

Meaningful Consequences

To ensure meaningful consequences are implemented for priority schools that do not make progress after full implementation of interventions, the DC OSSE will hold the DCPS and the PCSB, as the Charter Authorizer, accountable for making significant progress in improving achievement and narrowing achievement gaps in each school under their jurisdiction (see Table 2.D.iii.1).

The DCPS and the PCSB have the primary responsibility of developing and implementing an improvement plan for schools identified as priority. During the first two years of being in priority status, the DC OSSE will review the DCPS and PCSB improvement plan and make recommendations as needed. DCPS and PCSB will be required to ensure 20 percent of Title I funds are reserved for school-level interventions and supports.

Table 2.D.iii.1: DCPS, PSCB, and the DC OSSE Roles

Year	DCPS and PCSB Role	The DC OSSE Role
1	Develop and implement plan	Review and make recommendations
2	Adjust plan as needed	Review and make recommendations
3	Implement plan approved by the DC OSSE	Approve plan and prescribe use of funds
4	Consider school closure or alternative governance	Recommend for closure or alternative governance

If a priority school fails to meet the exit criteria after two years, the DC OSSE will assume approval authority of the improvement plans submitted by the DCPS and the PCSB for priority schools. The DC OSSE will adjust interventions including, but not limited to, the following: a restriction of the flexibility in the use of Title I funds; the redirecting of Title I funds to activities that have a greater likelihood of school improvement, such as hiring a school improvement coach and forming partnerships with external organizations with evidence of effectiveness in the area of school improvement; and the implementation of other SIG requirements such as using the Indistar tool, found at www.centerii.org/SchoolRestructuring/login.aspx, to manage the school improvement plan and activities. Indistar is the District of Columbia's online continuous school improvement planning and monitoring tool developed by the Center on Innovation and Improvement that allows schools to assess their implementation of indicators of effective practice, select priority objectives aligned to those indicators, plan action steps to address deficiencies related to those objectives, implement those action steps, and evaluate progress.

If a school that was identified as a priority school is again identified as a priority school at the end of its three-year intervention implementation, the DC OSSE will assess the school's likelihood of future progress and make a recommendation for closure or alternative governance based on that assessment as authorized in ESEA Section 1116(b)(8)(B)(iv).

LEA and School-Level Accountability

The success of this ESEA flexibility request and its implementation is founded on the belief that the DC OSSE plays both an oversight role as it relates to the statewide differentiated recognition, accountability, and support system, and a supportive role to LEAs and schools. For this reason, the DC OSSE believes in LEA autonomy and with that flexibility, within the boundaries set by statute and regulations therein, in how LEAs implement Title I programs and use Title I funds. For this to be successful, a strong belief in accountability is necessary to improve academic achievement and move students toward college- and career-readiness. As noted above PCSB and the DCPS have accountability systems that play a key role in statewide improvement, but they are not included in the waiver as they are not commitments of the SEA. A description of their accountability systems is included in this request as an attachment.

Summary

Using the DC OSSE school accountability index, priority schools—evidenced by low growth, low achievement, and/or low graduation rates for all students will require support to implement their program with fidelity. The DC OSSE expects that through intensive intervention and supports more students will be college and career ready. To reach this goal, priority schools must make dramatic and rapid improvements that accelerate achievement for all students, including students with disabilities and ELL. The DC OSSE will provide tools for LEA and school-based improvement teams to assess their needs, develop a plan for improvement, and implement action steps to ensure student learning improves in each priority school.

2.D.iv   Provide the timeline the SEA will use to ensure that it's LEAs that have one or more priority schools implement meaningful interventions aligned with the turnaround principles in each priority school no later than the 2014–2015 school year and provide a justification for the SEA's choice of timeline.

ESEA Flexibility Guidance Question - *Does the SEA's proposed timeline distribute priority schools' implementation of meaningful interventions aligned with the turnaround principles in a balanced way, such that there is not a concentration of these schools in the later years of the timeline?*

All priority schools that were previously identified as persistently lowest-achieving schools and that are implementing SIG have already begun implementation of meaningful interventions aligned with the turnaround principles and will complete their three-year SIG interventions by the end of the 2012–13 or 2013–14 school year. Schools are required to implement the interventions for the entire length of the three-year grant period. Having learned the importance of an extended planning period, the DC OSSE will require all newly identified priority schools to spend at least half of one school year planning for the

implementation of meaningful interventions that meet the turnaround principles.

Schools listed in 2.D.ii that were not previously identified as persistently lowest-achieving schools will initiate this planning in the 2012–13 school year and begin implementation of the selected model by the beginning of the 2013–14 school year. This means that all newly identified priority schools will be in year two of a three-year intervention model by the 2014–15 school year.

Table 2.D.iv.1. SIG Cohorts Timeline 2011 to 2015–16

Cohort	2011–12	2012–13	2013–14	2014–15	2015–16
Cohort 1 (8 schools)	Year 2 implementation	Year 3 implementation	Continued monitoring and support	Continued monitoring and support	Continued monitoring and support
Cohort 2 (6 schools)	Year 1 implementation	Year 2 implementation	Year 3 implementation	Continued monitoring and support	Continued monitoring and support
Additional priority schools		Planning year	Year 1 implementation	Year 2 implementation	Year 3 implementation

This timeline aggressively targets persistently low-performing schools for intensive intervention and support by identifying schools beyond the minimum number of schools the SEA is required to identify at this time. This timeline also provides sufficient time for planning by schools, LEAs, and the DC OSSE to ensure full, effective implementation that will lead to dramatic increases in student achievement within newly identified priority schools.

2.D.v   Provide the criteria the SEA will use to determine when a school that is making significant progress in improving student achievement exits priority status and a justification for the criteria selected.

ESEA Flexibility Guidance Question - *Did the SEA provide criteria to determine when a school that is making significant progress in improving student achievement exits priority status? Do the SEA's criteria ensure that schools that exit priority status have made significant progress in improving student achievement? Is the level of progress required by the criteria to exit priority status likely to result in sustained improvement in these schools?*

Once a school is identified as a priority school, it is required to be so identified for a minimum of three years and implement the 7 turnaround principles described previously within the same three year period of time. If a priority school does not make sufficient progress, it will remain a priority school until it meets the exit criteria below. To exit priority status, schools must demonstrate significant progress in improving student achievement and narrowing achievement gaps by meeting all of the following targets for three years, not necessarily consecutive years, in a five-year period:

- Overall School Index: Exceed an index score of 30 for the "all students" group;
- Graduation Rate: Exceed 60 percent; and

- Participation: Exceed 95 percent participation for the "all students" subgroup.

At the end of each school year during the three-year implementation period, the DC OSSE will determine whether each priority school has made significant progress in each of these three areas and will make a summary determination of whether the school is on track to exit priority status.

If a school is deemed to be making sufficient progress at the end of each of the originally planned three years of implementation, then the school will exit priority status at the end of the original three-year implementation period. If, however, a school is deemed not to be making sufficient progress at the end of any year during its three-year implementation, it will be required to adjust its plan and add additional years to its overall intervention timeline until sufficient progress is achieved for three full years within a five-year period. The chart below shows several examples of exit timelines for priority schools; "Yes" indicates that sufficient progress was made, "No" indicates that sufficient progress was not made, and "Exit" indicates that the school exited priority status at the beginning of the school year.

Table 2.D.v.1. Exit Timeline for Priority Schools (Example)

School	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
School A	Yes	Yes	Yes	Exit		
School B	Yes	No	Yes	Yes	Exit	
School C	No	No	Yes	Yes	Yes	Exit

These criteria ensure that the lowest-performing schools in the District of Columbia are held to high standards for fully and effectively implementing selected intervention models to ensure that student achievement improves significantly over time. Three full years of sufficient progress indicates that the school has built a sustainable foundation for academic achievement that justifies an exit from priority status.

2. E FOCUS SCHOOLS

2.E.i Describe the SEA's methodology for identifying a number of low-performing schools equal to at least 10 percent of the State's Title I schools as "focus schools." If the SEA's methodology is not based on the definition of focus schools in *ESEA Flexibility* (but instead, e.g. based on school grades or ratings that take into account a number of factors), the SEA should also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance.

ESEA Flexibility Guidance Question - *Did the SEA describe its methodology for identifying a number of low-performing schools equal to at least 10 percent of the State's Title I schools as focus schools? If the SEA's methodology is not based on the definition of focus schools in ESEA Flexibility (but is instead, e.g., based on*

school grades or ratings that take into account a number of factors), did the SEA also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance?

ESEA Flexibility Guidance Question - *Is the SEA's methodology for identifying focus schools educationally sound and likely to ensure that schools are accountable for the performance of subgroups of students?*

Under its differentiated recognition, accountability, and support system, the DC OSSE will identify focus schools based on the performance of subgroups, both within a school and as compared to the state average. This approach ensures that the category of focus schools meets the required definitions for performance and progress under ESEA flexibility. Schools that meet one of the following criteria and have not already been identified as priority schools will be identified as focus schools:

1. **Statewide Achievement Gaps**: Has a subgroup that performs substantially lower than the state average on any subject. The threshold for this category is a school subgroup index 20 points or more below the state subgroup index. The statewide achievement gap index is calculated as follows: (statewide subgroup index in subject – school subgroup index in subject).
2. **Within-School Achievement Gaps**: Has a subgroup that performs substantially lower than the highest-performing subgroup within the school on any subject. The threshold for this category is a within-school achievement gap index of 1.5 or higher within a subject, indicating that the gap between the highest and lowest-performing subgroups is equal to or higher than the "all students" average score. The within-school achievement gap index is calculated as follows: (highest-performing subgroup index – lowest-performing subgroup index)/all students index.
3. **Participation Rate:** Has one or more subgroups with a participation rate lower than 95 percent for two consecutive years.

ESEA Flexibility Guidance Question - *In identifying focus schools, was the SEA's methodology based on the achievement and lack of progress over a number of years of one or more subgroups of students identified under ESEA section 1111(b)(2)(C)(v)(II) in terms of proficiency on the statewide assessments that are part of the SEA's differentiated recognition, accountability, and support system or, at the high school level, graduation rates for one or more subgroups?*

The DC OSSE classification of focus schools uses the following identification criteria:
1. Subgroup index is 20 or more points lower than the statewide index for that subgroup (20 points or lower will get the required 10 percent of Title I schools); **or**
2. Achievement gap between the highest-performing subgroup index and lowest-performing subgroup index is greater than the performance of the "all students" subgroup index (highest minus lowest divided by all is greater than 1.5); **or**
3. Participation rate for subgroup is lower than 95 percent for two consecutive years.

By using the index in the identification criteria included in the value chart calculation for focus schools, the DC OSSE is taking into account the lack of progress over multiple years –in this case two years.

Table 2.E.i.1 demonstrates that the list of schools in Table 2 is consistent with the definition for focus schools, as identified above, under the ED's "Demonstrating that an SEA's Lists of Schools Meet ESEA Flexibility Definitions" guidance document.

Table 2.E.i.1 Compliance with ESEA Flexibility Definitions for Focus Schools

Category	Number
Total number of Title I schools	166
Minimum number of focus schools required to be identified	17
Number of focus schools identified by the DC OSSE	17
Total number of schools on list generated based on overall rating that are Title I that have had a graduation rate less than 60 percent over a number of years	0
Total number of schools on list generated based on overall rating that are Title I that have greatest within-school gaps	0
Total number of schools on list generated based on overall rating that are Title I that have a subgroup or subgroups with low achievement or at the high school level low graduation rates	17

There are no schools identified as focus based on the graduation rate because schools with a graduation rate lower than 60 percent for multiple years will always be identified as priority schools in D.C.

2. E.ii   Provide the SEA's list of focus schools in Table 2.

2.E.iii   Describe the process and timeline the SEA will use to ensure that its LEAs that have one or more focus schools will identify the specific needs of the SEA's focus schools and their students and provide examples of and justifications for the interventions focus schools will be required to implement to improve the performance of students who are the furthest behind.

Updated June 8, 2012

Similar to efforts to be undertaken with priority schools, the DC OSSE believes that partnering with the DCPS and the PCSB, as the charter authorizer for charter school accountability, will be critical in moving further and faster in addressing persistent underperformance, including closing or consolidating schools. The DC OSSE will provide tools for LEA and school-based improvement teams to assess their needs, develop a plan for improvement, and implement action steps to ensure student learning improves in each focus school. Through collaboration with the DCPS, the PCSB, the Human Capital Task Force, the Student Growth Task Force, the Deputy Mayor of Education's Office, and other partners, the DC OSSE will enhance the effectiveness and coherence of district systems to support school improvement.

Differentiated Interventions for Subgroups

The DCPS and the PCSB, in consultation with school leaders, will determine specific interventions aligned to address the needs of students in focus schools.

Focus schools that are identified as not meeting the needs of students based on subgroup performance will be required to implement intervention strategies similar to those research-based differentiated interventions discussed in section 2.D, but exclusively focused on the subgroups that placed the school in focus status.

To ensure focus schools address the areas of deficiency that placed them in focus status, the improvement plan must include a combination of the following research-based strategies:

- Requiring professional development for school leaders focused on instructional leadership including the collection of data and feedback mechanisms for continually improving instruction;
- Providing time for collaboration on the use of data to inform instruction;
- Requiring professional development for all teachers in formative assessment design and data analysis to improve and differentiate instruction;
- Addressing other non-academic factors that impact student achievement, such as students' social, emotional, and health needs by way of additional counseling, access to additional ancillary services, or other supports;
- Requiring professional development for all staff on the effective support of students with disabilities and ELLs and their families;
- Requiring professional development for all staff on the development and implementation of effective, academically focused family and community engagement;
- Extending learning time before, during, and after school aligned to CCSS; and
- Including any other promising strategy or activity that can effectively address the areas of deficiency that placed the school in focus status.

The Innovation and Improvement team will regularly monitor the DCPS and the PCSB in their implementation as well as the impact of the interventions to ensure that all schools are implementing interventions effectively and making progress toward increasing student achievement. The CFT will be in constant communication with the DC OSSE leadership to ensure that the agency is continually designing and providing the resources and guidance most effective to drive school improvement.

SEA-Level Support

As part of its statewide network of tiered support, the DC OSSE will collaborate and coordinate with the DCPS and the PCSB in the process for supporting schools. Schools identified by the DC OSSE as focus schools will be required to plan for selected models and interventions and begin implementation of interventions and supports no later than 60 days after the start of the school year. This will allow for sufficient collaborations among LEAs, schools, parents and the school community, which has requested that the DC OSSE have a stronger oversight role.

The DC OSSE will require the DCPS and the PCSB to develop a two-year improvement plan for each focus school. To assist in the development process, a school-level needs assessment or quality school review will be conducted in each focus school by a visiting review team led by the DCPS Office of School Turnaround (for DCPS schools) or the PCSB (for public charter schools) that includes staff from the DC OSSE. Information gathered from the needs assessment will inform the selection of the targeted interventions and the school's two-year plan. As part of its quality monitoring function, the DC OSSE will then make recommendations and provide guidance to the DCPS and PCSB around the development and implementation of its school improvement plan.

The identified needs, specific interventions, and progress-monitoring goals will be included in individualized school improvement plans developed for each focus school and approved by the DCPS or the PCSB, as the charter authorizer for accountability purposes taking into account the different levels of schools and types of school needs. The CFT will review plans to determine the intervention strategies that schools will use from a list of possibilities (listed below), and make recommendations as needed; at the same time, the CFT will monitor the effectiveness of the DCPS's and PCSB's work using a common set of expectations.

In addition, the DC OSSE will evaluate, support, and monitor school effectiveness through the DCPS and the PCSB around instructional leadership, curriculum, professional development, instruction, assessments, staff evaluation, human capital and financial/asset management.

The DC OSSE will use the CFT as explained in Section 2.D (staffed by various DC OSSE personnel from multiple divisions including school experts and external partners where appropriate) to ensure simultaneous and effective implementation of meaningful interventions take place in each focus school for a minimum of two years. As most of the District of Columbia's schools are in a Title I status, LEAs will have to incorporate the focus schools' individualized improvement plan in a Web-based tool such as Indistar (a system that

enables the CFT's continuous planning, implementation, monitoring, and course adjustment that empowers the DC OSSE senior staff to make recommendations about changes in practice to achieve desired results in student learning).

To ensure that the DC OSSE can provide effective guidance and support to LEAs and schools, each improvement plan will include annual performance targets set by the DCPS and the PCSB, in consultation with schools and parents, focusing on the aspects of each school's individual improvement plan. These ambitious and achievable performance metrics will be tailored to each school based on its data and needs assessment for the DC OSSE to use in its guidance, support, and monitoring of the DCPS and the PCSB. The DCPS and schools will be allowed to use Title I reservation to support data management and reporting for the purposes of school improvement reporting. The DCPS and the PCSB will submit mid-year and end-of-year reports to the DC OSSE so that the DC OSSE can provide guidance and recommendations to the LEA and school. This reporting will support the DC OSSE's oversight of school improvement.

Upon submission by the LEAs of school improvement plans and performance targets for each focus school to the DC OSSE, the DC OSSE will approve the use of Title I funds based on the quality of the school's needs analysis, intervention selection, improvement plan, and the DCPS and the PCSB capacity to implement targeted interventions.

SEA-Level Monitoring

The DCPS and the PCSB are responsible for the implementation of interventions and supports as part of the LEA-approved plan for schools identified as focus and priority. The DC OSSE will monitor the progress of the DCPS and the PCSB and make recommendations and implement meaningful consequences, where appropriate.

During schools' implementation of the school improvement plan and targeted interventions, the DC OSSE will monitor the DCPS's and the PCSB's implementation of the improvement plan and schools' progressThe DC OSSE will then make recommendations to the DCPS and the PCSB to adjust implementation of the improvement plan. Throughout the school year, the DC OSSE will also assign assistance liaisons and accountability monitors to provide support to LEAs and focus schools, as needed. At the end of the school year, the DC OSSE will analyze data and reports to assess these schools' progress in implementing the targeted interventions. The DC OSSE will then develop an annual progress report for all focus schools that will be publicly available.

To ensure effective implementation of strategies addressing the areas of deficiency that placed the school in focus status, the CFT will assign a team member to support the DCPS and PCSB in creating a plan that includes interventions and supports. All three parties (the DCPS, the PCSB, and the CFT) will work to develop a communication plan that helps school staff and parents understand how the interventions are related and required to increase and sustain improved student achievement. This approach will enable staff and parents to better understand the plan and motivate them to put more support behind it.

The CFT will monitor the effective implementation of intervention strategies by the DCPS and the PCSB to prepare all students, including students with disabilities, ELLs, and low-performing students, for college- and career-readiness.

Meaningful Consequences

To ensure meaningful consequences are implemented for focus schools that do not make progress, the DC OSSE will hold the DCPS and the PCSB, as the charter authorizer, accountable for ensuring schools make significant progress in improving achievement and narrowing achievement gaps in each school under their jurisdiction (see Table 2.E.iii.1).

Similar to the model for priority schools, the DCPS and the PCSB have the primary responsibility of developing and implementing an intervention and support plan for schools identified as focus. During the first two years of being in focus status, the DC OSSE will review the DCPS and the PCSB intervention and supports plans and make recommendations as needed. A reservation of 20 percent of the total Title I allocation will be required at the LEA level for school-level interventions and supports.

Table 2.E.iii.1: DCPS, PSCB, and the DC OSSE Roles

Year	DCPS and PCSB Role	DC OSSE Role
1	Develop and implement plan	Review and make recommendations
2	Adjust plan as needed	Review and make recommendations
If a focus school is re-identified as focus after 2 years:		
3	Implement plan approved by the DC OSSE	Approve and prescribe use of funds
4	Consider school closure or alternative governance	Evaluate whether to recommend for closure or alternative governance

If a focus school fails to meet the exit criteria after two years, the DC OSSE will assume approval authority of the school-level plans for interventions and supports. The DCPS and the PCSB will make adjustments to interventions including, but not limited to, the following: a restriction of the flexibility in the use of Title I funds; the redirecting of Title I funds to activities that have a greater likelihood of school improvement, such as hiring a school improvement coach; forming partnerships with external organizations with evidence of effectiveness in the area of school improvement; and the implementation of other SIG requirements such as using the Indistar tool, or a comparable tool to manage the school improvement plan and activities. If a school that was identified as a focus school remains a focus school for a fourth year, the DC OSSE will assess the school's likelihood of future progress and evaluate whether to recommend for closure or alternative governance.

LEA- and School-Level Accountability

Using the DC OSSE school accountability index, focus schools—evidenced by low growth, low achievement, and DC CAS participation rates for specific subgroups of their population—will require support to implement their program with fidelity. The success of this ESEA flexibility request and its upcoming implementation is founded on the belief that the DC OSSE plays a supportive role to LEAs and schools. For this reason, the District believes in LEA autonomy and with that flexibility, within the boundaries set by statute and regulations therein, in how LEAs implement Title I programs and use Title I funds. To be successful, a strong belief in accountability is necessary to improve academic achievement and move students toward college- and career-readiness. Both the PCSB and the DCPS have local accountability systems that play a key role in statewide improvement, but they are not included in the main body of the waiver as they are not commitments of the SEA. A description of their accountability systems is included in this request as an attachment.

Summary

Focus schools will be held to the same fundamental goals for closing all achievement gaps and ensuring that all students in the District of Columbia graduate from high school college- and career-ready. To reach this goal, focus schools must make dramatic and rapid improvements that accelerate student achievement for all students and subgroups. The interventions for focus schools are similar to those for priority schools, with the primary difference between the two being that a focus school interventions targets the subgroup with accountability system identified achievement gaps, The DC OSSE will provide tools for LEA and school-based improvement teams to assess their needs, develop a plan for improvement, and implement action steps to ensure student learning improves in each focus school.

2.E.iv   Provide the criteria the SEA will use to determine when a school that is making significant progress in improving student achievement and narrowing achievement gaps exits focus status and a justification for the criteria selected.

ESEA Flexibility Guidance Question - *Do the SEA's criteria ensure that schools that exit focus status have made significant progress in improving student achievement and narrowing achievement gaps? Is the level of progress required by the criteria to exit focus status likely to result in sustained improvement in these schools?*

At the end of the school year during the two-year implementation of a school improvement plan and targeted interventions, the DC OSSE will determine whether each focus school has made sufficient progress to exit focus school status.

In summary, a school can become eligible for exiting focus status if it meets the following criteria:

1. No longer meets the definition of a focus school for two consecutive years:
   - Statewide Achievement Gap Index: Reduces the achievement gap for all

subgroups to below 20 for one or more years
- Within-school Achievement Gap Index: Reduces the within-school achievement gap for all subgroups to below 1.5 for two or more years
- Participation: Exceeds 95 percent participation for the subgroup leading to the initial identification;
2. Has, as determined by the CFT, successfully implemented all interventions required through its Indistar or comparable Web-based tool; and
3. Its lowest-performing subgroups have met their AMOs for three years and/or have demonstrated high growth for two consecutive years as measured by the accountability index.

Table 2.E.iv.1 shows two examples of exit timelines for focus schools: "Yes" indicates that sufficient progress was made, "No" indicates that sufficient progress was not made, and "Exit" indicates that the school exited focus status at the beginning of the school year.

Table 2.E.iv.1: Exit Timeline for Focus Schools (Example)

School	Year 1	Year 2	Year 3	Year 4	Year 5
School A	Yes	Yes	Exit		
School B	No	No	Yes	Yes	Exit

These criteria ensure that the lowest-performing schools in the District of Columbia are held to high standards for fully and effectively implementing selected intervention models to ensure that student achievement improves and achievement gaps decrease significantly over time. Evidence demonstrating the high standards for meeting "sufficient progress" indicates that the school has built a foundation for academic achievement that justifies exiting focus status. Only when this has been demonstrated will a school exit focus status.

Through collaboration with the DCPS, the PCSB, the Human Capital Task Force, the Student Growth Task Force, the Deputy Mayor of Education's Office, and other partners, the DC OSSE will enhance the effectiveness and coherence of district systems to support school improvement. In addition, the DC OSSE will evaluate, support, and monitor schools and LEAs around instructional leadership, curriculum, professional development, instruction, assessments, staff evaluation, human capital and financial/asset management. By doing so, the DC OSSE believes that the District of Columbia's students will show annual academic growth, raise graduation rates, and close achievement gaps, particularly with regard to students with special needs and ELLs in focus schools.

The DC OSSE Innovation and Improvement team will regularly monitor the DCPS's and the PCSB's implementations as well as the impact of the interventions to ensure that all schools are implementing interventions effectively and making progress toward increasing student achievement. The CFT will be in constant communication with the DC OSSE leadership to ensure that the agency is continually designing and providing the resources and guidance

most effective to drive school improvement.

2.F PROVIDE INCENTIVES AND SUPPORTS FOR OTHER TITLE I SCHOOLS

2.F   Describe how the SEA's differentiated recognition, accountability, and support system will
        provide incentives and supports to ensure continuous improvement in other Title I schools
        that, based on the SEA's new AMOs and other measures, are not making progress in
        improving student achievement and narrowing achievement gaps, and an explanation of how
        these incentives and supports are likely to improve student achievement and school
        performance, close achievement gaps, and increase the quality of instruction for students.

In the District of Columbia, 89 percent of schools receive Title I funds. Therefore, the majority of
incentives and interventions outlined in this section and in the preceding sections will apply to
nearly all District of Columbia schools.

Educators and professionals in schools are in the best position to identify and respond to
student needs. Therefore, the DC OSSE seeks to maximize flexibility at the LEA and school level
so that school professionals can plan and implement the most appropriate activities. The DC
OSSE's role is to provide the tools necessary for school-based teams to assess needs, develop
effective Title I plans, and implement action steps to ensure that student learning improves.

Differentiated Interventions and Supports

The DC OSSE will provide opportunities and services to all LEAs and schools based on the
statewide network of tiered support. The requirements of the ESEA flexibility request align with
the DC OSSE's differentiated approach to serving schools and will yield maximum benefit to
LEAs, schools, and students.

The engagement of the DC OSSE with LEAs and schools is based on school classification (Table
2.F.i). Priority schools will receive intensive interventions, focus schools will receive targeted
interventions, and developing and rising schools will receive guided interventions. Reward
schools are making progress and will receive maximum flexibility to allocate Title I and other
federal funds. Many DC OSSE supports remain available to reward schools, including support
around CCSS implementation and statewide professional development.

Updated June 8, 2012

Table 2.F.i. The DC OSSE Level of Engagement by School Classification

	SEA Engagement with DCPS/PCSB	LEA/School Autonomy over Activities	LEA/School Flexibility in Use of Federal Funds
Priority Schools	Very High	Lower	Lower
Focus Schools	High	Moderate	Moderate
Developing Schools	Moderate	High	High
Rising Schools	Moderate	High	High
Reward Schools	Low	Very High	Very High

The DC OSSE will implement a system of incentives and interventions in all District of Columbia schools (Table 2.F.ii).

Table 2.F.ii. The DC OSSE Incentives and Interventions by School Classification

SCHOOL CATEGORY:	Reward School	Rising School	Developing School	Focus School	Priority School
Receive SEA Recognition	Yes	No	No	No	No
Eligible to Receive SEA Financial Reward	Yes	No	No	No	No
Flexibility in the Use of Funds	Yes	Yes	Yes	No	No
Describe Continuous Improvement in Title I Grant Application	Yes	Yes	Yes	Yes	Yes
Implement Interventions and Supports If Statewide AMOs Not Met	Yes	Yes	Yes	Yes	Yes
Implement Turnaround Principles	No	No	No	No	Yes

The DC OSSE Department of Innovation and Improvement will monitor interventions and support. The Department of Innovation and Improvement supports the CFT and works closely with the DC OSSE's senior leadership to ensure that all intervention and support initiatives are tightly coordinated and effective. The CFT executes the process and ensures that LEAs comply with critical federal regulations and quality implementation.

The DC OSSE School Reports

The DC OSSE's primary way to hold LEAs accountable for school performance is through a publicly-available, annual school performance report. Each school will be evaluated by the CFT based on school achievement on DC CAS assessments and the growth of its students in proficiency level descriptor, information on whether the school met targets for all students and subgroups, participation rates, graduation rates for high schools, and demographic information and financial data. Proficiency and growth will be reported over time for ELA, math, science, and composition for all students and for each subgroup. Each school will be compared to all schools in the District of Columbia as well as to schools with similar student demographics.

The DCPS and the PCSB, as the charter authorizer for charter school accountability, will be responsible for making data available to staff, parents, and others to aid in the identification of areas in need of improvement and make recommendations for interventions and supports. They will be required to have public meetings to review the data and identify the areas that need improvement. LEAs, the DCPS, and the PCSB will also be required to address performance gaps among subgroups and to develop proposed targets for improvement using the 20 percent reservation of Title I funds. The CFT will annually review these goals and will provide targeted technical assistance, where necessary.

For schools that have not been designated as focus or priority and do not meet their school AMOs, the CFT will review performance reports to identify areas for improvement and to identify the combination of state-level services and interventions that could improve student learning.

Schools That Do Not Meet Targets

All schools that fail to meet their school AMOs and that are not already identified as priority or focus schools will be identified as schools requiring additional support. In partnership with the DCPS and the PCSB, these schools will be required to identify and respond to the needs of their students.

If a non-priority and non-focus school misses its performance on the school AMOs, the LEA will be required to expand their current Title I plan to describe the interventions and supports that address the "all students" and/or subgroup that missed the school AMOs. Additionally, as part of its Title I plan and Title I grant application, LEAs with schools that do not meet their targets must describe how the LEA will identify needs based on the school AMOs that were missed, select priority objectives and interventions aligned to those needs, plan action steps to address deficiencies related to those objectives, implement those action steps, and evaluate progress. The LEA will be required to reserve 20 percent of Title I funds to implement interventions and supports necessary to improve student achievement on the school AMOs that were missed. Interventions and supports to address deficiencies in school-based practices may include a combination of the following:

- Training to improve the quality of school leadership;

- High-quality curriculum aligned to the CCSS;
- Expansion of learning time before, during and after school to supplement instruction to school-selected students provided by external providers, schools, or LEAs;;
- Assistance in the analysis and use of data;
- Supplemental research-based and job-embedded professional development; or
- Any other activity that is specifically required by an action step included in the Title I plan of Title I grant application in support of an objective

The DC OSSE Department of Teaching and Learning and the CFT team will provide guidelines for the updating of Title I plans and Title I grant applications at the beginning of the 2012–13 school year.

Each school will be evaluated based on its achievement vis-à-vis targets, implementation of the interventions and supports as described in the revised Title I plan and in the Title I grant application, and the growth of its students as measured by the new accountability system. If the LEA does not meet targets or progress in the areas that were identified in need of improvement based on the school AMOs that were missed, the CFT will make recommendations for the use of the 20 percent reservation of Title I funds and intensify guidance, technical assistance, and monitoring. Lastly, the remaining funds will carry over to the following year for prescriptive use by the DC OSSE. The business rules for the 20 percent reservation and use of Title I funds is described in section 2G.

Additional Resources Available to All Schools

Beginning at the end of the 2012–13 school year, the DC OSSE Department of Innovation and Improvement will assess, review, and make recommendations to the interventions and supports plan as it relates to the use of the Title I reservation and alignment with the overall Title I program, offer technical assistance targeted to the struggling subgroup(s), and monitor school-level progress for future academic cycles and increase technical assistance when needed.

Title I schools will be invited and encouraged to attend regional trainings and professional development sessions designed around the DC OSSE interventions and school turnaround principles. The DC OSSE will place additional resources on the DC OSSE website for all schools to access. Online resources include, but are not limited to, webinars, online professional development courses, exemplar lessons aligned to CCSS, and toolkits.

DCPS and PCSB School Reports

The DC OSSE recognizes that reports from the DCPS and the PCSB provide significant value to LEAs and schools. Both the DCPS School Scorecard and the PCSB PMF provide comprehensive information on school performance that goes beyond the data incorporated into the DC OSSE's system of classifying schools for recognition, accountability, and support. LEAs and schools can use this information to inform a needs assessment and planning for continuous school improvement. LEAs and schools retain the autonomy and responsibility for identifying and

implementing strategies and activities that will most significantly and positively affect student achievement.

The DC OSSE's work supplements the work of both the DCPS and the PCSB. Both the PCSB and the DCPS have policies in place to ensure that schools that fail to improve over a significant number of years are closed. The DC OSSE will recommend school closure where appropriate, but the DC OSSE does not have and does not seek authority to require school closure.

Summary

The statewide network of tiered recognition, accountability, and support as described in this section will improve academic achievement, increase graduation rates, and close achievement gaps. Working in partnership with the DCPS, the PCSB and charter LEAs will be critical to the successful implementation of the new accountability system.

2.G BUILD SEA, LEA, AND SCHOOL CAPACITY TO IMPROVE STUDENT LEARNING

2.G   Describe the SEA's process for building SEA, LEA, and school capacity to improve student learning in all schools and, in particular, in low-performing schools and schools with the largest achievement gaps, including through:
   i.   timely and comprehensive monitoring of, and technical assistance for, LEA implementation of interventions in priority and focus schools;
   ii.   ensuring sufficient support for implementation of interventions in priority schools, focus schools, and other Title I schools identified under the SEA's differentiated recognition, accountability, and support system (including through leveraging funds the LEA was previously required to reserve under ESEA section 1116(b)(10), SIG funds, and other Federal funds, as permitted, along with State and local resources); and
   iii. holding LEAs accountable for improving school and student performance, particularly for turning around their priority schools.

Explain how this process is likely to succeed in improving SEA, LEA, and school capacity.

ESEA Flexibility Guidance Question - Is the SEA's process for ensuring sufficient support for implementation of interventions in priority schools, focus schools, and other Title I schools under the SEA's differentiated recognition, accountability, and support system (including through leveraging funds the LEA was previously required to reserve under ESEA section 1116(b)(10), SIG funds, and other Federal funds, as permitted, along with State and local resources) likely to result in successful implementation of such interventions and improved student achievement?

Monitoring of and Technical Assistance for LEAs

As discussed throughout Principle 2, the DC OSSE will monitor, provide technical assistance to, support, and hold LEAs accountable for interventions in priority and focus schools and other Title I schools by first increasing the amount of actionable information on student achievement available to schools, districts, and the public. The new structure within the DC

OSSE will also provide improved supports and develop, incubate, and support new, high-quality education models so students assigned to the lowest-performing schools have improved options. The DC OSSE's CFT will be responsible for supporting LEAs and focus and priority schools. Finally, the DC OSSE will allow state Title I funds to be repurposed to provide supports and interventions to Title I priority and focus schools.

ESEA Flexibility Guidance Question - *Is the SEA's process for holding LEAs accountable for improving school and student performance, particularly for turning around their priority schools, likely to improve LEA capacity to support school improvement?*

As part of its SEA-level responsibilities, the DC OSSE will build capacity at the LEA and school level by providing guidance, technical assistance/support, and opportunities to participate in state-level trainings on CCSS implementation; developing and implementing teacher and leader evaluation systems; understanding the state-level differentiated recognition, accountability, and support system; serving special populations; and leveraging federal resources (Title I, SIG, Title II, Title III, and other federal) to maximize coordination and academic achievement. Combined with the activities embedded in the statewide network of tiered support as described in this document, timely and effective monitoring will take place, LEAs and schools will be held to a high standard of accountability, and schools will be supported as needed to increase academic achievement, improve graduation rates, and close achievement gaps among subgroups.

ESEA Flexibility Guidance Question - *Did the SEA describe a process for the rigorous review and approval of any external providers used by the SEA and its LEAs to support the implementation of interventions in priority and focus schools that is likely to result in the identification of high-quality partners with experience and expertise applicable to the needs of the school, including specific subgroup needs?*

The DC OSSE will provide LEAs with information regarding effective external turnaround service providers by the start of the 2012-13 school year. The DC OSSE will inventory its vendor database to compile a list of external partners that have a record of effectiveness in providing services to schools based on provision of research-based effectiveness models that have the greatest likelihood of increasing student academic achievement, alignment of services to needs of schools and LEAs, and timeliness of service delivery. To ensure that external providers used by LEAs have been rigorously reviewed and approved, the DC OSSE will collect information regarding effectiveness of external turnaround service providers by developing and implementing a performance matrix that takes into account the selection criteria listed above. This information will be made available to LEAs and schools as part of the DC OSSE's annual publication of school turnaround performance reports. External service providers that do not show a record of effectiveness will be given a probationary period not to exceed the next bi-annual review session to demonstrate effectiveness.

Reports

As discussed in section 2.F, the DC OSSE's primary way to hold LEAs accountable for the performance of all schools is through a publicly available annual school performance report. Each school will be evaluated by the CFT based on its achievement on DC CAS assessments

and other data. Each school will be compared to all schools in the District of Columbia as well as to schools with similar student demographics.

Beyond making school information public, the DC OSSE can, among other things, recommend that schools reassign teaching staff, redirect spending to ensure funds are spent effectively and efficiently, alter curriculum and programs, and recommend to close chronically failing schools.

The DC OSSE Reorganization

As described in Section 2.A., the Division of Elementary and Secondary Education (ELSEC) within the DC OSSE will create a statewide network of tiered recognition, accountability, and support to maximize resources both within and outside of the agency. In the ELSEC division, the Innovation and Improvement team, currently part of the Race to the Top (RTTT) department, will oversee the implementation of the supports provided to LEAs and schools. This department then works to establish the CFT that will then partner and assist LEAs and schools with needs assessment, coordination, and development of federal grants programs, and use of federal funds. The Department of Innovation and Improvement will focus primarily on priority and focus schools and will be committed solely to driving capacity for the DC OSSE to deliver support to LEAs to improve student outcomes.

The CFT will include experts from across multiple domains within the DC OSSE and external experts as appropriate. The CFT will participate along with the DCPS and the PCSB in reviews of underperforming schools, assist in diagnosing the causes of schools' challenges, and provide the support and interventions required for meaningful and lasting improvement. The Department of Innovation and Improvement's approach is to focus resources on schools, which are the true units of change.

Additionally, the DC OSSE Office of Data Management (ODM)—through the Statewide Longitudinal Education Data System (SLED) —will provide LEAs with a variety of data elements that can help support instructional improvement. The ODM will provide LEAs with access to more comprehensive information on all state assessments, college attainment data, and college readiness assessments. Over time, ODM will provide technical assistance to LEAs in how to better understand and make effective use of data.

CCSS and Educator Evaluation Supports

To build the capacity of LEAs, the DC OSSE will prioritize support in two critical areas: CCSS and teacher/leader evaluation.

The District of Columbia believes that the adoption and effective implementation of the CCSS will enable all learners to be college and career ready. Due to the District of Columbia' small size and geographic footprint, the DC OSSE can comprehensively implement the standards sooner than most states and begin transitioning to aligned assessments. The DC OSSE aims to reach all teachers through state-level support and professional development.

The DC OSSE will build the capacity for LEAs and schools to:

- Implement the CCSS through technical assistance and training on the standards;
- Develop online resources and publications that help teachers align instruction to the CCSS and share exemplary lessons;
- Provide training on anchor papers and other assessment preparation technical assistance;
- Provide high-quality data at the standard and strand level on the DC CAS aligned to both the District of Columbia's historical standards and to the CCSS; and
- Connect schools struggling with implementation to external partners.

To reach the District of Columbia's teachers of special education students, the Division of Specialized Education Training and Technical Assistance unit within the Division of Specialized Education, in collaboration with other divisions within the DC OSSE, provides core professional development, training, and technical assistance to all LEAs in the District of Columbia. The core professional development program provides high-quality, evidenced-based training to all educators in the District of Columbia with a specific focus on improving the educational outcomes for students with disabilities.

The DC OSSE will help LEAs develop more rigorous teacher and leader evaluation and support systems by providing standards, guidance, and technical assistance. To advance this work, the DC OSSE has formed a teacher effectiveness team that will provide exemplars, technical assistance, and training to LEAs, and it will coordinate peer reviews and other intra-district collaboration. Principle 3 of this flexibility request provides additional information on educator evaluation systems.

Title I Funds

The DC OSSE will leverage funds that were previously reserved under ESEA to support the implementation of interventions in schools that do not meet their school AMOs, as described in 2.F.: LEAs with schools that do not meet their targets must describe how the LEA will identify needs based on the school AMOs that were missed, select priority objectives aligned to those needs, plan action steps to address deficiencies related to those objectives, implement those action steps, continue to reserve 20 percent of Title I funds, and evaluate progress beginning in the 2012–13 school year.

If school AMOs are met, LEAs will no longer be required to reserve 20 percent of Title I funds in their grant application, and any remaining funds from the 20 percent reservation will be released the following year for LEA discretionary use for Title I purposes.

For focus and priority schools, LEAs may access RTTT and SIG funding to support the implementation of SIG models in schools that meet the federal criteria for receiving SIG funds. Additionally, the DC OSSE will require an LEA with one or more priority schools to reserve a necessary and reasonable amount from its Title I allocation during the three-year implementation period. These funds must support the implementation of meaningful

interventions that meet the turnaround principles or one of the SIG models in each priority school and targeted interventions in each focus school.

3.A DEVELOP AND ADOPT GUIDELINES FOR LOCAL TEACHER AND PRINCIPAL EVALUATION AND SUPPORT SYSTEMS

Select the option that pertains to the SEA and provide the corresponding description and evidence, as appropriate, for the option selected.

Option A	Option B
☒ If the SEA has not already developed and adopted all of the guidelines consistent with Principle 3, provide: i. the SEA's plan to develop and adopt guidelines for local teacher and principal evaluation and support systems by the end of the 2011–2012 school year; ii. a description of the process the SEA will use to involve teachers and principals in the development of these guidelines; and iii. an assurance that the SEA will submit to the Department a copy of the guidelines that it will adopt by the end of the 2011–2012 school year (see Assurance 14).	If the SEA has developed and adopted all of the guidelines consistent with Principle 3, provide: i. a copy of the guidelines the SEA has adopted (Attachment 10) and an explanation of how these guidelines are likely to lead to the development of evaluation and support systems that improve student achievement and the quality of instruction for students; **ii.** evidence of the adoption of the guidelines (Attachment 11); and iii. a description of the process the SEA used to involve teachers and principals in the development of these guidelines.

Students come first, and the most effective way to improve student learning is to provide them with the best qualified professionals, teachers, and school leaders. Effective teachers and school leaders have the skills and knowledge to remove barriers to education and provide the necessary support to maximize students' classroom experiences. Effective school leaders and teachers are those who are best qualified to provide solutions and to improve student outcomes.

The DC OSSE's theory of action with respect to supporting teachers and leaders is that providing exemplary standards, guidance, and technical assistance will help LEAs develop more rigorous teacher and leader evaluation and support systems. Rigorous and meaningful evaluation systems will help improve instructional practices, resulting in increased teacher and leader effectiveness, greater student achievement, and higher graduation rates.

During the outreach efforts to obtain stakeholder input in the development of this ESEA flexibility request, teachers were apprehensive about assessment-based evaluations that are

not aligned to schools' curricula and do not incorporate critical barriers such as chronic truancy. Teachers also expressed concerns that growth measures as currently defined may not capture improvement reported for students whose performance falls several grades below actual grade level or for students with special needs. Teachers and leaders also questioned growth measures for all grades and subjects in teacher evaluations when, in their belief, there are no valid or objective means of assessing performance in these subjects and grades.

Stakeholders discussed options such as end-of-year tests and a portfolio of several assessments and external assessments (e.g., ACT/SAT for high school) and suggested that growth measures be very lightly weighted in teacher evaluations, given that assessments for non-tested grades may be of questionable quality and validity. Considering the level of interest and the number of concerns raised by stakeholders, the state evaluation guidelines and monitoring by the DC OSSE will ensure that teachers and leaders are prominently involved in the development of LEAs' new evaluation systems. The DC OSSE recognizes the need for buy-in for the new systems, while understanding the importance of developing meaningful and valid measures that will help the recipients of the evaluations improve instructional practices.

With respect to public charter schools, the DC School Reform Act of 1995 provides charter schools with autonomy over personnel, including evaluation systems, hiring, and firing. Charter school administrators understand that the caliber of their teaching staff is a critical element in ensuring the success of their instructional programs. Charters go to great lengths to attract and hire the absolute best professionals from across the nation. Still, it is not easy to find the right fit; therefore, teachers must be evaluated regularly, and lower-performing ones must be either supported or released. Therefore, like other SEAs, the DC OSSE's role is to develop policies that allow for local flexibility, provide guidance, disseminate best practices, and ensure effective monitoring to ensure LEAs meet state and federal guidelines.

According to the ED's ESEA Flexibility Frequently Asked Questions (5.7.12), a charter school may develop and implement a teacher and principal evaluation and support system that is consistent with the guidelines developed and adopted by the SEA. Alternatively, if the SEA can demonstrate to the ED that all charter schools in the state are held to a high standard of accountability through a strong charter school authorizer system (consistent with the Department's Charter Schools Program (CSP) assurances for SEA grantees from FY 2010 onward, including the provision that charter school authorizers use increases in student academic achievement for all groups of students as the most important factor when determining to renew or revoke a school's charter), the SEA may allow its charter schools to develop and implement evaluation and support systems that meet all of the elements of Principle 3 but that do not necessarily adhere specifically to the SEA's guidelines.

If the charter authorizer meets this high standard of accountability, charter schools and LEAs will have the opportunity to develop their own teacher and leader evaluation systems. The PCSB will ensure that Title I Charter LEAs develop and implement teacher and leader

evaluation systems that meet all federal requirements for Principle 3. The DC OSSE will oversee PCSB in this activity. If the charter authorizer does not meet these conditions, then charter LEAs will have to meet state guidelines.

Since the DC OSSE has existing state teacher and leader evaluation requirements for RTTT-participating LEAs, the DC OSSE will modify those requirements further to address the ED's guidelines for teacher and leader evaluation systems in Title I schools. The DC OSSE is selecting Option A for this ESEA flexibility request to recognize that it is expanding these guidelines for evaluation and support systems to reflect the needs of all Title I schools.

To support the implementation of high-quality teacher and leader evaluation systems, the DC OSSE will work closely with LEAs, schools, and other education partners. Specifically, the DC OSSE will disseminate state evaluation requirements, develop voluntary professional standards for teachers and leaders, identify exemplary evaluation systems, provide technical assistance around research and best practices, and review and approve LEA evaluation systems.

As part of RTTT, other strategies related to increasing teacher and leader effectiveness include the following: supporting high-quality teacher and leader pipelines through a competitive grant with the first award in May 2011, improving teacher and leader preparation programs through the development of a new scorecard starting in August 2012, and revising teacher licensure regulations starting in October 2012 that take the CCSS into account. These strategies will improve teacher and leader preparation practices to better equip teachers and leaders to improve student learning and achievement. Projects related to these strategies are described below.

In this ESEA flexibility request application, the DC OSSE requests that the schools with evaluation systems approved by the DC OSSE be exempt from various highly qualified requirements under NCLB. Once a school has an approved evaluation system in place, it will no longer need to develop highly qualified teacher (HQT) improvement plans or set aside specific funds to ensure its teachers are highly qualified. However, the expectation remains that schools will continue to ensure teachers are highly qualified. The DC OSSE will shift from providing technical assistance to LEAs in developing and implementing their HQT improvement plans to developing and implementing high-quality teacher and leader evaluation systems.

ESEA Flexibility Guidance Question - *Are the SEA's guidelines likely to result in support for all teachers, including teachers who are specialists working with students with disabilities and English Learners and general classroom teachers with these students in their classrooms that will enable them to improve their instructional practice?*

Building on Race to the Top (RTTT)

The DC OSSE will modify RTTT requirements further to address the ED's guidelines for teacher and leader evaluation systems in Title I schools, and this set of guidelines will govern all LEAs in the District of Columbia that receive Title I funds. LEAs not currently participating in RTTT that are Title I will adopt the state guidelines and receive professional development, access to exemplar high quality teacher evaluation systems, and technical assistance in aligning teacher evaluation systems to state guidelines. Table 3.A.i below describes the requirements that are met by the RTTT evaluation requirements and those that will need to be added.

RTTT LEAs comprise about 57 percent of the District of Columbia's schools, and these schools enroll approximately 90 percent of District students. These RTTT schools will only have to meet the new requirements that were not already included in the RTTT Teacher and Leader Evaluation requirements if they receive Title I funds. All schools receiving Title I funds will have to meet the new state requirements that meet the standards of this ESEA flexibility request. To reiterate, there will be one set of state guidelines that all Title I schools must meet, including RTTT schools. However, RTTT schools will only have to provide evidence of meeting the requirements that were not already included in the original RTTT requirements, and they will be required to apply to the DC OSSE for a waiver to differentiate student achievement and growth measures if they would like to use measures in addition to the DC Value Added model for teachers in tested grades and subjects.

Table 3.A.i: RTTT Requirements for Evaluation and Support System That Meet ESEA Flexibility Requirements and Those That Will Be Added to the New State Guidelines

ESEA Flexibility Requirement	Has This Been Included in the Existing RTTT Requirement?	Will This Be Included in State Guidelines for Title I Schools (includes both RTTT and non-RTTT)?
Teacher and principal evaluation and support systems will be used for continual improvement of instruction	Yes	Yes
Differentiate performance meaningfully by using at least three performance levels	Yes	Yes
Use multiple valid measures in determining performance levels	Yes* (RTTT requires multiple measures, but does not address validity)	Yes (State guidelines will also require schools to participate in a validity study)
Include as a significant factor data on student growth for	(RTTT only requires value-added model for tested	Yes (State guidelines will require 50 percent for tested

all students (including ELLs and students with disabilities)	grades and subjects and does not specify a percent for non-tested grades and subjects)	grades and subjects and 20 percent for non-tested grades and subjects)
Include other measures of professional practice (which may be gathered through multiple formats and sources, such as observations based on rigorous teacher performance standards, teacher portfolios, and student and parent surveys)	Yes	Yes
Evaluate teachers and principals on a regular basis	Yes	Yes
Provide clear, timely, and useful feedback, including feedback that identifies needs and guides professional development	Yes	Yes
Use to inform personnel decisions	Yes	Yes
Include teachers and principals in reviewing and revising evaluation systems	No	Yes

Modifying State Requirements

During stakeholder engagement, participants expressed concerns about the capacity of LEAs to conduct validity analyses of their school's evaluation systems. Therefore, the DC OSSE now proposes to conduct these analyses by looking at the correlation between teacher and leader evaluation ratings and student achievement and growth in a school. Stakeholders were also concerned about the ability of LEAs to identify student growth measures for teachers in non-tested grades and subjects. The DC OSSE has broadened its definition of student growth measures from student growth only to allow for both measures of growth and achievement for teachers in non-tested grades and subjects. Moreover, the DC OSSE has hired a contractor to provide support to LEAs in using student achievement measures within teacher and leader evaluations.

In developing guidelines for the new evaluation and support system for Title I schools, the DC OSSE will build on the RTTT evaluation requirements to address the ED's ESEA flexibility

requirements and, to reflect lessons learned from the first year of implementation of the requirements, and to allow maximum LEA flexibility for non-RTTT schools. These guidelines will ensure that the District of Columbia's new evaluation systems offer reliable, valid, and complete data to inform personnel decisions. They also provide leaders and managers with information and tools to offer support to teachers and create opportunities for them to pursue professional development and growth.

To have the guidelines in place by June 25, 2012, the DC OSSE will take the following steps:

- **Step 1**: The DC OSSE will revise the RTTT guidelines to meet the ED's requirements in starting June 4, 2012 for schools receiving Title I funds.
- **Step 2**: Title I Committee of Practitioners will review and comment on the guidelines by e-mail the week of June 11, 2012.
- **Step 3**: The DC OSSE will hold a conference call with school post the guidelines on the OSSE web site and share them with LEA leaders to get feedback on the from all LEAs the week of June 11, 2012.
- **Step 4**: The DC OSSE will get feedback from the Human Capital Task Force on June 15, 2012.
- **Step 5**: The DC OSSE will revise and finalize the guidelines and submit the guidelines to the ED by June 25, 2012.

The DC OSSE will provide training and support for LEAs and schools as they develop their systems, as detailed in the next section of this document, between October 2012 and March 2013. Schools will develop evaluation systems that meet these requirements and will pilot these systems for one year before full implementation.

Teacher and Leader Evaluations under RTTT

Increasing teacher and leader effectiveness was a primary goal of the District of Columbia's successful RTTT application. The District of Columbia understands that effective teachers and leaders are the foundation for a high-performing educational system. One of RTTT's primary strategies for increasing teacher and leader effectiveness is to improve the quality and rigor of educator evaluation systems. These systems should provide teachers and leaders with clear expectations, create a common vision of effective instruction for all students, including English language learners and students with disabilities, offer meaningful feedback about how to improve practice, and inform teacher and leader professional development needs. RTTT staff worked with the Human Capital Task Force to develop evaluation requirements with a goal to improve instructional practice in RTTT-participating schools. The Human Capital Task Force consists of representatives from RTTT schools that work on human capital issues.

Additional RTTT initiatives that align with the goal of increasing teacher and leader effectiveness include the Charter School Teacher Pipelines Grant and the Teacher Preparation Scorecard. The DC OSSE's Charter School Teacher Pipelines Grant supports the development or expansion of teacher residency programs that recruit, train, evaluate, and

place highly effective teachers into both traditional and charter public schools in the District of Columbia. This is a competitive grant that is part of the RTTT grant program. The Teacher Preparation Scorecard is intended to evaluate teacher preparation programs in the District of Columbia using a number of performance indicators, including evaluation data, which will measure program completers' impact on student achievement. The Teacher Preparation Scorecard is also a project that is part of the RTTT program.

Finally, another competitive grant that is part of RTTT, the Professional Learning Communities of Effectiveness grant, focuses on developing professional learning communities that work together to address an educational challenge. Last year, a grant was awarded to a consortium of LEAs led by E. L. Haynes Public Charter School, a high-performing local charter school, to develop an online library of video lessons aligned to the CCSS. In addition, the DC OSSE's Educator Licensure and Accreditation unit plans to incorporate CCSS components in its elementary, English, and mathematics licensure requirements as the unit revamps it state accreditation and licensure requirements in coordination with the signing of a renewed state partnership agreement with the Council for the Accreditation of Educator Preparation (formerly NCATE). The DC OSSE anticipates completing this work by the end of the 2012–13 school year.

ESEA Flexibility Guidance Question - *Does the SEA incorporate student growth into its performance-level definitions with sufficient weighting to ensure that performance levels will differentiate among teachers and principals who have made significantly different contributions to student growth or closing achievement gaps?*

Student Growth RTTT Teacher and Leader Evaluation Guidelines

The DC OSSE's RTTT grant requires that school leader evaluations include student growth to a significant extent and that teacher evaluations include student growth as 50 percent of the evaluation rating for teachers in English/Language Arts and mathematics in grades 4 through 8. Including student growth in educator evaluations ensures that educators are focused on improving student achievement. RTTT schools must also provide timely and specific feedback to educators about their performance.

The DC OSSE will modify the RTTT Teacher and Leader Evaluation requirements to meet the guidelines in the ED's ESEA flexibility request and adopt them for all Title I schools. Specifically, the requirements that are *not* currently addressed in the RTTT Teacher and Leader Evaluation requirements are the following:

- Ensuring the validity of measures;
- Providing student achievement or growth measures for all teachers and leaders; and
- Including teachers and principals in reviewing and revising evaluation systems.

More detail about these requirements is provided in the next section.

To meet the requirements of ESEA flexibility, all schools receiving Title I funds will have to

incorporate student growth into teacher and leader evaluations. For school leaders and teachers in tested grades and subjects, 30 percent will have to be a growth measure based on the DC CAS, and 20 percent will have to be an achievement or growth measure determined by the LEA. For teachers in non-DC CAS grades and subjects, 20 percent will have to be based on an LEA-determined measure of student achievement or growth.

The student growth requirements are slightly different for RTTT schools. RTTT schools must use the value-added model (DC CAS) as 50 percent of the evaluation rating for teachers in tested grades and subjects unless they receive a student achievement waiver from the DC OSSE. If their waiver is approved, the school must use the value-added model as at least 30 percent of the evaluation rating and can propose other measures of achievement for the remaining 20 percent. The DC OSSE will encourage all LEAs and schools to consider how their evaluation systems are aligned with the CCSS by providing guidance, technical support, and training in thinking through this alignment.

ESEA Flexibility Guidance Question - *Will the SEA's guidelines ensure that evaluations occur with a frequency sufficient to ensure that feedback is provided in a timely manner to inform effective practice?*

ESEA Flexibility Guidance Question - *Will it [student growth] be used to inform personnel decisions?*

Continuous and constructive feedback is critical to improving instructional practice, and feedback is most useful if it is immediate. In addition to providing specific feedback, schools are required to provide targeted professional development based on evaluation findings to ensure that professional development focuses on the needs of educators in their schools. Schools will gauge educator performance using a variety of measures to provide a holistic picture of educator performance. Finally, evaluation results are only meaningful if they are used to improve teacher practice and to inform personnel decisions. The DC OSSE requires that schools use these results to inform personnel decisions, such as those about compensation, retention, and promotion.

Teachers set goals with one of their school leaders at the beginning and midpoint of the school year. Throughout the school year, school leaders engage in both formal and informal observations and coaching sessions that involve lesson plan feedback, lesson observation feedback, student work and achievement feedback, goal progress, and ongoing support. All teachers have at least two formal observations each year.

Current Evaluation Systems in the District of Columbia

RTTT schools have developed a variety of unique evaluation models that meet RTTT requirements. With the exception of 2 Charter LEAs participating in RTTT, every RTTT school has developed an evaluation system that is rigorous and meets the unique needs of the school. The DCPS's IMPACT evaluation system is one of the more established systems and has received national attention from researchers, policymakers, and practitioners. KIPP DC provides another model of a rigorous evaluation system that also provides continuous feedback and support to teachers. Below is a description of both of these systems. These

examples demonstrate how the District of Columbia can support a variety of evaluation models that are unique yet effective.

District of Columbia Public Schools: IMPACT is the District of Columbia Public Schools' system for assessing the performance of teachers and other school-based staff. IMPACT ratings for teachers are based on the following elements:

- **Student Achievement:** The DCPS believes that a teacher's most important responsibility is to ensure that her or his students learn and grow. For this reason, educators are held accountable for the growth their students make on the DC CAS or on other assessments if they do not teach a DC CAS grade or subject.
- **Instructional Expertise:** This is assessed through up to five formal observations each year: three by teachers' administrators and two by independent, expert practitioners called master educators. Feedback and guidance for growth are provided in post-observation conferences.
- **Collaboration:** Education is very much a team effort. IMPACT factors in collaboration by measuring the extent to which educators work together.
- **Professionalism:** Teachers are also held accountable for key professional requirements, including following all school policies and procedures and interacting with colleagues, students, families, and community members in a respectful manner.

KIPP DC: KIPP DC has a system for evaluating teachers and supporting them in their professional growth through observation, coaching, and feedback. Teachers are evaluated on the basis of the following elements:

- **Student Achievement (50 percent):** This component includes value-added results for teachers in DC CAS tested grades and subjects and other measures of student achievement for other teachers.
- **School Outcomes Survey (5 percent):** KIPP DC administers a survey that assesses leading indicators of school health to students, parents, and faculty. These indicators assess school culture and climate and teaching and learning.
- **Teacher Performance on the Competency Model (35 percent):** KIPP DC has a rubric that assesses teachers' performance on six competencies: Planning, Teaching (instruction and delivery), Managing (behavior, culture, and systems), Assessing, Leadership and Professionalism, and Beliefs and Character.
- **School-Wide Achievement (10 percent):** All teachers are evaluated in part based on school-wide performance on the DC CAS and another standardized measure of school-wide performance.

ESEA Flexibility Guidance Question - *Does the SEA have a process for ensuring that all measures that are included in determining performance levels are valid measures, meaning measures that are clearly related to increasing student academic achievement and school performance, and are implemented in a consistent and high-quality manner across schools within an LEA?*

For grades and subjects in which assessments are required under ESEA section 1111(b)(3), does the SEA define a

For grades and subjects in which assessments are not required under ESEA section 1111(b)(3), does the SEA either specify the measures of student growth that LEAs must use or select from or plan to provide guidance to LEAs on what measures of student growth are appropriate, and establish a system for ensuring that LEAs will use valid measures?

Evaluation systems submitted by RTTT schools will have to meet the following new criteria:

- <u>Ensuring validity of measures</u>: The DC OSSE will analyze the relationship between student achievement and teacher and leader evaluation ratings by analyzing the correlation between teacher and leader evaluation ratings and student growth and proficiency in a school. Title I schools will be required to submit the data needed so the DC OSSE may conduct this analysis. The DC OSSE will share results with LEAs and schools so that modifications can be made to their evaluation systems. The DC OSSE will also provide exemplars of valid observation rubrics that LEAs and schools can choose to adopt.

- <u>Training for teachers, leaders, and evaluators</u>: Schools will be required to provide training to all of their evaluators and develop plans to work toward inter-rater reliability among evaluators within the school.

- <u>Student growth measures</u>: Schools will be required to include a measure of student achievement as 50 percent of teacher and principal evaluations in tested grades and subjects. Specifically, schools will be required to include a growth measure based on the DC CAS for 30 percent of the evaluation rating and may select another measure of achievement for the remaining 20 percent. RTTT LEAs will still be required to use the District of Columbia value-added model as 50 percent of the evaluation rating for teachers in tested grades and subjects unless they receive a student achievement waiver from the DC OSSE. For teachers in non-tested grades and subjects in grades K–12, schools will be required to select a measure of achievement or growth that will account for 20 percent of the evaluation rating. The DC OSSE will provide guidance and technical assistance to schools in using achievement measures within teacher evaluations.

- <u>Schools will use standardized measures, where available.</u> Schools may pilot an assessment before using it for evaluation purposes. In the absence of standardized assessment results, The DC OSSE will grant LEAs and schools flexibility to propose their own assessments. For teachers in non-tested grades and subjects, schools may use end-of-course tests, objective performance-based assessments, student learning objectives, student performance on ELP assessments, and other measures of student achievement that are rigorous and comparable across schools within an LEA. The SEA will hire a contractor to develop a list of possible assessments that could be used for the various subject areas. Schools may also volunteer to participate in the statewide teacher value-added model. Finally, the DC OSSE will offer the District of Columbia's

school-wide growth measure as an option for teacher and/or principal evaluation. Schools may choose to use the school-wide growth measure as a portion of the evaluation rating of all teachers in a school, rather than having subject specific growth measures. The DC OSSE will review and approve plans for measuring student growth for use in teacher and leader evaluations.

- Include teachers and principals in reviewing and revising evaluation systems: Schools will be required to describe how they include teachers and principals in reviewing and revising teacher and principal evaluation systems and making revisions as needed.

Guidance and Technical Assistance

The DC OSSE will provide and facilitate technical assistance to LEAs and schools as they develop and implement evaluation and support systems. To ensure alignment with the CCSS, the DC OSSE will provide guidance and technical assistance in aligning the CCSS with teacher and leader evaluation systems and in evaluating teachers of ELLs and special education students. The DC OSSE can use discretionary grant funds to provide technical assistance from national providers to LEAs and schools in developing their systems.

Identifying exemplary evaluation systems is critical to this process. To that end, the DC OSSE will identify exemplary evaluation systems that national organizations have determined are research-based and have evidence of validity during the winter of 2013. These exemplars will provide guidance to LEAs and schools in developing or modifying their evaluation systems.

The DC OSSE will also develop a webpage that will be the source of information about teacher and leader evaluation requirements, standards, and evaluation systems during the winter of 2013. This webpage will include the DC OSSE policies, information about best practices, and presentation materials that LEAs and schools can use in their communications with teachers and leaders. The DC OSSE will also create forums for LEAs and schools to share information about their challenges and successes in implementing teacher and leader evaluation systems.

ESEA Flexibility Guidance Question - *Are the SEA's guidelines likely to result in differentiated professional development that meets the needs of teachers?*

Professional Development

The DC OSSE will provide professional development opportunities to support LEAs and schools in developing and implementing teacher and leader evaluation systems. During the 2012–13 school year, the DC OSSE will offer professional development sessions to LEAs and schools on designing effective teacher evaluation systems. These sessions will focus on topics such as the components of effective evaluation systems, how to conduct observations and provide useful feedback, and how to ensure inter-rater reliability. Professional development sessions will also focus specifically on how teachers of special education students and ELLs could be evaluated. Since schools will develop their own systems, they will be responsible for providing training on the systems themselves.

The DC OSSE will also continue to provide high-quality professional development offerings to teachers and leaders throughout the District to help them effectively implement the CCSS and address areas of need identified through evaluations. The Office of Training and Technical Assistance Unit offers a variety of professional learning experiences for special and general educators that focus on the following areas:

- Compliance with federal and local requirements for special education and related services;
- Effective pedagogy and rigorous curriculum, including alignment to the CCSS;
- Implementation of differentiated instruction and behavioral support; and
- Appropriate use of accommodations, modifications, and assistive technologies.

In addition, there are several ways the DC OSSE will support LEAs' and schools' efforts to implement the CCSS and to infuse the CCSS into classroom teaching and evaluations. For example, the DC OSSE will provide professional development to LEAs and schools in assessing the quality and complexity of texts teachers are teaching and their ability to help students respond to text-based questions and write evidence-based responses. The DC OSSE will also assist LEAs and schools with infusing the CCSS in teacher evaluation systems by taking the following steps:

- Providing professional development around interpretation of the CCSS;
- Developing a voluntary competency exam that LEAs and teacher and leader preparation programs can use to assess teachers' knowledge of the CCSS; and
- Helping LEAs review their observation rubrics to ensure they are aligned with the CCSS.

The DC OSSE publishes a guide annually about its many professional development offerings. The Office of Standards, Assessments and Accountability also provides professional development sessions that focus on interpreting the CCSS and their inclusion on the new DC CAS. This office also provides professional development on understanding and interpreting the ACCESS assessment for ELLs and on providing appropriate instruction and assessment for ELLs.

The District of Columbia will also provide targeted professional development for ELL educators. Specifically, these sessions will focus on ELD standards, language differentiation during content instruction and assessment, and the effective use of assessment results to increase student achievement.

Several professional development sessions are planned this summer for ELL educators. SDAIE, for example, is a hands-on, practical training that focuses on strategies for making content area instruction comprehensible and meaningful for ELLs in grades 2 through 12. Strategies that participants will learn include cooperative learning, adapting text for ELLs, building on prior knowledge, providing multiple ways to engage, providing comprehensible input, and making a home/school connection. This training will also be provided with a focus

on early childhood for pre-kindergarten through first grade.

With stakeholder involvement, the DC OSSE will develop and adopt voluntary teacher, leader, and professional development performance standards by December 2012 as a way of providing guidance to the LEAs and schools that are developing new evaluation systems. The standards will reflect the skills that teachers are expected to have to teach the CCSS. The DC OSSE will develop teacher performance standards based on the Interstate Teacher Assessment and Support Consortium Standards (InTASC), promising models from other states, the CCSS, and existing LEA standards. The DC OSSE will develop school leadership performance standards based on the Interstate School Leaders Licensure Consortium (ISLLC), New Leaders for New Schools, and promising models from other states as well as LEA standards. For the professional development standards, the DC OSSE will draw from Learning Forward's professional development standards, which articulate a vision of professional development that is continuous, job-embedded, and part of the school day.

ESEA Flexibility Guidance Question - *Does the SEA's plan include sufficient involvement of teachers and principals in the development of these guidelines?*

Stakeholder Input

The DC OSSE has received input from the RTTT Human Capital Task Force on revisions to the evaluation system requirements and will also seek feedback from other key stakeholders. Beginning in the 2012–13 school year, the Human Capital Task Force will be expanded to include non-RTTT school representatives. The DC OSSE will also create two new advisory groups—a group of teachers and a group of leaders from both public charter schools and the DCPS—that will provide input on the development of teacher, leader, and professional development standards. These groups will meet to review drafts of these documents and provide feedback. They will reconvene any time major modifications to the documents are proposed. Finally, the DC OSSE will post the final requirements for all teacher and principal evaluation systems as soon as they are approved by the ED and will conduct webinars and meetings to educate LEAs about the new standards and requirements. LEAs will therefore be required to involve teachers and leaders in the development of their evaluation systems and will need to demonstrate in their plans how they will do so.

Summary

By publishing and ensuring Title I schools meet state requirements, the DC OSSE is raising the bar for the quality of teacher and leader evaluation and support systems. The DC OSSE will support LEAs and schools in developing rigorous evaluation systems by providing professional development and technical assistance and by identifying high-quality resources and materials that provide teachers and leaders with meaningful feedback.

For additional information, see Attachment 14: Principle 3 Documents

- *Definition of Teacher Value-Added Model*

- *Definition of School-Wide Growth Model*

3.B ENSURE LEAs IMPLEMENT TEACHER AND PRINCIPAL EVALUATION AND SUPPORT SYSTEMS

3.B   Provide the SEA's process for ensuring that each LEA develops, adopts, pilots, and implements, with the involvement of teachers and principals, including mechanisms to review, revise, and improve, high-quality teacher and principal evaluation and support systems consistent with the SEA's adopted guidelines.

ESEA Flexibility Guidance Question - *Are the SEA's guidelines likely to result in support for all teachers, including teachers who are specialists working with students with disabilities and English Learners and general classroom teachers with these students in their classrooms that will enable them to improve their instructional practice?*

To ensure that Title I schools meet the new evaluation system requirements, the DC OSSE will review and approve all new and modified teacher and leader evaluation systems. These more rigorous evaluation systems will permit school to better focus on teacher and leader needs and areas for improvement to maximize student learning and improve student outcomes. The DC OSSE will also require that schools demonstrate how they involve teachers and principals in the development of these systems.

ESEA Flexibility Guidance Question - *Does the SEA have a process for reviewing and approving an LEA's teacher and principal evaluation and support systems to ensure that they are consistent with the SEA's guidelines and will result in the successful implementation of such systems?*

All Title I schools will have to create teacher and leader evaluation systems that address each of the state guidelines (which will meet the ED's ESEA flexibility requirements) and submit them to the DC OSSE by April 30, 2013. RTTT schools receiving Title I funds will only have to develop plans to address the three new criteria required by the ESEA flexibility request that were not already required by RTTT. The DC OSSE staff will review the plans and provide feedback where necessary. The DC OSSE review will focus on ensuring that the evaluation systems meet state requirements.

ESEA Flexibility Guidance Question - *Does the SEA have a process for ensuring that teachers working with special populations of students, such as students with disabilities and English Learners, are included in the LEA's teacher and principal evaluation and support systems?*

LEAs will be required to evaluate all teachers, including those working with special populations of students, such as students with disabilities and ELLs. The DC OSSE will collect teacher evaluation ratings for all teachers, as the primary method of ensuring that evaluation systems are implemented. Collected individually identifiable information will not be disclosed.

As part of this process, the DC OSSE will also review schools' plans for including student achievement and growth measures in evaluations. Schools whose plans are not approved will have to make revisions based on the DC OSSE feedback and resubmit them for review. The DC OSSE will approve all plans by August 1, 2013, so that schools are ready to implement the pilot year of their evaluation system (or second year of full implementation for RTTT LEAs) in 2013–14. Since there will not be a single statewide evaluation system, all LEAs will be required to pilot their evaluation systems. Similar to the review process conducted for RTTT schools, if plans do not meet the requirements, the DC OSSE will provide specific feedback for these schools to revise their plans and resubmit for review and approval.

ESEA Flexibility Guidance Question - *Did the SEA describe the process it will use to ensure that all measures used in an LEA's evaluation and support systems are valid, meaning measures that are clearly related to increasing student academic achievement and school performance, and are implemented in a consistent and high-quality manner across schools within an LEA (i.e., process for ensuring inter-rater reliability)?*

ESEA Flexibility Guidance Question - *Is the pilot broad enough to gain sufficient feedback from a variety of types of educators, schools, and classrooms to inform full implementation of the LEA's evaluation and support systems?*

The DC OSSE will also contract with Mathematica Policy Research, to conduct an analysis of the relationship between observation scores and value added results or other achievement measures where value added results are not available. The DC OSSE will review LEAs' evaluation ratings to determine whether there is a disconnect between teacher ratings and student performance. LEAs will also be required to conduct training for evaluators on their evaluation systems to ensure inter-rater reliability.

The DC OSSE has put a plan in place identifying specific milestones, responsible parties, and resource allocation to ensure high-quality and consistent implementation of teacher and leader evaluation and support systems across all schools by school year 2014–15.

First, the DC OSSE will revise the RTTT guidelines to meet the ED's ESEA flexibility guidelines in early June 2012. As mentioned earlier, there are three new aspects of the system that the guidelines will have to address.

ESEA Flexibility Guidance Question - *Does the SEA have a process for ensuring that an LEA develops, adopts, pilots, and implements its teacher and principal evaluation and support systems with the involvement of teachers and principals?*

With regard to the state guidelines, the DC OSSE will solicit feedback on the guidelines from the Title I Committee of Practitioners, members of the Human Capital Task Force, and LEA leaders during webinars or conference calls in early June. The DC OSSE will then compile all of the stakeholder feedback and revise the guidelines. The DC OSSE will submit the guidelines to the ED by June 25, 2012. In the District of Columbia, evaluation guidelines are also not required to be part of collective bargaining negotiations. After receiving feedback from the ED, the DC OSSE will finalize and post the guidelines by June 30, 2012.

In June 2012, the DC OSSE will solicit members for two new advisory groups—a group of teachers and a group of leaders from both public charter schools and the DCPS—that will

provide input on the development of educator performance standards, school leader performance standards, and professional development standards. The groups will meet to develop the standards during July and August 2012. The DC OSSE staff will finalize the standards in September 2012.

As mentioned at the beginning of Section 3.B, the DC OSSE will, upon receipt of the LEAs' evaluation system, review and provide recommendations to ensure that the systems were developed with input from teachers and principals.

ESEA Flexibility Guidance Question - *Is the SEA plan for providing adequate guidance and other technical assistance to LEAs in developing and implementing teacher and principal evaluation and support systems likely to lead to successful implementation?*

The DC OSSE staff will conduct trainings for LEAs and schools on the new evaluation requirements and standards from October 2012 through November 2012. The DC OSSE will then provide technical assistance to LEAs in designing or modifying effective evaluation systems that meet the DC OSSE requirements. The DC OSSE will also create a website that includes resources and exemplars related to teacher and leader evaluation during the winter of 2013.

Schools will have between January 2013 and April 2013 to develop their evaluation systems based on the new requirements. The DC OSSE will review local evaluation systems in May and June 2013 to provide feedback and ensure that systems developed by local authorities meet the state requirements. The DC OSSE plans to provide final notices to schools of approval by August 1, 2013.

In the 2013–14 school year, non-RTTT Title I schools will pilot evaluation systems that meet the requirements of the flexibility waiver, while RTTT Title I schools will fully implement evaluation systems that meet flexibility waiver requirements since RTTT schools will have already had a pilot year of implementing rigorous evaluation systems. By the beginning of school year 2014–15, all schools receiving Title I funds will be fully implementing evaluation systems that meet flexibility waiver requirements.

ESEA Flexibility Guidance Question - *Is the SEA's plan likely to be successful in ensuring that LEAs meet the timeline requirements by either (1) piloting evaluation and support systems no later than the 2013- 2014 school year and implementing evaluation and support systems consistent with the requirements described above no later than the 2014-2015 school year; or (2) implementing these systems no later than the 2013-2014 school year?*

Do timelines reflect a clear understanding of what steps will be necessary and reflect a logical sequencing and spacing of the key steps necessary to implement evaluation and support systems consistent with the required timelines?

Table 3.B.i presents key milestones for the implementation of the evaluation systems as discussed.

Table 3.B.i. Key Milestones for the Implementation of Evaluation Systems

Key Milestone or Activity	Detailed Timeline	Party(ies) Responsible	Evidence	Resources	Significant Obstacles
The DC OSSE revises RTTT evaluation requirements to meet ESEA flexibility waiver requirements	June 2012	The DC OSSE Staff	Draft evaluation guidelines	Two staff members	None
The DC OSSE seeks feedback on evaluation guidelines from LEAs, Human Capital Task Force, and Title I Committee of Practitioners	June 2012	The DC OSSE Staff	Feedback notes from LEAs, Human Capital Task Force, Title I COP and LEA leaders	Two staff members	None
Solicit members for advisory groups to develop voluntary teacher, leader, and professional development standards	June 2012	The DC OSSE staff	List of members	One staff member to solicit volunteers	Finding effective educators who have the time to participate
Submit evaluation guidelines to USDE for peer review	June 25, 2012	The DC OSSE Staff	Proposed evaluation guidelines	Two staff members	None
Receive feedback from ED on the evaluation guidelines	June–July 2012	ED	Feedback from the ED	ED staff and peer reviewers	Need for prompt turnaround

Finalize, distribute, and post evaluation guidelines	As soon as they are approved by the ED	The DC OSSE Staff	Final guidelines that have been distributed to all Title I schools and posted on the DC OSSE's website	Two staff members	Need for prompt turnaround
Develop voluntary teacher, leader, and professional development standards	July–August 2012	The DC OSSE staff, Teacher Task Force, Leader Task Force, Human Capital Task Force	Draft standards	Two staff members to review model standards and draft the DC OSSE standards and then manage the process for getting input and revising the standards	This will be a time-consuming process: the DC OSSE will have to find the staff capacity to do this or contract it out.
Adopt educator performance and professional development standards	September 2012	The DC OSSE staff	Performance standards	One staff member to finalize performance standards	None
Conduct trainings on evaluation requirements and voluntary standards	October–November 2012	The DC OSSE staff	Training materials and attendance lists	One staff member to conduct trainings	None

Provide technical assistance as needed to schools creating or revising their evaluation systems	December 2012–March 2013	The DC OSSE Staff	Technical assistance log of issues and responses	One staff member	None
Create website with resources on teacher and leader evaluation	December 2012–March 2013	The DC OSSE staff (with contractor)	Website address	One staff member	Awarding a contract quickly or building on an existing contract vehicle
Schools submit evaluation system plans to the DC OSSE for review and approval	By April 30, 2013	Designated Title I schools staff	LEA Evaluation System Plans	LEA staff	None
The DC OSSE conducts review process of teacher and leader evaluation systems	May–June 2013	The DC OSSE staff	Evaluation Review Tracking Sheet	Two staff members to conduct the review process	Allocating staff time to this activity
The DC OSSE sends approval notices to schools regarding their evaluation systems/plans	By August 1, 2013	The DC OSSE staff	Approval notices to schools	One staff member	None

Non-RTTT schools pilot evaluation systems/full implementation for RTTT schools	School year 2013–14	Schools/The DC OSSE staff	Approved Evaluation Plans, Title I monitoring visits	Staff members to conduct monitoring visits	None
Full implementation of evaluation systems for all Title I schools	School year 2014–15	LEAs/The DC OSSE staff	Title I monitoring visits	Staff members to conduct monitoring visits	None

Summary

By issuing new state guidelines and instituting a review process, the DC OSSE will assist LEAs and schools with the implementation of rigorous teacher and leader evaluation systems. These systems will offer frequent and timely feedback and will be used to inform professional development needs and personnel decisions. With higher quality information about teacher and leader performance, schools will be better able to design strategies that increase teacher and leader effectiveness and ultimately increase student achievement, raise graduation rates, and close achievement gaps.

This ESEA flexibility request in its entirety supports the DC OSSE's belief that students come first and qualified teachers and leaders directly affect student learning. This belief drives the DC OSSE's efforts to remove barriers to education by providing the necessary support to teachers and leaders.
